

**Special Meeting of the Board of Directors**  
**Lake Don Pedro Community Services District**  
**9751 Merced Falls Road**  
**March 4, 2015 at 1:00 p.m.**

*Mission Statement: The LDPCSD is dedicated to providing potable water that either meets or exceeds all state and federal standards in sufficient quantities to meet the needs of our customers utilizing the most cost effective methods possible while still maintaining a sound financial plan now and for the future.*

**AGENDA**

- 1 CALL TO ORDER: Presiding Officer: Establish Quorum, Pledge of Allegiance:**
- 2 Water Supply Emergency Reports and Actions:**
  - a. Status report of Lake McClure water supply and predicted supply for the upcoming six months
  - b. Overview of the District's water emergency response plan and water supply contingency plan; and approval of minor technical amendments thereto
  - c. Status report of Lake Don Pedro CSD Emergency Water Supply Project including funding applications, groundwater wells and surface water enhancements
  - d. Discussion regarding the need to gather information on at-risk population in the Don Pedro Community, for use by the respective counties and District in identifying and providing assistance to them efficiently in the event of a water outage emergency
- 3 Board of Directors Planning Session:**
  - a. Review of District Organizational Chart
  - b. Review of District Policies Related to Board and Staff Roles and Responsibilities, Norms and Protocol
  - c. Establish Board Goals and Objectives to be used to set and Evaluate Management Actions
- 4 ADJOURNMENT**

# Feet of Water Under Pumps Updated March 2, 2015

# LDPCSD Water Supply Emergency Status Update

March 2, 2015

## 1 CURRENT LAKE McCLURE WATER SUPPLY OUTLOOK

---

As of March 1, 2015 the water surface elevation of Lake McClure is 606 feet above sea level; storage of 87,704 acre feet. The lake elevation has increased by 20 feet since the record low elevation of 586 feet reached at the end of January, 2015; an increase of nearly 20,000 acre feet. The increase in reservoir elevation is caused by two main factors:

1. A significant rain event in early February that increased reservoir inflow drastically, and with inflow remaining in excess of outflow for the past 20 days, and
2. The reduction in reservoir outflow approved by the Department of Water Resources.

Using the above capacities and the following assumptions, the remaining water supply in Lake McClure will last until approximately **August 24, 2015**:

1. Lake McClure elevation, inflow and outflow remain relatively equal through the month of March; and
2. MID is required to return instream flows to normal effective April 1, 2015, and
3. MID does not increase reservoir outflow for downstream water sales or use, and
4. Drought conditions continue or intensify

Please note that due to the insignificant water usage by LDPCSD customers, the District demand and the success or lack thereof of its water conservation mandates have no effect on the lake level.

## 2 MANDATORY WATER CONSERVATION AND OUTREACH

---

Recognizing the water use reduction was immediately necessary, on December 3, 2104 the District adopted mandatory water conservation measures, with a requirement for 30% reduction in water usage. To date, customers are becoming educated on the issues, calling the office and visiting the website for current information.

Due to ongoing drought conditions and difficulty securing adequate groundwater well sites, the District Board directed staff to prepare more stringent water conservation regulations to require 50% mandatory water conservation achieved through an indefinite extension of an outside irrigation ban. A public Hearing is scheduled for March 9, 2015 to hear comments and protests on the proposed increase in water use restrictions, and the Board may vote to approve these restrictions during that meeting.

## 3 REQUEST (CONTINUED) FOR RELIEF FROM INSTREAM FLOW REQUIREMENTS

---

The MID has received state approval to reduce instream flows by 40%, or 160 acre feet per day through April 1, 2015. This action, combined with early February rains, resulted in an increase of 20,000 acre feet of water

stored in McClure. These reduced flow requirements will also keep Lake McClure at a relatively constant level through March 2015, even if no additional rain is received.

Unfortunately, on April 1, 2015, the flows out of McClure are to be increased once again to the normal rate of over 450 acre feet per day, and as stated above, the water supply accessible in Lake McClure could be depleted by the end of August 2015. If the current 40% reduced flows are maintained after April 1, 2015, the available McClure water supply will last through October 2015.

With a peak water demand of less than 2 acre feet per day, the District's water withdrawals from Lake McClure are not a factor in the level of the lake or the remaining water supply. Whether the McClure supply runs out or not is almost completely due to the decision on reservoir outflows. On February 19, 2015 the LDPCSD Board of Directors voted unanimously to request of MID that they pursue all available relief from the instream flow requirements that now come into effect April 1, 2015.

### 3.1 RECOMMENDED ACTION:

- 3.1.1 Submit the support necessary to MID, to include data regarding the Don Pedro community water supply emergency and requesting of DWR /State Water Board a reduction in instream flows by a minimum of 80 CFS to be in effect until alternate water supplies are established for Don Pedro.

## 4 EMERGENCY BARGE PUMP SYSTEM

---

The District's emergency barge pump system is now equipped to pump water to the lowest lake elevation possible at the Barrett Cove location. A second booster pump has been ordered and will be installed by late spring to add much system reliability during its constant summer use.

## 5 GROUNDWATER WELL INSTALLATION

---

To date, the District has drilled five test wells on four different properties in an attempt to find three new well locations capable of producing the target 350 Gallons per Minute (GPM). Unfortunately the first five locations produced no groundwater of adequate quantities worthy of final well development and pump installation. During the morning of March 2, 2015 the sixth test well location, which happens to be the last available approved test drilling site, produced approximately 150 gallons per minute.

The following are necessary before this groundwater well can be completed:

1. Secure additional funding assistance as the well is estimated to cost in excess of \$400,000 to complete and we are currently developing the documentation to receive a grant of \$200,000
2. Additional evaluation of this site to verify groundwater production
3. Secure the necessary easements on the property
4. Complete engineering design, permitting and state approvals
5. Secure electrical connections from PG&E, as well as acquisition of the necessary easements and
6. Installation of the pump, controls and fencing
7. Connection of the new well to the existing raw water pipeline

## 5.1 GROUNDWATER WELL ACTIONS:

There are only two additional test well sites identified and we are awaiting property owner approval for drilling. In addition we are working with the owner of property on which a recent privately drilled test well produced 100 GPM and if a successful agreement is reached, the District would propose to purchase the easements necessary to develop the well site and connect to the District's raw water system. The potential of this well site will be known within the next two weeks.

## 6 ALTERNATE SURFACE WATER SOURCE (DEEP WATER) INTAKE

---

Our engineering team of Kennedy Jenks and Binkley Associates have completed initial brainstorming of options related to the development of a long term, reliable and drought resistant surface water source. During this week, we intend to meet with State Water Board staff to discuss options for both temporary and permanent solutions involving extension of pumping infrastructure to McClure Point area of Lake McClure. These temporary and permanent solutions can only proceed if substantial grant funding is received for the project. Grant applications will be submitted in the upcoming 30 to 45 days once the project description is further developed.

A rapidly deployable, temporary pipeline and pumping facility is desired due to the apparent lack of availability of adequate, reliable groundwater locally, the time required to design, permit and install a permanent 20,000 foot pipeline and the projections for depletion of McClure by late August 2015. Construction of the permanent pipeline and pumping facilities would begin on receipt of the necessary permits and approvals, environmental review, engineering design and easement acquisition; which will take six to 18 months to complete. Additionally, construction could take up to an additional year; for a total potential timeline of 24 months.

## 7 EMERGENCY WATER CONTINGENCY PLAN

---

The District has in place an Emergency Response Plan which is in the process of evaluation and immediate update if necessary. Both the County of Mariposa and Tuolumne are preparing emergency response plans to address the necessary response of their respective Emergency Operations Center. The respective plans will be crafted and updated to coordinate actions and communications should the water supply for the community run out. Completion of updates to the various plans and developing their integration strategy will take 30 to 60 days to complete.

## 8 DISTRICT FINANCES

---

The District has executed a grant agreement with the State Water Board in the amount of \$60,900 for reimbursement of expenses related to equipment purchased for the emergency pump barge. Invoices totaling that amount will be submitted immediately for reimbursement; however such payments can take 45 to 60 days to be received.

Within the next 60 days, and before receiving any grant reimbursements, we will have spent approximately \$150,000 on groundwater well development and related planning, engineering, test well drilling, permitting and technical work involved in submitting multiple funding applications. We have also received the draft \$200,000

grant agreement from the Department of Water Resources, and are working through some requested wording modifications that when accomplished, will allow us to sign the agreement and submit invoices for reimbursement of the above detailed expenses. Our first reimbursement request to DWR will likely be submitted at the end of April, with payment expected in 45 to 60 days following submittal.

The District is also incurring other (unreimbursed) cost increases expected to total approximately \$50,000 over the next six months including contracted emergency management services, staff time and overtime, Board meeting costs, printing and publication costs. The District's revenue is expected to decrease by a total of approximately \$18,000 in March and April, with expected additional losses in water sales revenue of \$118,500 between May and September 2015.

The District has adequate cashflow to pay the project costs as they are incurred on the current Well #2, so long as the majority of all costs are reimbursed through grants received. Preliminary commitments for additional grant funding will be necessary, in addition to the \$260,900 in two grants currently committed to the project, before the District can proceed with construction of the necessary additional wells #3 and 4.

## 9 ACCOUNTABILITY

---

District staff will provide a minimum of monthly reports on the status of water supply available, status of new water supply projects, and a full report to the Board of emergency expenditures. The financial reports will detail expenses submitted for reimbursement from state grants, grant amounts received, remaining grants as well as the amount of District enterprise funds used for cashflow and required local match.

# Lake Don Pedro Community Services District

## Special Meeting of March 4, 2015

### AGENDA SUPPORTING DATA

#### **2 Water Supply Emergency Reports and Actions:**

- b. Overview of the District's water emergency response plan and water supply contingency plan; and approval of minor technical amendments thereto

#### **Background**

The District's emergency Response Plan was created from a program template in 2005. This extensive document is a required component of management of our water system; and its regular update is critical to make sure that when an emergency occurs, the information, procedures, directives and other components of the Plan are current and accurate.

Due to the current water emergency and potential need for significant emergency response, the Plan must be updated as much of the information is a decade outdated. For the current update, staff will be inserting current personnel names, positions and contact information. Minor non-technical changes will also be made to ensure the plan's accuracy.

#### **Recommended Motion**

Motion to approve the update of information contained in the emergency response plan, accept the revised plan as amended and direct the General Manager to file revised copies of the Plan with the appropriate authorities.

---

# 1.0 Introduction

---

This section presents the purpose, goals, requirements, access control, and plan overview of the Emergency Response Plan (ERP) for [Lake Don Pedro Community Services District](#). *Note that the ERP Activation process is described in Section 5.0.*

## 1.1 Purpose

The purpose of this ERP is to provide [Lake Don Pedro Community Services District](#) with a standardized response and recovery protocol to prevent, minimize, and mitigate injury and damage resulting from emergencies or disasters of man-made or natural origin.

The ERP also describes how [Lake Don Pedro Community Services District](#) will respond to potential threats or actual terrorist scenarios identified in the vulnerability assessment (VA), as well as additional emergency response situations. Included in this ERP are specific action plans (APs) that will be used to respond to events and incidents.

## 1.2 Goals

The goals of this ERP are to:

- Rapidly restore water service after an emergency.
- Ensure adequate water supply for fire suppression.
- Minimize water system damage.
- Minimize impact and loss to customers.
- Minimize negative impacts on public health and employee safety.
- Provide emergency public information concerning customer service.

## 1.3 Requirement

This ERP has been designed to comply with Section 1433(b) of the Safe Drinking Water Act (SDWA) as amended by the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Public Law 107-188, Title IV – Drinking Water Security and Safety), California Government Code Section 8607.2 – Public Water System Plans, California Health and Safety Code, Sections 116460, 116555 and 116750, and California Waterworks Standards, Section 64560.

[Lake Don Pedro Community Services District](#) has provided the required certification to the United States Environmental Protection Agency (USEPA) that this emergency response plan incorporates the results of the VA completed for the system and includes plans, procedures, and identification of equipment that can be implemented or used in the event of a terrorist attack on the water system. [Lake Don Pedro Community Services District](#) has also provided a copy of the ERP to the local California Department of Health Services (CDHS) Drinking Water Field Operations Branch District Office.

Whenever the ERP is changed or updated, a revised copy, or the specific revised documents, will be sent to the CDHS District Office.

Guidance from the following documents is incorporated in this ERP:

- “California Emergency Response Plan Guidance” (CDHS, Version 1.0, December 2003).
- “Guidance for Water Utility Response, Recovery & Remediation Actions For Man-Made And / Or Technological Emergencies” (USEPA 810-R-02-001).
- “Large Water System Emergency Response Plan Outline: Guidance to Assist Community Water Systems in Complying with the Public Health Security and Bioterrorism Preparedness and Response Act of 2002” (USEPA 810-F-03-007, July 2003).
- “Response Protocol Toolbox: Planning for and Responding to Drinking Water Contamination Threats and Incidents” (USEPA-817-D-03-001 to 007, Interim Final – December 2003).
- “Small and Medium Water System Emergency Response Plan Guidance to Assist Community Water Systems in Complying with the Public Health Security and Bioterrorism Preparedness and Response Act of 2002.”
- “Emergency Planning Guidance Public and Private Water Utilities.” March 1999. California Office of Emergency Services (OES) and California Utilities Emergency Association.

