

# Lake Don Pedro Community Services District

## Regular Meeting of April 19, 2016

### AGENDA SUPPORTING DATA

#### 5. DISCUSSION AND ACTION ITEMS:

- d. Status update report on the Intake Booster Pump #2 Project Bidding and construction

#### **Background**

In 2015 the Board authorized the purchase of a second booster pump to be installed on the emergency barge pump system at the Lake McClure Intake. The pump and motor were purchased and are in stock at the District's yard. Binkley Consulting Engineers has prepared plans and specifications for the bidding and construction of the pump installation, as well as completion of several maintenance projects at the Intake site including removal of an old electrical control panel for the float pumps, repair of the chain length fence, and upgrade of the main pump inlet baskets.

Binkley is currently preparing a project construction cost estimate, and we are jointly considering the design of upgrades to the existing electrical controls, control valves and piping in the vault. It is less expensive to bid the entire renovations at one time, rather than to conduct multiple bid projects or to add more work to the project contractor under a change order.

We expect to have plans and specifications for the project on the Board's May meeting agenda for bid authorization.

#### **Recommended Motion**

Discussion only at this time.
