

CCWD Water Conservation Measures

The District thanks customers for their incredible conservation achievement of reducing use by 29% in 2015!

Please note that many of the water conservation requirements listed below have been imposed by the State under Governor Brown's drought order.

1. Continue Water Conservation Program efforts through public outreach, education, conservation incentives and partnering with local agencies to heighten awareness of the drought, inform the public of measures residential and commercial customers can take to reduce indoor and outdoor water use and curtail wasteful water use.
2. A districtwide 13 percent reduction in potable water use is required when compared to the same time period in 2013.
3. The District requests that customers water only up to three days per week and avoid outdoor irrigation between the hours of 10 a.m. to 4 p.m.
4. Water leaks in customer-owned plumbing shall be stopped or repaired by customers within 72 hours after being notified by CCWD staff.
5. Excessive irrigation that causes water to flow or spray onto adjacent properties, streets or other right-of-ways is not allowed.
6. Washing down sidewalks, driveways, parking areas, building exteriors, tennis courts, patios or other hard surface areas is not allowed, except to alleviate immediate safety or sanitation hazards.

7. Avoid outdoor irrigation during, and within 48 hours after, measurable rainfall.
8. Watering ornamental turf on public street medians is not allowed.
9. Use a hose with an automatic shut-off valve/nozzle to wash vehicles, boats or trailers.
10. Recirculated water must be used in decorative fountains and recreational ponds.
11. Restaurants and other food establishments shall only serve and refill water for patrons upon request. Restaurant owners are encouraged to use table cards to help convey the conservation message.
12. Hotels and motels shall offer their guests the option to not have linens and towels laundered daily and are encouraged to prominently display this option in each guest room.
13. Golf courses shall maximize their use of available recycled water and reduce their use of potable water by 20 percent compared to 2013 usage.
14. Line flushing will not be performed, except when necessary to comply with state and federal public health and safety requirements for operation of permitted potable water systems.
15. CCWD customers shall adhere to all other applicable water conservation requirements mandated by the State of California, including the Governor, the State Water Resources Control Board and the State Legislature.
16. CCWD staff members are authorized to investigate alleged violations of this Ordinance, to make determinations as to whether a violation has occurred, and to issue warning notices and administrative fines under this Ordinance.