## 1.4 Access Control

Because of the sensitive nature of the information contained in this ERP, an access control protocol has been established under the direction of the [Lake Don Pedro Community Services District Security Director GM](#). Distribution of the ERP is limited to those individuals directly involved in [Lake Don Pedro Community Services District’s](#) emergency planning and response activities. The ERP copies are numbered prior to distribution, and recipients are required to sign and date a statement that includes their ERP number and their agreement not to reproduce the ERP without permission from the [Lake Don Pedro Community Services District GM](#). A secure copy of the ERP is maintained in an off-premises location, known to [Lake Don Pedro Community Services District GM](#), in the event that the utility’s copies cannot be accessed.

## 1.5 Plan Overview

This ERP is organized into eight sections and appendices, as described below:

- Section 1.0: Introduction: Describes the purpose, goals, regulatory requirements, access control protocol, and overall organization of the ERP.
- Section 2.0: Emergency Planning Process Information: Describes [Lake Don Pedro Community Services District’s](#) emergency planning partnerships, mutual aid agreements, emergency response policies, procedures and documents, and summarizes the scenarios from the VA that are addressed in the ERP.

- Section 3.0: Water System Information: Provides specific information about [Lake Don Pedro Community Services District's](#) water system, identifies emergency resources, and identifies alternate and backup water sources.
- Section 4.0: SEMS/ICS Integration and Organization: Presents emergency response chain-of-command and information and describes how [Lake Don Pedro Community Services District](#) will use the Standardized Emergency Management System/Incident Command System (SEMS/ICS) system to manage emergencies.
- Section 5.0: Concept of Operations: Describes [Lake Don Pedro Community Services District's](#) policies, procedures, and plans to mitigate emergency incidents, including how threats may be received into the utility, ERP activation, response capabilities, personnel safety provisions, and protective action protocols.
- Section 6.0: Communications Procedures: Describes [Lake Don Pedro Community Services District's](#) chain of command and provides notification procedures and contact lists for internal and external contacts, including public notice procedures.
- Section 7.0: Water Quality Sampling: Includes information and procedures regarding water quality sampling procedures and equipment. Also provides information on available laboratory resources in California.
- Section 8.0: Emergency Response, Recovery, and Termination: Describes the three phases of an emergency: response, recovery, and termination. General actions and guidance is provided for each phase, and these procedures should be used in conjunction with the specific action plans in Appendix A.
- Section 9.0: Emergency Response Plan Approval, Update, Training, and Exercises: Describes the emergency response training program and the ERP review, approval, and update processes.
- Section 10.0: References and Links
- Appendices:
- A. Action Plans
  - B. System and Facility Information
  - C. Emergency Phone Lists
  - D. Public Notices and Press Releases
  - E. CA Statewide Emergency Notification Plan
  - F. Incident Reports and Forms
  - G. ERP Certification Form

# 2.0 Emergency Planning Process Information

This section presents the [Lake Don Pedro Community Services District](#) planning partnerships and discusses the relationship between this ERP and other [Lake Don Pedro Community Services District](#) related plans.

## 2.1 General Information

### 2.1.1 Planning Partnerships

[Lake Don Pedro Community Services District](#) has established emergency planning partnerships with other parties who have agreed to help the utility in an emergency situation. A list of these agencies and a brief description of their emergency capabilities is provided below.

Agency		Capability
Mariposa County OES	(209) 966-3615	Full Response Capabilities
Tuolumne County OES	(209) 533-5511	
Mariposa County Fire	(209) 966-3621	1) Fire Department Capabilities 2) Emergency Medical Technician 3) Paramedic Unit 4) Bomb Squad Unit 5) HAZMAT capabilities
Tuolumne County Fire	(209) 754-1187	
Mariposa County Sheriff	(209) 966-3614	
Tuolumne County Sheriff	(209) 533-5815	
Mariposa County Health	(209) 966-3689	
Tuolumne County Health	(209) 533-7400	
CDHS – Drinking Water Program (State Drinking Water Primacy Agency)		
	(559) 447-3300	
See Above Fire or OES		
Aqua Lab	(209) 586-3400	
List any Neighboring Water Utility(s) here		
No Utilities within 10 miles		
Regional Water Quality Control Board		
Central Valley Region	(916) 255-3000	
Amateur Radio Operators	N.A.	
Red Cross	(209) 523-6451	

In the event of an attack on the water system, some or all of these agencies, as well as other state and federal agencies, may be called upon for assistance. A complete list of emergency response agencies with their telephone contact numbers is provided in Section 6.3.3.

## 2.1.2 Mutual Aid Agreements

Due to the remote location of [Lake Don Pedro Community Services District](#), no mutual aid agreements have been established.

## 2.1.3 Relationship Between ERP and Other Plans

This ERP is intended to assist [Lake Don Pedro Community Services District's](#) managers and staff in responding to emergencies and malevolent acts (i.e., attacks) that affect the water system. The ERP is supplemented and referenced by the plans, procedures, policies and agreements shown in the table below

Document	Relationship to ERP
Risk Management Plan (RMP)	This document may contain responses to hazardous chemical releases, such as chlorine.
Identify applicable Material Safety Data Sheets (MSDS)	These are standard data sheets that may contain information regarding responses to specific chemical releases as well as a host of other useful information.
Identify the Water Sampling Plan	This document may provide useful information to support the contamination event stages evaluation as well as to provide information for the baseline analysis or provide conditions that are considered normal for your utility.
Identify the Water Sample Chain of Custody Procedures here	This document(s) may ensure that water samples are protected and properly handled so as to preclude contamination from the sampling process.

## 2.2 Disaster Events or Scenarios

Specific APs have been developed to address each of the high-risk threat scenarios identified in [Lake Don Pedro Community Services District's](#) vulnerability assessment. APs are tailored ERP actions that address specific major events. For security reasons, the procedures outlined in these documents are intentionally general in nature, omitting confidential details and effected assets. The specific APs are attached in the appendices following this main ERP document.

### 2.2.1 Natural Disasters

[Lake Don Pedro Community Services District](#) has considered the threats posed by natural events and weather-related phenomena. Specific AP(s) have been developed to guide a timely and prudent response should such threats be realized. These detailed APs are found in the attached appendices. Considered natural disasters include:

<b>Natural Disaster</b>	<b>Primary AP No.</b>	<b>Secondary AP No.</b>
Earthquakes	8C	
Floods	8A	
Winter Storm	8B	
Power Outage	7	

## 2.2.2 Events Caused by Human Intervention (Man-made Threats)

Lake Don Pedro Community Services District has developed specific AP documents, found in the appendices, to respond to the following threats that were identified in the vulnerability analysis:

<b>Event / Threat</b>	<b>Primary AP No.</b>	<b>Secondary AP No.</b>
Threat of Contamination to Water System	1A	1B
Confirmed Contamination to Water System	1C	1B
Structural Damage from Explosive Device	2	1A
Employee Assaulted with Weapon (Armed Intruder)	3	
SCADA System Intrusion	4	5
IT System Intrusion	5	4
Chemical Release	6	
Water Supply Interruption	9	
Bomb Threat	10A	10B, 10C

## 3.0 Water System Information

This section presents the core elements of the [Lake Don Pedro Community Services District ERP](#), including the system-specific information, roles and responsibilities in an emergency, communication procedures, personnel safety, identification of alternate water sources, emergency and chemical supplies, and property protection.

### 3.1 System Specific Information

This section contains the [Lake Don Pedro Community Services District Public Water System \(PWS\)](#) identification and emergency contacts, as well as basic information to describe the water system.

<b>System Identification Number</b>	5510008 DHS	
<b>System Name and Address</b>	Lake Don Pedro Community Services District 9751 Merced Falls Rd. LaGrange, CA 95329	
<b>Directions to System Office</b>	From Hwy132 turn right on Merced Falls Rd. 6 miles	
<b>Number of Service Connections/Population Served<sup>1</sup></b>	1,300 service connections	3,600 population <sup>1</sup>
<b>Type of Source</b>	Surface Water	Ground Water
<b>Interconnections and Purchased Water Agreements</b>	NA	NA
<b>Type of Treatment Provided</b>	Direct Filtration and disinfection using Sodium Hypochlorite, Ph adjustment using Caustic Soda.	
<b>Number of Storage Tanks</b>	2 Raw Water Tanks	9 Treated Water Tanks
<b>Average Water Demand</b>	340 gallons per minute (gpm)	
<b>Maximum and Peak Water Demand</b>	700 gpm maximum	650 gpm peak
<b>Emergency Contact Person(s)</b>	Bob Kent General Manager	(209) 852-2331 Office (209) 606-0578 Cell (209) 569-1903 Pager (209) 852-2571 Home Phone
	Plant Operations	(209) 852-2331 Office
<sup>1</sup> If population is unknown, estimate using a factor of 3.3 persons per service connection.		

## 3.2 General System Map/Service Area Map

The following maps and drawings of the [Lake Don Pedro Community Services District's](#) system are provided in Appendix B for reference.

3.2.1.1 Distribution System Map

3.2.1.2 Pressure Boundary Map

3.2.1.3 Process Flow Diagrams

3.2.1.4 SCADA System/Process Control Systems Operations

## 3.3 Critical System Components

Included below is an outline of system components deemed critical to operation of [Lake Don Pedro Community Services District](#). Information on the location of the asset is included, as well as descriptive information such as entry restrictions or special equipment or tool needs.

Asset	Location	Description
Intake	Intake structure at Barrett Cove, Lake McClure.  Raw Water supply Line	Primary-2 200 hp submersible pumps  Secondary-150hp float pump, 30,000 gal storage tank, 150hp booster pump  6± miles 18' steel pipe supply line
Treatment Plant	9751 Merced Falls Rd  La Grange, Ca. 95329	.6 mg Raw Water Storage pond sediment Basin,  2-30hp pumps, 2 Pressure Sand Filters, 2-20,000 gal chlorine contact tanks.

## 3.4 Identification of Alternate Water Sources

Ranchito Well, ground water, Capacity 100 gpm, Backup power/portable generator.

### 3.4.1 Alternate Raw Water Sources

[Lake Don Pedro CSD](#) has no other sources of raw water at this time. Other sources are being developed

### 3.4.2 Interconnects and Agreements with Other Utilities

There are currently no interconnects or agreements with other utilities.

### 3.4.3 Water Sources for Short-term Outages

Possible alternate water supply options for short-term outages include:

#### Short-term water supply options

- Local supermarket
- Local bottled water company

**Emergency water supply equipment sources**

- Local Suppliers, Rental Companies
- Food processing companies
- Industrial plants
- Military bases or installations

## 3.5 Emergency Water Supply calculations

### 3.5.1 Amount of Water Needed for Various Durations

Typical residential water usage in the United States is on the order of 300 to 500 gallons per residence per day, or 100 to 150 gallons per capita per day. Although these amounts can typically be significantly reduced during crisis situations, [Lake Don Pedro CSD](#) has found it useful to develop an estimate for the quantity of supplemental water required for a number of potential outage scenarios. These estimates are as follows:

Outage Period	Number of Customers (Service Connections) Affected	Quantity Needed
1 hour	100	1875 gallons
12 hours	100	22,500 gallons
1 day	100	45,000 gallons
2 days	100	90,000 gallons
1 week	100	315,000 gallons

### 3.5.2 Estimated Emergency Supply of Water

[Lake Don Pedro Community Services District](#) has estimated the amount of water storage available in the system under an emergency situation according to the following formula:

**Emergency supply of water = (amount of storage + backup/emergency supply) / (system demand)**

Calculations for [Lake Don Pedro CSD](#):

Amount of storage = 4,700,000 gallons

Backup/Emergency Supply = 0 gallons

System Demand = 340 gpm Average, 700 gpm Maximum

Emergency Supply = 9.5 days at Average Demand, 4.6 days at Max Demand

## 3.6 Emergency Equipment and Supplies

The equipment and chemical supplies that are arranged to respond to incidents are described in this section. In addition, the individual APs have specific equipment requirements.

### 3.6.1 Facility Emergency Equipment List

[Lake Don Pedro Community Services District](#) has identified additional sources of operational equipment and repair parts in excess of normal usage that can be used in the

event of an emergency situation. The decision regarding what type and quantity of additional equipment to have available is based on the results of the specific scenarios and critical assets identified in [Lake Don Pedro Community Services District](#) vulnerability assessment.

A list of equipment sources, including vendors, chemical suppliers, service contractors, and the equipment, materials and services that they provide is provided below.

<b>Equipment/Supply Description</b>	<b>Location</b>	<b>Specific Function &amp; Capability</b>	<b>Responsible Person/Title</b>	<b>Telephone Number</b>	<b>Inventory/ Restocking Frequency</b>
<b>Heavy Equipment:</b>					
Dump Trucks	United Rentals	Hauling		209-383-2984	NA
Skip Loaders	United Rentals	Loading/ Spreading		209-383-2984	NA
Backhoes	United Rentals	Digging/ Handling		209-383-2984	NA
Dozers	United Rentals	Spreading/ Covering		209-383-2984	NA
Water trucks	United Rentals	Delivery of Emergency Supply/ Clean-Up		209-383-2984	NA
<b>Communication Equipment:</b>				209-383-2984	
Portable Radios	Mobile Communications,	Communication		209-723-7721	NA
Radio Batteries	Mobile Communications, Inc.	Rental Service		209-723-7721	NA
<b>General Equipment:</b>					
Air Compressors	United Rentals	Tool Operation/ Pressure Testing		209-383-2984	NA
Generators	United Rentals	Emergency Power		209-383-2984	NA
Pumps	United Rentals	Emergency Pumping/ Dewatering		209-383-2984	NA
<b>Personnel Protective Equipment:</b>					
SCBA	Safe T Lite	Air Supply		209-522-8913	
Tyveks	Safe T Lite	Protection		209-522-8913	
Boots	Safe T Lite	Protection		209-522-8913	

Equipment/Supply Description	Location	Specific Function & Capability	Responsible Person/Title	Telephone Number	Inventory/ Restocking Frequency
Respirators	Safe T Lite	Protection		209-522-8913	
Gloves	Safe T Lite	Protection		209-522-8913	
<b>Bulk Supplies:</b>					
Sand	Corp Yard	Backfilling/ Covering			5 to 10 yards As Required

### 3.6.2 Personnel Protective and Other Emergency Equipment

Lake Don Pedro Community Services District has established written procedures for using and maintaining emergency response equipment. These procedures apply to any emergency equipment relevant to a response involving a toxic chemical, including all detection and monitoring equipment, alarms and communications systems, and personnel protective equipment not used as part of normal operations. Summary procedures are listed below:

- How and when to use the equipment properly.
- How and when the equipment should receive routine maintenance.
- How and when the equipment should be inspected and tested for readiness.
- Training requirements.

### 3.6.3 Telephone Equipment

Standard land-based telephones are potentially useful for communication during an emergency. Lake Don Pedro Community Services District in general during an emergency, use of telephones will be minimized. If employees see telephones off the hook they should hang them up. This will help the telephone company to restore service.

### 3.6.4 VHF Radio Communications

Lake Don Pedro Community Services District does not currently have any radio communication capabilities.

### 3.6.5 Citizen's Band Radio / Military Radios

It may be necessary to request assistance from CB radio operators or the military, if other systems are not available.

*List procedures for use of these radios here.*

Lake Don Pedro Community Services District is aware that CB and most readily-available military radios do not provide secure communication.

## 3.7 Property Protection

In the event of a real or potential malevolent event, the Water Utility Emergency Response Manager (WUERM) will make the determination as to what water system facilities should

be immediately “locked down,” including the implementation of specific access control procedures and the establishment of a security perimeter. The possibility of secondary malevolent events will be considered, given that the initial act may be diversionary.

[Lake Don Pedro Community Services District](#) personnel involved in an emergency response will take all necessary measures to protect potential evidence for law enforcement, should the event be declared a crime scene.

Specific lockdown procedures for each of [Lake Don Pedro Community Services District’s](#) major facilities are:

1. Intake and Treatment Plant, Secure all doors and Gates, posting of security personnel.
2. Tanks and Booster Sites, All gates are locked at all times, monitoring and posting of security personnel.

## 4.0 SEMS/ICS Integration and Organization

The Standardized Emergency Management System is the system required by Government Code §8607(a) for managing response to multi-agency and multi-jurisdiction emergencies in California.

### 4.1 Five Levels of SEMS

There are five designated levels in the SEMS organization, as shown below. When resources become depleted or are not available at the field or local level, requests for resources are moved up through these levels until they are filled.

The type and severity of the incident determines the extent of activation for each level.

**Field Response:** The Field Response Level is where the Incident Command System is applied. At this level, emergency response personnel and resources are managed under ICS to carry out tactical decisions and activities in direct response to an incident or threat.

**Local Government:** Local Government includes, Lake Don Pedro Community Services District, Mariposa County School District, Big Oak Flat Unified School District, and Mariposa County Public Works Department.

**Operational Area:** The Operational Area concept represents the intermediate level of the state's emergency organization, consisting of Mariposa and Tuolumne Counties and all political subdivisions, including water districts and other special districts, within the county area.

**Regional:** Because of its size and geography, the state of California has been divided into six mutual aid regions by the Governor's OES. In SEMS, the regional level manages and coordinates information and resources among operational areas within the mutual aid region and also between the operational areas and the state level.

**State:** The state level manages and coordinates state resources in response to the emergency needs of the other levels. This level manages and coordinates mutual aid among the mutual aid regions and between the regional and state levels. The state level also serves as the coordination and communication link between the state and federal disaster response system.

### 4.2 Five Principle Functions of SEMS

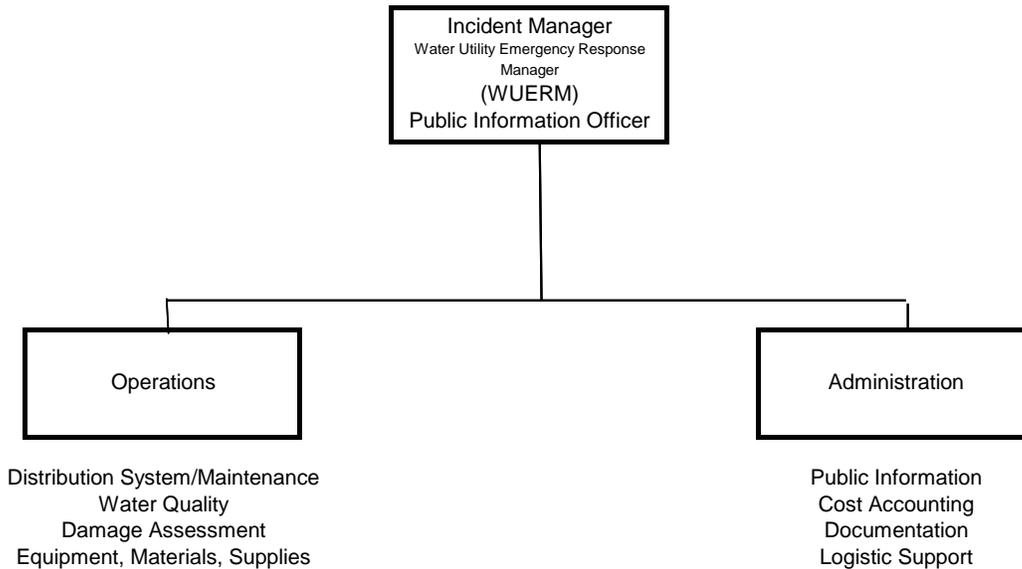

There are five principle functions within SEMS at each of the five organizational levels. They are Management ("Command" at the Field Level), Operations, Planning/Intelligence, Logistics, and Finance/Administration. These functions are modular in their design and can expand or contract depending on the needs of the incident.

A summary of the functions and the responsibilities of each section, as they relate to [Lake Don Pedro Community Services District's](#) Operations during an emergency, is provided in the table below.

Function	Responsibilities
Management	<ul style="list-style-type: none"> <li>• Serves as Command Staff and/or Incident Commander at the Field Level.</li> <li>• Directs Water System Emergency Operations Center (EOC).</li> <li>• Will Serve as WUERM.</li> </ul>
Operations	<ul style="list-style-type: none"> <li>• Responsible for management of all operations directly applicable to the primary mission.</li> <li>• Operations activates and supervises organizational elements in accordance with incident AP and directs execution of the AP.</li> <li>• Coordinates emergency response activities at the water utility EOC level.</li> <li>• Implements priorities established by management or Incident Command.</li> <li>• Field Coordinators <ul style="list-style-type: none"> <li>- Operations staff who are linked to water utility personnel at other fixed facilities or who are assigned to incidents within the water utility.</li> <li>- Receive and pass information up the chain of command.</li> <li>- Receive and coordinate requests for services and support.</li> </ul> </li> </ul>
Planning/Intelligence	<ul style="list-style-type: none"> <li>• Oversees the collection, evaluation, verification, and display of current information related to the emergency. <ul style="list-style-type: none"> <li>- Understand current situation.</li> <li>- Predict probable course of the incident events.</li> <li>- Prepare alternative strategies and control operations for the incident.</li> </ul> </li> <li>• Responsible for preparing action plans and maintaining documentation related to the emergency.</li> </ul>
Logistics	<ul style="list-style-type: none"> <li>• Provides facilities, services, and material in support of the Incident.</li> <li>• Oversees the acquisition, storing, and distribution of essential resources and support services needed to manage the emergency.</li> <li>• Tracks the status of resources.</li> <li>• Provides services to all field units in terms of obtaining and meeting their personnel, materials and equipment needs including communications.</li> </ul>
Finance/Administration	<ul style="list-style-type: none"> <li>• Responsible for all financial, administrative and cost analysis aspects of the incident.</li> <li>• Prepares vendor contracts, maintains records of expenditures for personnel and equipment, and maintains records and processes claims.</li> <li>• Provides preliminary estimates of damage costs and losses.</li> </ul>

### 4.3 Lake Don Pedro CSD Incident Command Structure

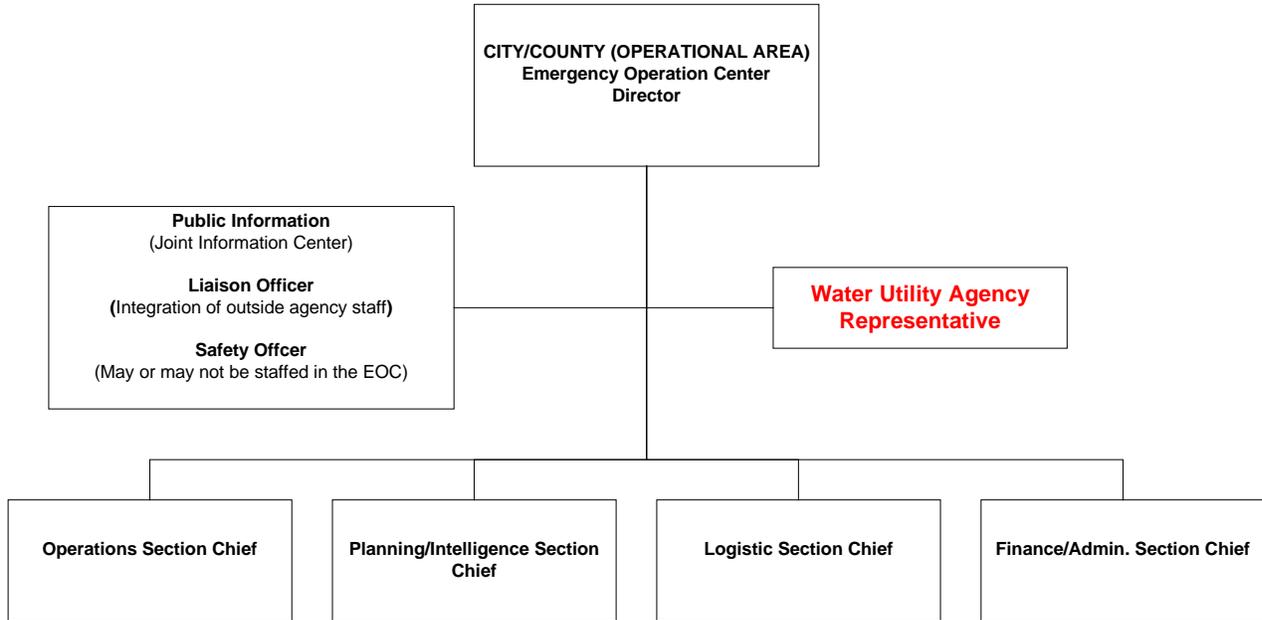

*The following graphics illustrate the expanding nature of the ICS and show model ICS structures that can be used during an emergency. The intent is for the command structure to be expanded and contracted as necessary to provide the best fit for a particular situation. This template includes three different command structures for different-sized utilities, and for different levels of emergencies. Choose the template or templates that work best for your utility and edit them as necessary. Individual's names can be added to the graphics to designate specific roles and responsibilities.*

**Section Leader Assignments**

<u>SECTION</u>	<u>PRIMARY</u>	<u>ALTERNATE</u>
Incident Manager	General Manager	Operations Supervisor
Operations	Operations Supervisor	Utility Operators
Administration	Accounts Clerk 3	Customer Service (UB Account Clerk)
<u>COMMAND STAFF</u>	<u>PRIMARY</u>	<u>ALTERNATE</u>

Unit Leader

Purchasing Unit Leader

Recovery Unit Leader

Water Utilities may be required to assign staff to the City or County (Operational Area) Emergency Operations Center (EOC) to coordinate with Public Health or any of the Sections that might need information or assistance. Typically, Water Utility Staff would report to the EOC as an **Agency Representative** and can move down, in the organization, to any of the sections as needed. Initially, the **Water Utility Agency Representative** would check in with the Liaison Officer, if one is not present, then he/she would report to the EOC Director.

## 4.4 Emergency Operations Center

### 4.4.1 EOC Description

Lake Don Pedro Community Services District's EOC is a pre-designated facility to coordinate the overall response and support to an emergency. The primary EOC is located at the *Operations Center, 9751 Merced Falls Rd. LaGrange, CA. 95329*

During an emergency situation, the EOC will:

- Establish an EOC Director to manage the Operations, Planning/Intelligence, Logistics, Finance/Administration Sections, and related sub-functions.
- Set priorities and develop APs.
- Coordinate and support all field-level incident activities within the utility service area.
- Gather, process, and report information within the utility service area and to other levels of SEMS.
- Coordinate with local government, operational areas, or regional EOCs as appropriate.
- Request resources from higher SEMS levels.

The EOC has sufficient communication equipment (phones, computer, two-way, etc.), copies of all engineering and operational plans and procedures for the [Lake Don Pedro Community Services District](#), chalk or white boards, and tables and chairs sufficient to meet the needs of any on-site emergency.

### 4.4.2 EOC Activation

In the event a credible or confirmed threat has been established, the [Lake Don Pedro Community Services District](#) staff will notify the General Manager (GM) or designated alternate. The GM or alternate should then make the decision to activate the EOC. Once the decision to activate the EOC has been made, subsequent notification to the [Local Government Agency](#) should be made to notify the agency of the threat and the activation of the [Lake Don Pedro Community Services District](#) EOC.

Based on the severity of the incident, the GM or designee may also recommend that the [Local Government](#) EOC be activated.

Once the [Local Government](#) has been notified of the threat and the [Lake Don Pedro Community Services District](#) EOC activation, the [Lake Don Pedro Community Services District](#) EOC designee should provide immediate, specific information to the relevant agencies by [phone, fax or e-mail](#) and be prepared to describe the magnitude and potential impact of the event on public health and safety. Updates on the actions of the [Lake Don Pedro Community Services District](#), as well as damages and recovery actions, should be provided regularly and consistently during the event.

# 5.0 Concept of Operations

---

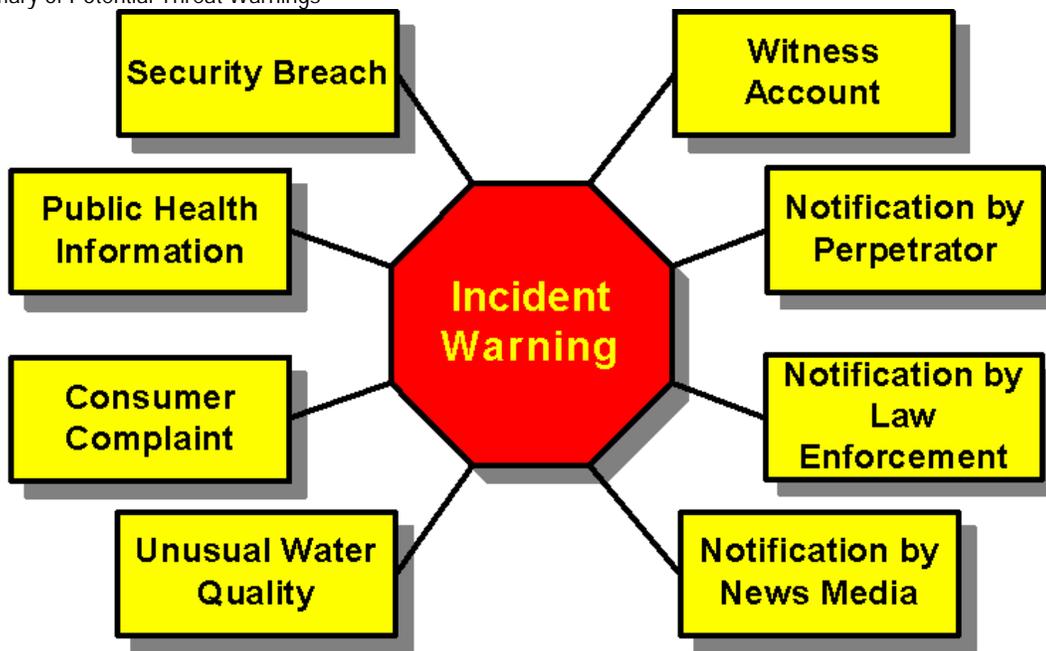

## 5.1 Decision Process

This section defines the decision process to be followed to determine if and when the ERP should be activated.

### 5.1.1 Threat Warning

The “threat warning” is the initial occurrence or discovery that triggers an evaluation of whether or not to activate the ERP. A description of the possible types of threat warnings that [Lake Don Pedro Community Services District](#) may encounter is provided below. If any of these conditions are met, then a Threat Warning will be issued by the [GM](#).

FIGURE 1  
Summary of Potential Threat Warnings

#### 5.1.1.1 Threat Warning Conditions

**Security Breach.** Physical security breaches caused by relaxed operations, such as unsecured doors or criminal acts such as trespassing, are probably the most common threat warnings.

**Witness Account.** Employees or neighbors may see suspicious activity, such as trespassing, breaking and entering, and other types of tampering, that they report to local law enforcement or water utility.

**Notification by Perpetrator.** A threat may be made directly to the water utility, either verbally or in writing. Historical incidents would indicate that verbal threats made over the phone are more likely than written threats.

**Notification by Law Enforcement.** [Lake Don Pedro Community Services District](#) may receive notification about a threat directly from law enforcement. Such a threat could be a result of a report of suspicious activity or gathered by law enforcement intelligence.

**Notification by News Media.** A threat to contaminate the water supply might be delivered to the news media, or the media may discover a threat. A conscientious reporter should immediately report such a threat to the police, and either the reporter or the police would immediately contact the water utility.

**Unusual Water Quality.** All unusual changes in water quality should be investigated. Results should be ruled out that can be explained by the analytical detection method or on-line monitoring system (*i.e.*, false positives/false negative, known interferences, instrument reliability) or results from a known cause (*e.g.*, overdosing of coagulant).

**Consumer Complaint.** An unexplained or unusually high incidence of consumer complaints about the aesthetic qualities of drinking water may indicate potential contamination. Many chemicals can impart a strong odor or taste to water, and some may discolor the water.

**Public Health Notification.** The first indication that contamination has occurred may be victims showing up in local emergency rooms and health clinics. An incident triggered by a public health notification is unique in that at least a segment of the population has been exposed to a harmful substance.

## 5.1.2 ERP Activation

Once a threat warning is issued by the [GM](#) or his/her designee, the threat decision process begins. The [WUERM](#) or designated alternate should immediately be notified since this person will be involved in this decision process.

The threat decision process is considered in three successive stages: “possible,” “credible,” and “confirmed.” As the threat escalates through these three stages, the actions that might be considered also change. The following table describes the stages, actions that will be taken, and activation of the ERP. The [WUERM](#) is responsible for working through the threat decision process and implementing the ERP as needed.

Decision Process Stage	Actions Taken	ERP Activation Level
Stage 1 Possible Threat	Evaluate available information. Review findings from VA. Determine if threat is possible. (Could something have actually happened?)	Implement precautionary response actions.

Decision Process Stage	Actions Taken	ERP Activation Level
Stage 2 Credible Threat	Determine that threat is credible by establishing corroborating information.  Highly credible source.  Health department/customer reports.  Unusual monitoring results.	Activate portions of ERP.  <ul style="list-style-type: none"> <li>Initiate internal and external notifications.</li> <li>Issue public health advisories.</li> <li>Initiate water sampling and analysis.</li> </ul> Consider partial or full activation of <a href="#">LDPCSD EOC</a> .
Stage 3 Confirmed Major Event	Confirm threat by verifying definitive evidence and information that establishes the major event.  Perform water sampling and analysis.	Fully implement ERP.  Immediately initiate appropriate APs.  Fully activate <a href="#">LDPCSD EOC</a> .

## 5.2 Response Capability Identified in the Water System VA

This section describes the response capabilities for [Lake Don Pedro Community Services District](#) that were identified in the water system VA.

Response Type	Title	Description
Procedures	Emergency Operating Procedures	A set of procedures that define employee responses to specific types of emergency events.
Procedures	Coordination with Local Police Force	An agreement with local law enforcement units regarding the support the utility can expect from the agency and the type of training and support the utility will provide to responding police agencies.
Communication	Public Address or Other Warning System	Used to notify people within a facility of an incident. Should a building or entire facility need to be evacuated, it is important to have a means by which everyone can be notified.
Mitigation	Fire Brigade at the Plant	Training and equipping a group of first responders from the plant population.

## 5.3 Personnel Safety

The safety of [Lake Don Pedro Community Services District](#) staff, emergency responders, and the public is paramount during an emergency. This section provides basic safety information and procedures to be followed in an emergency, including a toxic or potentially toxic release of chlorine or other chemical agents from a water treatment plant. Additional information regarding proper procedures during and after a chemical release can be found

in [Lake Don Pedro Community Services District's Risk Management Plan](#) and in the associated AP. This section will cover Facility Protective Actions, Personnel Accountability, Public Notification for Protective Actions, and Emergency First Aid procedures.

### 5.3.1 Facility Protective Actions

Facility protective actions include sheltering-in-place, evacuation, and a combination of the two. When determining the appropriate protective action decision, the [Lake Don Pedro Community Services District GM](#) or designee will carefully consider:

- If a hazardous material is involved, its characteristics, amount, release rate, physical state, ambient temperature, and location
- The employees at risk and the capability and resources to recommend a protective action.
- The time factors involved in the emergency and their effect on the selected protective action.
- The effect of the present and predicted meteorological conditions (on the control of the hazardous material, storm warnings, flood stage level, etc.) and the feasibility of the protective actions.
- The capability to communicate with both the employees at risk and emergency response personnel before, during, and after the emergency.
- The capabilities and resources of the facility to implement, control, monitor, and terminate the protective action.

#### 5.3.1.1 Evacuations

- Facility evacuation should follow the pre-designated evacuation routes from buildings and plant grounds as shown in Appendix B.
- These evacuation routes are posted at the entrance to all buildings and within employee break areas.
- If an evacuation is ordered by the [GM](#), all employees shall report to the pre-designated assembly areas shown on the evacuation plans to be accounted for by the pre-designated individual.
- Supervisors are responsible to assure their disabled employees are provided with adequate assistance during the evacuation.

#### 5.3.1.2 Sheltering-in-place

- Sheltering in place should occur in the pre-designated facilities and locations as described in Section 5.5.1 and as shown in Appendix B.
- Locations should be equipped with emergency medical supplies and provisions.

### 5.3.2 Personnel Accountability

- All designated assembly areas are indicated on the facility evacuation plans.
- All personnel are responsible to report to their designated assembly area.
- Designated individuals are responsible to assure all personnel have reported after an ordered evacuation.
- Personnel who are not accounted for at the assembly area must be reported to the GM to assure a proper response is coordinated. This response may include checking with other assembly areas, radio communication, or organization of a formal search.
- No search of a contaminated area should be performed unless all rescue personnel are fully equipped and trained for the expected hazards.

### 5.3.3 Off-site Protective Actions

Some hazardous materials hazards have the potential to affect off-site personnel and the local response agency may request support in making protective action decisions for the general public surrounding your facility.

Lake Don Pedro Community Services District will respond to requests from the local agencies for recommendations, or protective actions for the general population surrounding the facility.

### 5.3.4 First Aid and Emergency Medical Treatment

- Call 911 for medical assistance.
- Assure emergency medical care is provided to injured persons, as necessary until off-site medical personnel arrive.
- If trained, provide emergency first aid for victims of heart attack, strokes, severe bleeding, and shock.
- GM will designate personnel to coordinate off-site ambulance and medical assistance.
- Victims may need to be decontaminated if the emergency involves hazardous material.
- Control the scene to avoid further spread of contamination.
- Obtain accurate information on the health hazards of the material from Local Emergency Response Team, Safety Officer, MSDSs, or the Poison Control Center.
- Determine if there is a risk of secondary contamination to personnel or emergency transport vehicles/hospitals.
- If needed, follow your pre-determined decontamination protocol, which should include removing wet or exposed clothing, flushing affected skin and hair with water, and using soap or shampoo for oily substances.

- Provide post-emergency medical evaluation as required by Occupational Safety and Health Administration (OSHA).

## 5.4 Protective Action Protocols

The protocols that [Lake Don Pedro Community Services District](#) uses for sheltering-in-place and for evacuation are described below.

### 5.4.1 Sheltering-in-Place Protocol

Evacuation during emergency incidents is sometimes, but by no means always, necessary. The emergency situation can escalate so rapidly that there would be no time to evacuate personnel. For hazardous weather conditions, a prudent course of action, for the protection of the potentially-affected employees/personnel, would be to remain inside with the doors and windows closed.

The [GM](#) is responsible for determining whether sheltering-in-place is the most appropriate response to protect the vulnerable employees. If the decision is to shelter-in-place, then the affected employees will be advised to follow these guidelines to reduce the chance of being injured:

- Provide information on the procedure to employees and visitors on the facility public address system. If the information is provided to a local agency at their request, it should be coordinated through the Facility EOC.
- Close all doors to the outside and close and lock the windows.
- Inform staff to assemble at the operations center.
- Close as many internal doors as possible.
- If an outdoor explosion is possible, close drapes, curtains, and shades over windows, stay away from windows to prevent potential injury from flying glass.

### 5.4.2 Evacuation Procedures

This evacuation procedure identifies the areas to be evacuated, as well as the warnings and instructions to personnel that must be provided. The assembly and shelter locations are identified in the posted facility evacuation plan.

#### 5.4.2.1 Evacuation Areas

The evacuated areas may be expanded by the on-site or off-site [Incident Commander](#). An incident resulting in off-site consequences (hazardous materials incident) shall determine evacuation requirements in conjunction with appropriate external agencies.

Decisions on evacuation are incident-specific and must be made at the time of incident. Estimated vulnerable zones that may be provided with the incident specific checklists should be used for planning purposes only and should not be used preemptorily in an emergency response situation.

### 5.4.2.2 Evacuation Warning and Instruction

Once the area to be evacuated has been identified, it is necessary to inform employees that they must evacuate:

- **Facility Personnel**
  - Public address system: Using either voice and/or tones that are pre-established and exercised evacuation routes and procedures.
  - Person-to-person: Not very rapid but can be very thorough.
  - Combination of both public address and person-to-person.
- **General Public (Responsibility of Local Public Responders)**

Although protective actions for the general public are the responsibility of the [Local Government](#) this information may be helpful if you are requested to provide recommendations to the local [Incident Commander](#):

- Door-to-door: Requires significant personnel and is a slow process but is very thorough.
- Public address system (from a mobile unit or within a building): Requires fewer personnel than door-to-door and is quicker to accomplish but is not as thorough.
- Combination of Door-to Door and Public Address system: Dependent on the area to be evacuated a combination of methods of instruction may be warranted.

The method used to accomplish the evacuation will be determined by the [Incident Commander](#) and will be incident and site-specific. The evacuees should be told to report to their designated assembly areas and wait for further instructions.

## 5.4.3 Evacuee Assembly Areas

Evacuee assembly areas must be pre-designated for each area of the facility. Depending upon the conditions and requirements for the particular emergency, the [Incident Commander](#) may move or modify assembly area locations. The locations of the Evacuee Assembly Areas are:

- Parking lot at the operations center.
- Outside locations at remaining facilities

Each manager/supervisor /designated person shall be responsible for head counts, assembly security and safety and will communicate with the [Incident Commander](#) to obtain support for various needs, such as food, water, medical aid, or transportation.

## 5.4.4 Shelter Locations

As necessary, the [Incident Commander](#) will select the most appropriate shelter from pre-identified shelter locations from the following list:

- Administration Office

- Treatment Plant
- Board Room

Once the shelter location has been determined, the shelter information will be disseminated to:

- Incident site personnel.
- Assembly area personnel.
- EOC, if activated.
- Responders on-site: for example, the communications coordinator, Emergency responders, etc.

Once the facility employees are notified to evacuate they will proceed to their designated shelter.

The Emergency responders will be notified of the shelter locations and be provided with information on any injuries or the type of hazardous material and any known exposures.

Once an area is evacuated, the GM or designee must secure the area. Security personnel operating in or around an evacuated area must not be located in a hazardous or potentially hazardous area that would necessitate the use of personnel protective clothing or place them in an unsafe condition.

# 6.0 Communication Procedures

---

In general, communications during an emergency response will proceed along the chain of command of the SEMS/ICS. The number of people notified will increase as the incident expands and decrease as the incident contracts toward its conclusion.

The type and extent of the disaster will dictate the normal and/or alternative methods of communication that will be used. The possibility of a coordinated attack that targets the water, power, and communications systems must be considered. In this case, it would be reasonable to assume that some methods of communication will either be unavailable or limited to certain areas during an emergency. It is anticipated that employees will know upon arrival at their duty stations which communication systems are functional and which are not. This information should be relayed to the [Lake Don Pedro Community Services District Information Officer](#) upon discovery.

[Lake Don Pedro Community Services District](#) uses the ICS for its command structure during water emergencies. The table below describes the ICS command structure positions and shows which individuals will hold the various positions during different emergency situations (recognizing that at different stages of an event or for different severity of events that the person/position responsible in the ICS changes).

## 6.1 Lake Don Pedro Community Services District Chain of Command

[Lake Don Pedro Community Services District](#) Primary Position Descriptions and Assignments

Name and Title	Responsibilities during an Emergency	Contact Numbers
Bob Kent, General Manager Incident Commander	Sets incident objectives and priorities.  Responsible for management of incident.  Coordinates all emergency response activities between agencies.  Communicates with all participants including those outside water utility.	Office: (209) 852-2331 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571
Bob Kent, General Manager Water Utility Emergency Response Manager	Overall management and decision making for the water system.  WUERM is lead for managing the emergency and contacting the regulatory agencies.  All communications to external parties are approved by the WUERM.	Office: (209) 852-2331 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571

Lake Don Pedro Community Services District Primary Position Descriptions and Assignments

Name and Title	Responsibilities during an Emergency	Contact Numbers
Ed Erisman, Utility Worker Alternate WUERM	Takes over for primary WUERM if primary WUERM is unavailable.	Office: (209) 852-2331 Home: (209) 852-9217
Bob Kent, General Manager Water Utility Emergency Operations Center Manager (WUOCM)	Heads water utility's EOC.  Provides operational and resource management during an emergency.	Office: (209) 852-2331 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571
Bob Kent, General Manager Public Information Officer PIO	Member of the command staff and reports directly to the Incident Commander.  Interfaces with media and disseminates public information.  Plans the information strategy.	Office: (209) 852-2331 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571
Bob Kent, General Manager Liaison Officer	Member of the command staff  On-scene contact for representatives from other agencies.	Office: (209) 852-2331 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571
Bob Kent, General Manager Safety Officer	Develops and recommends measures for assuring personnel safety.  Assess and anticipates hazardous and unsafe conditions.	Office: (209) 852-2331 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571
Kim Topie, Accounts Clerk 3 Office Administrator	Responsible for administrative functions in the office.  Receives customer phone calls and maintains a log of complaints and calls.  In an emergency, could provide a standard carefully pre-scripted message for customers who call with general questions.	Office: (209) 852-2331 Cell: (209) 613-1311 Home: (209) 852-9138
Bob Kent, General Manager Technical Specialist Water Quality Manager	In charge of collecting samples, having samples analyzed by certified labs, receiving the results.  Determines the quality of the water being served meets all drinking water and public health requirements.	Office: (209) 852-2331 Pager: (209) 579-6819 Cell: (209) 606-0578 Pager: (209) 569-1903 Home: (209) 852-2571
On Call Operator Technical Specialist Water Treatment Plant (WTP) Operator	In charge of running water treatment plant.  Performs inspections, maintenance, sampling of the WTP and relaying critical information to the WUERM.  Assess WTP facilities and treatment provided and provides recommendations to the WUERM.	Office: (209) 852-2331 Pager: (209) 579-6819

Lake Don Pedro Community Services District Primary Position Descriptions and Assignments

Name and Title	Responsibilities during an Emergency	Contact Numbers
On Call Operator Technical Specialist Water System Operator	In charge of operating the water system.  Performs inspections, maintenance, sampling of the system and relaying critical information to the WUERM.  Assess facilities and provides recommendations to the WUERM.	Office: (209) 852-2331 Pager: (209) 579-6819
On Call Operator Technical Specialist Field Staff	Delivers water quality notices or door hangers.  Provides backup to water system operator.  Conducts site inspections of all facilities.	Office: (209) 852-2331 Pager: (209) 579-6819

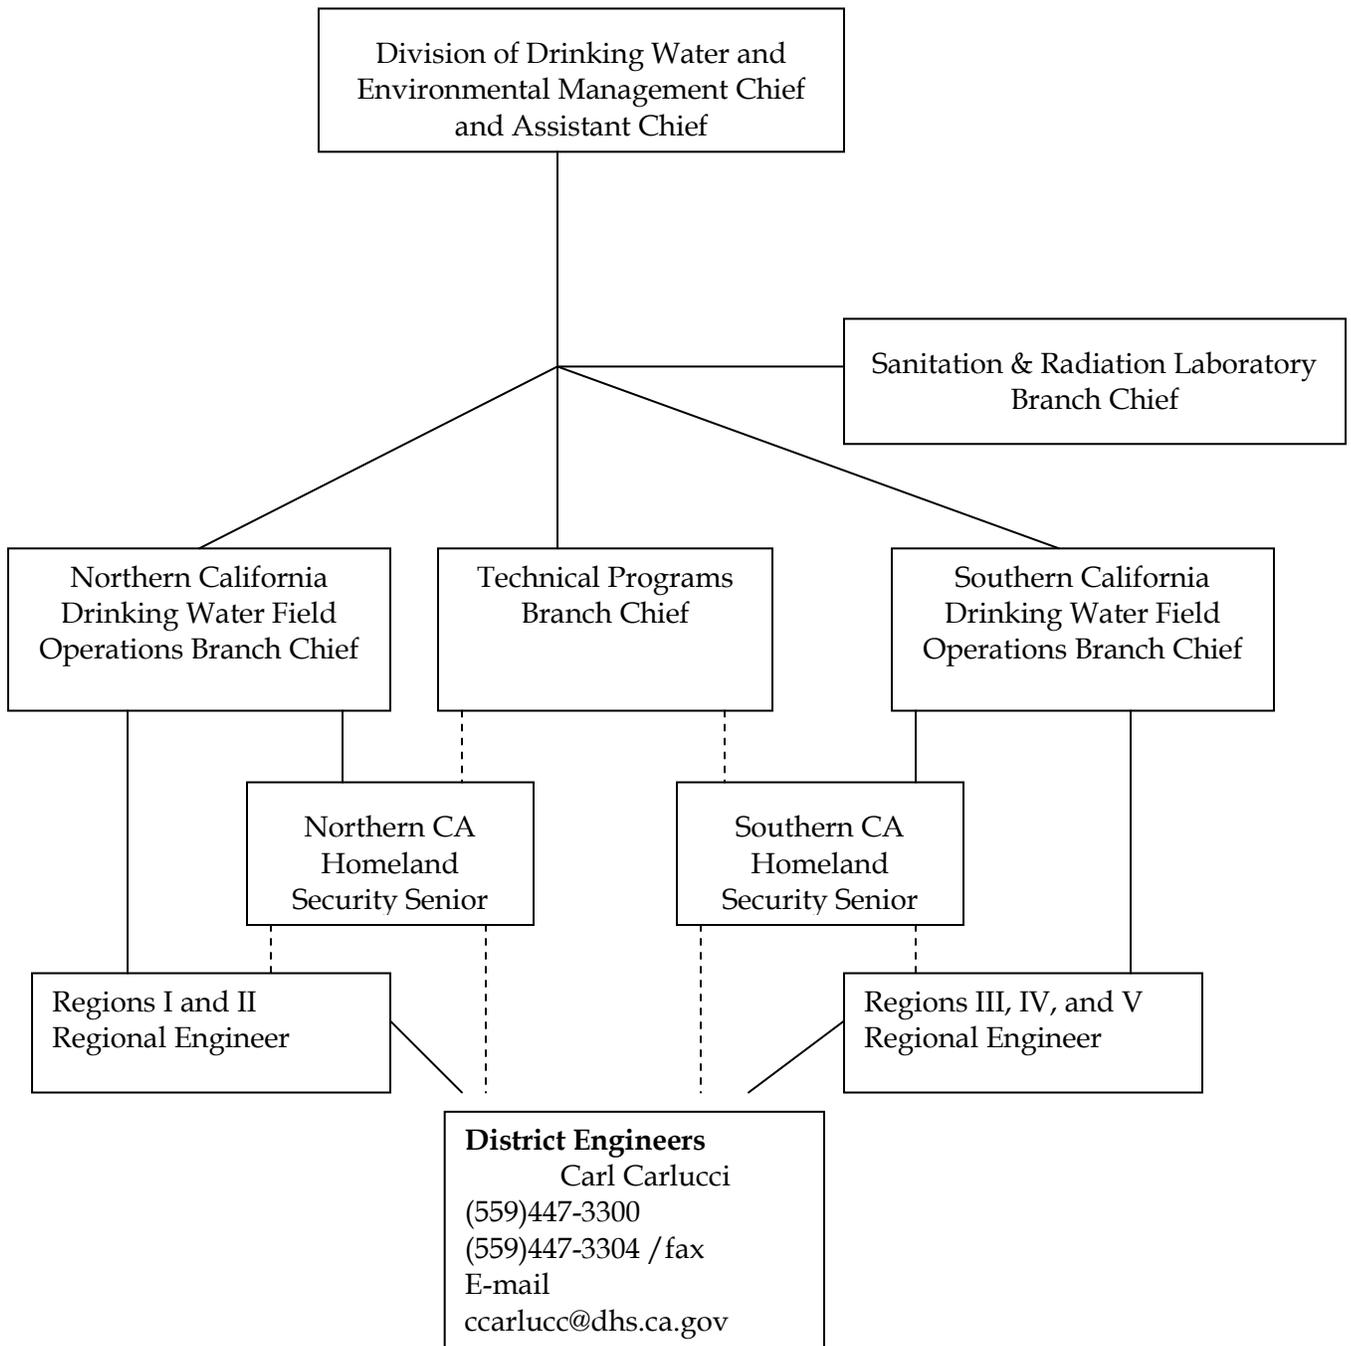

## 6.2 Drinking Water Field Operation Branch – Chain of Command

The primary contact for the [Lake Don Pedro Community Services District](#) during any emergency is the District Engineer. [Lake Don Pedro Community Services District](#) will contact the District Engineer in the event of any emergency.

From the District Engineer, authority moves up the line to the Regional Engineer, Branch Chiefs, Assistant Division Chief, to finally the Chief of the Division.

*The following flow chart shows the chain of command structure within the California Department of Health Services Drinking Water Program (DWP). The CDHS DWP Web site has a map showing all the contact information for each District Office and District Engineer. <http://www.dhs.ca.gov/ps/ddwem/technical/dwp/dwpindex.htm>. The figure can be modified to show your utility's command structure, and you can add names and contact numbers from the CDHS DWP Web site.*

6.3

## Notification Procedures

### 6.3.1 Initial Notifications

First Responders (911): If the situation is an emergency that needs response from local fire, law enforcement, medical or HAZMAT team, calling 911 should be the first immediate call.

Lake Don Pedro Community Services District is aware that if the water system staff calls 911 from a cell phone, then the call is routed to the nearest California Highway Patrol Office, which may be in another city or county, and not in the immediate local 911 area. Direct phone numbers have been obtained from local first responders for the different 911 areas that are served by Lake Don Pedro Community Services District. These numbers are shown in the Table C-1 in Appendix C.

### 6.3.2 Internal Contact List

The contact information in Table C-2 in Appendix C represents the network of Lake Don Pedro Community Services District personnel and serves as the primary means of contacting internal staff.

If it becomes necessary to contact the staff member's family or emergency contact, the GM will have primary responsibility for making the notification.

### 6.3.3 External Contact List

Tables C-3, C-4, C-5, C-6, and C-7 in Appendix C contain contact information for the local and national agencies that Lake Don Pedro Community Services District may need to notify. The WUERM will make the decision as to which of these agencies needs to be notified, and at what point in the threat evaluation the calls should be made. The GM will serve as the water utility point of contact for these agencies.

In addition to the External Contact List in Appendix C, Lake Don Pedro Community Services District maintains an Emergency Notification Plan (Appendix E) that includes day and evening phone numbers for the CDHS District Engineer and/or staff, CA State OES, and County Personnel. The Notification Plan also includes procedures for notifying the affected service area, and it is updated whenever there is a personnel change.

Note: Each PWS in California can obtain a specific Emergency Notification Plan form from their CDHS District Engineer. It is typically mailed/e-mailed with the Annual Reports and has current contact information for the CDHS DE, district staff and County Personnel.

### 6.3.4 Additional Information on State of California Agencies

The initial notification response to any emergency should be to call 911 for the needed first responder and then to the CDHS DWP. The CDHS DWP is the Drinking Water Primacy Agency in California and has regulatory jurisdiction over all public water systems in the state.

Contact to the CDHS DWP should be to their District Engineer. If the water system is unable to contact the District Engineer (or one of their staff), the water system should use the California OES Warning Center Phone Number: 1-800-852-7550, which is a 24/7 phone number. A second phone number for the OES Warning Center is 916-845-8911.

A duty officer will answer the California OES Warning Center phone call and refer to statewide emergency phone numbers. In order to assist the duty officer-it will expedite response if you request the CDHS duty officer. The CDHS duty officer will then call management staff in the DWP to respond to the emergency.

The District Engineer will be able to assist [Lake Don Pedro Community Services District](#) with:

- Inspections of water treatment plants, storage facilities, and watersheds (chemical contamination, sewage spills, erosion, and drainage diversions).
- Water quality sampling.
- Consulting with water system staff/operators.
- Providing technical assistance.
- Documenting the disaster's effect on the water system through photographs and reports.
- Keeping local officials advised of the current drinking water situation.
- Review plans and specifications for reconstruction projects, and issue amended permits as needed.
- Laboratory sampling analysis.

### 6.3.5 Critical Customers Contact List

In addition to the agencies listed in the previous tables in Appendix C, Table C-8 in Appendix C contains contact information for [Lake Don Pedro Community Services District](#)'s Critical Care Customers (Primary Notification) and Large Water Users (Secondary Notification). The [WUERM](#) will decide whether to notify some or all of these customers in the event of an emergency involving the water system.

[Lake Don Pedro Community Services District](#)'s Water Quality Emergency Notification Plan, as required under Section 116460, California Health and Safety Code, is included in Appendix E of this ERP.

### 6.3.6 Contact Information for Fire-fighting Water Alternate Sources

If the water becomes contaminated with substances that render it unsafe to be used for fire-fighting, then an order will be issued to discontinue use of the affected fire hydrants. Alternate sources for fire-fighting water are shown in Table C-9 in Appendix C.

### 6.3.7 Contact Information for Bulk and Bottled Water Suppliers

Lake Don Pedro Community Services District has identified agencies and private companies as shown in Table C-10 in Appendix C that could provide water supplies (bottled or bulk) in the event of an incident.

## 6.4 Public Notice Procedures

### 6.4.1 Media Notification

Effective communication with the public is a key element of this ERP. Lake Don Pedro Community Services District personnel have been instructed to direct all media questions or information requests related to an emergency situation to Lake Don Pedro Community Services District's GM. The GM is the official spokesperson for Lake Don Pedro Community Services District and is the only Lake Don Pedro Community Services District employee who is authorized to speak directly to public media representatives.

Table C-11 in Appendix C provides contact information for the various media agencies that Lake Don Pedro Community Services District GM might use to disseminate information to the public.

### 6.4.2 Public Notification

A Boil Water Order (BWO), Unsafe Water Alert (UWA), or Do Not Drink Notice can be issued by one, or a combination of the following agencies:

- CDHS DWP. Designated personnel: District Engineer, Regional Engineer or Branch Chief.
- Local County Health Department. Designated personnel: County Health Officer or Director of Environmental Health Department for small water systems under county jurisdiction.
- Affected Water System. Designated personnel: responsible person in charge of the affected water system (i.e., Director of Water Quality, Manager, Director of Water Department, Director of Public Works, Owner, etc.).

*NOTE: If the water system feels the event/circumstance requires IMMEDIATE issuance of a BWO/UWA and that public health is in serious risk, they may issue a BWO/UWA without first contacting the CDHS District Engineer. If that is the case, the water system must notify CDHS, the County Health Officer and the Environmental County Health Department immediately after issuing a BWO/UWA. Usually a water system will not issue a public notice without the approval (or advisement/guidance from CDHS) as they do not want to take on the sole responsibility for the public notice. In that sense CDHS, will partner with the water system to make the public health decision whether to issue a BWO/UWA or not.*

In the event that a BWO, UWA, or Do Not Drink Notice is issued by Lake Don Pedro Community Services District, the GM is the person who has the authority to issue the public notice.

Lake Don Pedro Community Services District will ensure that all public notifications (BWO, UWA, or Do Not Drink Notices) will be coordinated with the CDHS District Engineer, County Environmental Health Department, and the County Public Health Officer prior to issuing a public notice.

Lake Don Pedro Community Services District will notify the CDHS District Engineer, the County Environmental Health Department and the County Public Health Officer prior to or immediately after issuing a public notice. Notice must be given to a person rather than a message left on voicemail. Table C-12 in Appendix C shows the primary, 1<sup>st</sup> Alternate and 2<sup>nd</sup> Alternate contacts for the County Public Health Officer and the County Environmental Health Department.

Lake Don Pedro Community Services District has prepared a series of public notices and press releases for use during various emergency situations in accordance with CDHS guidance. These notices can be found in Appendix D.

A summary of each of the notices, including guidance on when to issue each of them, is provided below.

**Consumer Alert During Water Outages or Periods of Low Pressure:** If the water system is experiencing power outages, water outages, or low-pressure problems, a consumer alert may be issued to the public. The notice provides consumers information on conserving water and how to treat the water with household bleach if the water quality is questionable.

**BWO:** A BWO should be issued when minimum bacteriological water quality standards cannot be reasonably assured. To assure public health protection a BWO should be issued as soon as it is concluded by the designated personnel that the water supply is or may be biologically unsafe. Examples of these situations include:

1. Biological contamination of water supply system, including but not limited to:
  - Positive total or fecal coli form bacteriological samples.
  - Prolonged water outages in areas of ruptured sewer and/or water mains.
  - Failed septic tank systems in close proximity to ruptured water mains.
  - Ruptured water treatment, storage, and/or distribution facilities in areas of known sewage spills.
  - Known biological contamination.
  - Cross-connection contamination problems.
  - Illness attributed to water supply.
2. Unusual system characteristics, including but not limited to:
  - Prolonged loss of pressure.
  - Sudden loss of chlorine residual.
  - Severe discoloration and odor.

- Inability to implement emergency chlorination.

### 3. Implemented due to treatment inadequacies.

**UWA/Do Not Drink:** In the event a water quality emergency due to known or suspected chemical (non-bacteriological) contamination to the water system a UWA or Do Not Drink should be issued. Water should not be used for drinking and cooking, but may be used for sanitation purposes. Examples of these situations include:

1. Known or suspected widespread chemical or hazardous contamination in water supply distribution, including but not limited to:
  - Ruptured water distribution system (storage tanks, mains) in area of known chemical spill coupled with loss of pressure.
  - Severe odor and discoloration.
  - Loss of chlorine residual.
  - Inability of existing water treatment process to neutralize chemical contaminants prior to entering the distribution system.
2. Threatened or suspected acts of sabotage confirmed by analytical results, including but not limited to:
  - Suspected contamination triggered by acts of sabotage or vandalism.
3. Emergency use of an unapproved source to provide a supplemental water supply.

**UWA/Do Not Use:** In the event a known or suspected contamination event occurs to the water system, where the contaminate may be chemical, biological, or radiological, a UWA or Do Not Use should be issued. Water should not be used for drinking, cooking, or sanitation purposes. Examples of these situations include:

1. Known or suspected widespread chemical or hazardous contamination in water supply distribution, including but not limited to:
  - Terrorist contamination event.

## 6.5 Cancellation of Public Notification

Once a BWO/UWA is issued, the only agency that can rescind the public notice is the drinking water primacy agency.

CDHS DWP will not lift the BWO until two rounds, collected one day apart, of coli form bacteria samples have been analyzed and the results are negative. [Lake Don Pedro Community Services District](#) will fax two sets of sample results to the CDHS DWP District Office for final approval before rescinding the BWO.

Special chemical sampling will be required to rescind an UWA. [Lake Don Pedro Community Services District](#) will contact the CDHS DWP District Office to determine required sampling.

# 7.0 Water Quality Sampling

---

***NOTE:** Laboratory protocols and procedures identified in Section 7.0 are still under development by federal and state Agencies. Water utilities are encouraged to customize this section to reflect the laboratory resources that are currently available, and to update this section as new information becomes available. Some utilities will rely primarily on the local HAZMAT team, health department, or emergency management agency to collect and analyze samples during a contamination threat or incident. If that is the case for your utility, completion of Section 7.8 should be sufficient water quality sampling information for your ERP.*

During an emergency, there are several types of water quality sampling that may need to be analyzed depending on the actual event. If it is natural disaster, flood or power outage, sampling will probably only include bacteriological samples, turbidity and chlorine residual samples if the system is chlorinated. However, if the event is a terrorist act or contamination event, the sampling will include a full scan of Weapons of Mass Destruction (WMD) chemical, radiological, and microbiological (unless the actual contaminant used is known).

## 7.1 Laboratory Resources

In general there are four different types or ownership of laboratory facilities in California that can analyze drinking water samples, which are listed below:

1. Commercial/private laboratories
2. County Public Health Laboratories
3. State Department of Health Services Laboratories
4. Research Facility/Specialty Laboratories

In general, laboratories are grouped into two broad categories: chemical or biological. Chemical laboratories include general environmental chemistry laboratories, radiological laboratories, and specialty laboratories that may be able to handle and analyze exotic contaminants, such as chemical weapons and radionuclides. Biological laboratories include environmental microbiology laboratories and the Laboratory Response Network (LRN) that typically analyze clinical samples for pathogens and select biotoxins.

## 7.2 CDHS Laboratory

The CDHS Sanitation and Radiation Laboratories Branch (SRLB) is organized within the Division of Drinking Water and Environmental Management. SRLB is the State's primary drinking water quality testing laboratory and is the only State laboratory capable of measuring environmental radiation. Its primary mission is to provide analytical services, reference measurements and technical support pertaining to the State's Drinking Water and Radiological Health Programs.

SRLB has two laboratories: the Southern California Section is located in Los Angeles and performs microbiological, inorganic and organic testing in various water matrices; the Northern California Section, located in Richmond, carries out inorganic and organic analyses in water, and radiochemical testing in various environmental matrices in addition to water. The SRLB in conjunction with the CDHS Microbial Disease Laboratory (MDL) does microbiological analyses including biotoxins.

## 7.3 California Mutual Aid Laboratory Network

The CDHS SRLB—in conjunction with the water utilities, USEPA Region 9 laboratory in Richmond, Lawrence Livermore National Laboratory, and the California Department of Water Resources—have formed a laboratory network, the California Mutual Aid Laboratory Network (CAMAL Net), to address laboratory capacity issues associated with possible drinking water-related contamination events. CAMAL Net establishes a triage system to process samples when water systems or commercial laboratory methods are not available or the water system lacks capacity within their own lab. The CAMAL Net system will not handle any samples where field screening indicates that the sample may contain a Center for Disease Control (CDC)-listed WMD agent. The list of WMD agents can be found on the CDC Web page at <http://www.bt.cdc.gov/>. Any request for analysis through the CAMAL Net system needs to be approved by the CDHS DWP District Engineer in [Lake Don Pedro Community Services District's](#) jurisdiction prior to collection of water quality samples to be processed.

## 7.4 Chemical Analysis Classification

The CDHS, along with its stakeholders and federal partners, are in the process of developing an algorithm to assist California water systems, public health agencies, law enforcement, and first responders with the identification of possible chemical agents in drinking water contamination events. A draft version has been developed, and it is anticipated that a final version will be released in the near future. The final version will become an appendix to this ERP.

## 7.5 Biological Analysis Classification

The LRN for Bioterrorism has ranked laboratories (Level A, B, C or D) based on the type of safety procedures they practice.

- Level A Lab uses a Class II biosafety lab (BSL) cabinet.
- Level B Lab is a BSL-2 facility + BSL-3 safety practices.
- Level C Lab is a BSL-3 facility.
- Level D Lab is a BSL-4 facility.
- Level A Labs are used to rule out and forward organisms.
- Level B Labs are used for limited confirmation and transport.
- Level C Labs are used for molecular assays and reference capacity.
- Level D Labs are used for the highest level of characterization.

Currently, in California there are 28 Level A labs, 10 Level B labs, and two Level C labs. The two Level C laboratories are the Los Angeles County Public Health Laboratory in Los Angeles, California and the CDHS MDL in Richmond, California. Lawrence Livermore National Laboratory is also a Level C laboratory, but access to that lab is restricted. The only Level D laboratories available in the LRN are the national laboratories, such as those at the CDC and the Department of Defense. These laboratories test and characterize samples that pose challenges beyond the capabilities of the Level A, B, and C reference labs and provide support for other LRN members during a serious outbreak or terrorist event. The most dangerous or perplexing pathogens are handled only at the Bio-Safety Level 4 laboratories at CDC and the United States Army Medical Research Institute of Infectious Diseases.

## 7.6 Natural Disaster

During a natural disaster, flood, earthquake, fire etc., sample collection and analysis will be available to [Lake Don Pedro Community Services District](#) by the normal laboratory resources. Sampling will primarily consist of regulatory bacteriological samples and turbidity to show that the system has been flushed out. [Lake Don Pedro Community Services District](#) may also be collect chlorine residual samples throughout the system with a field chlorine test kit.

## 7.7 Terrorist Event/Contamination Event

Once a threat warning has occurred and [Lake Don Pedro Community Services District](#) has deemed the threat confirmed, it will be necessary to collect water quality samples. The decisions made from the time of the threat warning to the time the threat is confirmed is specific to each individual event. This “credibility stage” may take between 2 and 8 hours and should involve consultation with local first responders, CDHS DWP (Drinking Water Primacy Agency), local Health Department, and the regional Federal Bureau of Investigation (FBI) office. For more detail on sampling during various stages of threat confirmation, see Action Plans 1A, 1B, and 1C.

Assuming the threat is credible enough to warrant water quality sampling, several state and federal agencies are involved to collect samples, transport the samples to appropriate laboratory, and analyze the samples.

[Lake Don Pedro Community Services District](#)’s first step in this process will be to contact the CDHS District Engineer so the utility can notify the CDHS-SRLB of the incoming samples. The following steps are described in more detail below:

- Emergency Water Quality Sampling Kit (EWQSK)
- Sample Collection
- Laboratory Required for Analysis
- Sample Transport
- Sample Analysis

## 7.7.1 Emergency Water Quality Sampling Kit

The original sample kit was developed by the Metropolitan Water District of Southern California to be used during a terrorist or contamination event. USEPA reviewed the sample kit and provided a list of the sample bottles in the USEPA Toolbox. The CAMAL Net has also reviewed this kit and made some minor changes that will allow water quality samples to be collected under all conditions. The CAMAL Net version of the sample kit has been finalized for deployment. This kit will continue to evolve as the USEPA develops sampling protocols for these new constituents in drinking water. The estimated cost of one kit is approximately \$200.

CDHS DWP will purchase the supplies to create enough EWQSK to supply 2-3 in each DWP District Office. If water systems do not want to purchase and maintain their own kits, then the DWP will provide one of these kits in the event of an emergency. Requests for these kits should be made to the District Engineer when the water system reports the incident. Travel time from the District Office to the water system should be incorporated in the water system's emergency response plan.

Lake Don Pedro Community Services District's EWQSK contains sample bottles need for chemical, radiological, and microbiological analysis that can be split into three complete sample sets. A complete list of the EWQSK contents is provided in Appendix B. The EWQSK should remain sealed before the sample is collected. Since some of the sample bottles contain reagents that expire, the bottles in each kit are replaced annually.

## 7.7.2 Sample Collection

Several types of samples may need to be collected depending on the event. Sampling protocol includes:

- [Lake Don Pedro Community Services District](#) will collect samples for public health to determine if the water is safe for consumption using the EWQSK for public health.
- [Lake Don Pedro Community Services District](#) will assist the FBI as requested to collect samples for the crime scene investigation.
- [Lake Don Pedro Community Services District](#) will also provide assistance as requested to responding agencies such as local HAZMAT, FBI, California National Guard Civilian Support Team (CST), or USEPA.
- Proper personal protection material will be used at all times to minimize exposure to any possible agent, and all personnel involved in sampling activities will be properly trained.

### 7.7.3 Laboratory

Depending on the results of the field screening and actual event, the required laboratories will be notified and prepared to accept the samples. If an EWQSK (supplied by [Lake Don Pedro Community Services District](#) or CDHS DWP) is used, the CAMAL Net and the LRN will be notified and involved in the process for laboratory selection. The first step in this process is for the District Engineer working with [Lake Don Pedro Community Services District](#) to contact SRLB.

### 7.7.4 Sample Transport

Depending on the responding agencies and field screening results, the ICS will decide how the samples will be transported to the appropriate lab. Since the samples may be used for the crime investigation, proper chain-of-custody must be maintained. The possible agencies, depending on the event, are local HAZMAT teams, CHP, FBI, CST, or USEPA.

### 7.7.5 Sample Analysis

Once the samples are delivered to the appropriate laboratory, they may be split for analysis to different laboratories. The CDHS SRLB laboratory will handle the transport and laboratory testing protocols. Sample results will be shared through the ICS. Sample analysis may take days to weeks to complete depending on the complexity of analysis.

## 7.8 Lake Don Pedro Community Services District Water Sampling and Monitoring Procedures

The [Lake Don Pedro Community Services District](#) will have the primary responsibility for all water sampling and monitoring activities during an actual or potential contamination event. The [Lake Don Pedro Community Services District GM/Operations Supervisor](#) will provide technical support and advice to the local emergency management agency or HAZMAT team as needed throughout the incident.

The [GM/Operations Supervisor](#) will also play a key role in the interpretation and communication of monitoring or lab results and will consult directly with the [WUERM](#) on significant findings.

Specific information and procedures regarding water sampling and monitoring is included the following table:

The [Lake Don Pedro Community Services District](#) laboratory has the following analytical capabilities:

Chlorine Residual, Ph, Turbidity, Hardness.

If outside laboratory assistance is needed, [Lake Don Pedro Community Services District](#) will contact the following laboratory facilities:

Outside Laboratory Name	Contact Number	Capabilities
Aqua Lab Water Analysis Twain Harte, CA 95383	(209) 586-3400	General Lab Analysis

---

# 8.0 Emergency Response, Recovery, and Termination

---

## 8.1 Response Phase

### 8.1.1 Initial Response

When a situation occurs that is judged to be of an emergency, “out of the ordinary,” or of a suspicious nature, the person who first notices the situation should determine whether an immediate response by police, fire, or emergency medical services is necessary. If so, immediately call 911 to report the incident. Next, report the incident to your supervisor.

General information to be reported from [Lake Don Pedro Community Services District](#) facilities (or incident sites) includes:

- What has happened?
- What can be done about it?
- What is needed?
- An assessment of whether the situation calls for activation of the [Lake Don Pedro Community Services District’s EOC](#).

Additionally, immediate specific information should include the status of [Lake Don Pedro Community Services District’s](#):

- Personnel
- Equipment
- Vehicles
- Communications capabilities
- Facilities

The employee who first noticed the incident and the Supervisor that responded should:

1. Notify the [WUERM](#) or the [Alternate WUERM](#) as soon as possible.
2. Remain in a safe location in the vicinity to meet and assist medical, fire, and police personnel and other first responders as necessary.

### 8.1.2 Damage Assessment

Damage assessment is used to determine the extent of damage, estimate repair or replacement costs, and identify the resources needed to return the damaged system to full operation. This assessment is accomplished during the emergency response phase of the event, before the recovery phase is implemented.

The [WUERM](#) is responsible for establishing a Damage Assessment Team.

The [Lake Don Pedro Community Services District](#) Damage Assessment Team will be led by Operations Supervisor or other designated person, may/will consult with District's Engineering Firm. Team composition may vary, however, depending upon the nature and extent of the emergency.

Damage assessment procedures should follow the guidelines established for system operability checks and determination of operability/serviceability. At a minimum, the damage assessment team will:

- Conduct an initial analysis of the extent of damage to the system or facility.
- Estimate the repairs required to restore the system or facility; the estimate should consider supplies, equipment, rental of specialized equipment (e.g., cranes), and additional staffing needs.
- Provide this estimate to the procurement representative for a cost estimate to conduct repairs.

Appendix F contains a damage assessment form that can be used for all [Lake Don Pedro Community Services District](#) facilities.

## 8.2 Recovery phase

### 8.2.1 Recovery Planning

During emergency response operations, the [GM](#) or [WUERM](#) will appoint/act as Recovery Manager. The Recovery Manager is responsible for selecting a recovery team and developing a recovery strategy prior to emergency termination.

The [Lake Don Pedro Community Services District](#) Recovery Manager will be a senior operations representative familiar with the systems that may be affected by the emergency. He/she will have the responsibility and authority to coordinate recovery planning; authorize recovery activities; protect the health and safety of workers and the public; and initiate, change, or recommend protective actions. Additional responsibilities include:

- Facilitate the transition from emergency to recovery operations.
- Develop, implement, and maintain the Recovery Plan.
- Coordinate all vendor and contractor activities that occur on site.
- Ensure that the appropriate safety inspections have been completed.
- Coordinate the completion of emergency repairs and schedule permanent repairs.
- Notify key agencies of emergency repair status and the scheduled completion of system repairs.
- Complete permanent repair and/or replacement of system facilities.

- Release repaired facilities and equipment for normal use.
- Document all recovery activities.

The Recovery Manager determines the expertise and selects the personnel necessary for the recovery team. In general, the composition of the recovery team is based on the nature and extent of the emergency and includes:

- Technical advisors to the Recovery Manager, which may include external experts such as industrial hygienists or fire protection specialists.
- Utility personnel with the technical expertise to direct post-incident assessment activities and to analyze the results. Maintenance, operations, and engineering staff are expected to fill these positions.
- GM/PIO, who will respond to inquiries or concerns from employees, the public, the news media, and outside agencies. The GM/PIO should be prepared to provide information regarding the results of the incident investigation, the extent of on-site and off-site impacts, and the status of recovery operations.

## 8.2.2 Recovery Activities

The following activities will be directed by the Recovery Manager and will be executed by the recovery team as required following an incident or emergency situation.

- Notify all appropriate regulatory agencies that recovery phase is underway.
- Install warning signs, barriers, and shielding as needed.
- Take measures to protect workers and the public from hazardous exposures.
- Complete detailed evaluations of all affected water utility facilities and determine priorities for permanent repair, reconstruction, or replacement at existing or new locations.
- Begin repair activities design and make bids for contractor services.
- Make necessary repairs to the system and un-tag repaired facilities and equipment.
- Restore all telecommunications, data processing, and similar services to full operation.
- Complete assessment of losses and costs for repair and replacement, determine approximate reimbursements from insurance and other sources of financial assistance, and determine how residual costs will be financed by the water utility.
- Define needs for additional staff, initiate recruitment process, and adopt temporary emergency employment policies as necessary.
- Execute agreements with vendors to meet service and supply needs.
- Address needs for handling and disposing of any hazardous waste generated during recovery activities.

- Control discharges as a result of recovery activities within regulatory and environmental compliance limits.
- Reevaluate need for maintaining the emergency management organization; consider returning to the normal organizational structure, roles, and responsibilities when feasible.
- Collect cost accounting information gathered during the emergency and prepare request for Emergency Disaster Funds (follow FEMA and State OES requirements).
- Debrief staff to enhance response and recovery efforts in the future by identifying lessons learned, developing action plans and follow-up mechanisms, and providing employee assistance programs if needed.
- Prepare After-Action Reports as required. Complete reports within 6 months of the event (90 days for public utilities which are part of a city or county government.).

### 8.3 Termination and review phase

The Recovery Manager will officially terminate the recovery phase when normal operations are resumed at all facilities affected by the emergency. Termination and review actions include the following:

- Initiate permanent reconstruction of damaged water utility facilities and systems.
- Obtain inspections and/or certifications that may be required before facilities can be returned to service.
- Restore water utility operations and services to full pre-event levels.
- Determine how emergency equipment and consumable materials should be replenished, decontaminated, repaired or replaced.
- Identify operational changes that have occurred as a result of repair, restoration, or incident investigation.
- Document the recovery phase, and compile applicable records for permanent storage.
- Continue to maintain liaison as needed with external agencies.
- Update training programs, the [Lake Don Pedro Community Services District ERP](#), and standard operating procedures, as needed, based upon lessons learned during the emergency response and recovery phases of the event.

# 9.0 Emergency Plan Approval, Update, Training, and Exercises

---

This section of the ERP describes the plan review and approval process, the practice and update schedule, plan for assessment of the ERP effectiveness and training, exercises, and drills of the ERP.

## 9.1 Plan Review and Approval

The [Lake Don Pedro Community Services District](#) process for review and approval of the ERP is described in the sections below.

### 9.1.1 Utility Name Approval Authority

This plan is intended to be a living document that is reviewed regularly and updated as needed to ensure that the information it contains is correct. The ERP will be reviewed and approved by the [GM](#). The plan will undergo an initial review and approval process and will be reviewed and signed off by the [GM](#) after each revision. A revision log is found in the front of the ERP binder.

### 9.1.2 Local Government Approval

The plan will be submitted to the [County Office of Emergency Services \(Mariposa and Tuolumne\)](#) for initial review for coordination and consistency with the Counties emergency planning programs. The plan will be re-submitted at the time of any revisions.

## 9.2 Practice and Update Schedule

The schedule for training, updating, and review of the ERP is discussed below.

### 9.2.1 Schedule and Responsibility for Training and Exercises

A schedule for general security training and incident-specific exercises/drills for testing of the emergency response plan will be developed and reviewed annually.

The exercises, drills, and training sessions will be conducted annually or more frequently if the [GM](#) deems it necessary.

The [GM](#) will be responsible for the organization and management of the security-training program.

## 9.2.2 Schedule for ERP Review and Update

The [GM](#) will review and update the ERP and APs as follows:

- Annually prior to the annual ERP/AP training sessions.
- Upon update of the VA.
- Following the ERP exercises.
- Within 2 months of any significant plant modification or water system change.
- Immediately when there is a utility staff change where the staff member was named in the ERP.
- Immediately when there is a change in the roles and responsibilities of anyone involved in response activities.
- Immediately upon changes in internal and external contact information.

## 9.3 Assessment of ERP Effectiveness

To evaluate the effectiveness of the ERP and to ensure that procedures and practices developed under the ERP are adequate and are being implemented properly, the [Lake Don Pedro Community Services District](#) staff will perform audits of the program on a periodic basis.

One method of audit will be through exercises and drills. Members of [Lake Don Pedro Community Services District](#) management will act as observers during the exercises and will evaluate the staff's performance in responding to emergency incidents as well as the overall effectiveness of the ERP in accomplishing their goals. [Lake Don Pedro Community Services District](#) management will review the results of the evaluation, and the ERP and APs will be updated as appropriate to incorporate any lessons learned from the exercises.

The ERP program will also be discussed each time the VA is updated. At this time, [Lake Don Pedro Community Services District](#) management and staff will discuss the need to update or augment the ERP based on new information regarding threats or critical asset vulnerability.

The [GM](#) will maintain a file of ERP assessment and after-action reports.

## 9.4 Training, Exercises, and Drills

All [Lake Don Pedro Community Services District](#) personnel who may be required to respond to emergencies will receive initial and refresher training class on this ERP. The training will be conducted annually or when any of the following occurs:

- New employees are hired.
- Special emergency assignments are designated to operations staff.
- New equipment or materials are introduced.
- Procedures are updated or revised.

The training will consist of the following programs:

**Orientation Sessions:** The orientation sessions will include basic instruction and explanation of the ERP and AP procedures. Written tests may be used to ensure some level of comprehension by the attendees.

**Table Top Workshop:** Table top workshops involve developing scenarios that describe potential problems and providing certain information necessary to address the problems. Employees will be presented with a fabricated major event. Next they will verbally respond to a series of questions and then evaluate whether their responses match what is written in the ERP.

**Functional Exercises:** The functional exercise is designed to simulate a real major event. A team of simulators is trained to develop a realistic situation. By using a series of pre-scripted messages, the simulation team sends information in to personnel assigned to carry out the ERP procedures. Both the simulators and personnel responding to the simulation are focused on carrying out the procedures to test the validity of the ERP.

**Full-scale Drills:** Emergency response personnel and equipment are actually mobilized and moved to a scene. A problem is presented to the response personnel, and they respond as directed by the ERP and the [Incident Commander](#) or [WUERM](#) at the scene.

## 10.0 References and Links

---

The following is a list of references and Internet links that provide additional water system security and ERP information.

**California Department of Health Services Drinking Water Program:** CDHS DWP is the Drinking Water Primacy Agency for all California public water systems serving over 200 service connections. CDHS has published a guidance document to assist California public water systems in developing or revising their emergency response plans. General information, as well as the guidance document and its appendices, is available at <http://www.dhs.ca.gov/ps/ddwem/homeland/default.htm>.

**Department of Homeland Security (DHS):** DHS is the overall lead agency for homeland security issues. DHS will become involved in incident response if needed. General information is available at <http://www.dhs.gov/dhspublic>.

**United States Environmental Protection Agency:** USEPA has numerous resources available. The following are key sources:

- Water Infrastructure Security information, guidance, and training information can be found at <http://www.epa.gov/safewater/security/index.html>.
- Information on Local Emergency Planning Committees (LEPCs) can be found at <http://www.epa.gov/ceppo/lepclist.htm>.

**The Center for Disease Control and Prevention:** The CDC develops resources to assist hospital staff, clinics, and physicians in diagnosing diseases related to terrorism, reporting incidences of disease, and controlling the spread of infection. Information on emergency preparedness and response can be found at <http://www.bt.cdc.gov/>.

- To assist in the development of a Public Health Response Plan, the CDC published a planning guidance document entitled *The Public Health Response to Biological and Chemical Terrorism: Interim Planning Guidance for State Public Health Officials* (July 2001), which can be found at <http://www.bt.cdc.gov/Documents/Planning/PlanningGuidance.pdf>.
- *Interim Recommended Notification Procedures for Local and State Public Health Department Leaders in the Event of a Bioterrorist Incident* can be found at <http://www.bt.cdc.gov/EmContact/Protocols.asp>.

**Federal Emergency Management Agency (FEMA):** FEMA's mission is to reduce loss of life and property and protect our nation's critical infrastructure from all types of hazards through a comprehensive, risk-based, emergency management program of mitigation, preparedness, response and recovery. FEMA takes the lead if an incident is assigned to DHS. General information can be found at <http://www.fema.gov>. In addition, several online training courses relevant to emergency management are available on-line from FEMA at <http://training.fema.gov/EMIWeb/IS/crslist.asp>.

**The American Water Works Association (AWWA):** USEPA training developed through partnership with AWWA covers the entire spectrum of security issues including assessing vulnerabilities, emergency response plans, and risk communication. AWWA information can be accessed at <http://www.awwa.org>. Specific AWWA resources can be found at <http://www.awwa.org/communications/offer/secureresources.cfm>.

**The Association of State Drinking Water Administrators (ASDWA):** ASDWA has information on water security planning, training, and links to state programs and other information sources. Go to the security link at <http://www.asdwa.org/>.

**National Rural Water Association (NRWA):** NRWA developed the SEMS Software Program, which can be loaded on a personal computer. It is based on NRWA/ASDWA's *Security Vulnerability Self-Assessment Guide for Small Drinking Water Systems Serving Populations Between 3,300 and 10,000*. More information can be found at <http://www.nrwa.org/>.

**Agency for Toxic Substances and Disease Registry (ATSDR):** ATSDR is directed by [congressional mandate](#) to perform specific functions concerning the effect on public health of hazardous substances in the environment. These functions include public health assessments of waste sites, health consultations concerning specific hazardous substances, health surveillance and registries, response to emergency releases of hazardous substances, applied research in support of public health assessments, information development and dissemination, and education and training concerning hazardous substances. More information can be found at <http://www.atsdr.cdc.gov/>.

# Appendix A

## Action Plans

---

## AP 1A - Threat of or Actual Contamination to Water System POSSIBLE STAGE

<p><b>AP Summary:</b></p>	<p>This Action Plan applies to the intentional introduction of a contaminant into the water system. The contaminant could be introduced at any point within the system, including raw water, treatment facilities, distribution system including distribution pipes, finished water storage, or pump stations. The adversary may or may not give notice of the contaminant or provide the location. Contamination may have actually occurred or it may be a hoax.</p>	
<p><b>Initiation and Notification:</b></p>	<p>1. Initiate this AP if any of the following has occurred:</p> <p>Security Breach (including, for example):</p> <ul style="list-style-type: none"> <li>• Unsecured Doors</li> <li>• Open Hatches</li> <li>• Unlocked/Forced Gates</li> <li>• Alarm Triggered</li> </ul> <p>Witness Account (including, for example):</p> <ul style="list-style-type: none"> <li>• Suspicious Activity</li> <li>• Trespassing</li> <li>• Breaking and Entering</li> <li>• Tampering with Equipment or Property</li> </ul> <p>Direct Notification by Perpetrator (including, for example):</p> <ul style="list-style-type: none"> <li>• Verbal Threat</li> <li>• Threat in Writing</li> </ul> <p>Notification by Law Enforcement (including, for example):</p> <ul style="list-style-type: none"> <li>• Suspicious Activity</li> <li>• Threat made to Water System</li> </ul> <p>Notification by News Media (including, for example):</p> <ul style="list-style-type: none"> <li>• Threat Delivered to News Media</li> <li>• Media Discovers Threat</li> </ul> <p>Unusual Water Quality Parameters (including, for example):</p> <ul style="list-style-type: none"> <li>• Changes in pH, chlorine residual or turbidity</li> <li>• Unexpected monitoring or sampling results</li> <li>• Strange odor, color or appearance</li> </ul> <p>Customer Complaints (including, for example unexplained or unusually high complaints of):</p> <ul style="list-style-type: none"> <li>• Odor</li> <li>• Color or Appearance</li> <li>• Taste</li> </ul> <p>Public Health Notification (including, for example):</p> <ul style="list-style-type: none"> <li>• Victims in Emergency Rooms and/or Clinics</li> <li>• High Incidence of Similar Health Complaints in one Local Area</li> </ul>	<p><i>Use this AP if you receive any incident warning (see types of warnings to left) indicating possible contamination of your water system</i></p> <p><i>If you have evidence that corroborates the warning, or if collective information indicates that contamination is likely, <b>GO TO AP 1B – CREDIBLE STAGE.</b></i></p> <p><i>If there is confirmed evidence and/or definitive information that the water system has been contaminated. <b>GO TO AP 1C – CONFIRMED STAGE.</b></i></p>

<b>AP 1A - Threat of or Actual Contamination to Water System POSSIBLE STAGE</b>		
<b>Initiation and Notification:</b>	2. Notify <b>GM, WUERM or Designated Personnel</b> immediately upon discovery of any of the above Threat Warnings.	<i>The individual who first notices or receives the threat warning should contact the [WUERM] immediately by whatever means of communication may be available.</i>
<b>Equipment Identified:</b>	<b>Equipment</b> Test Kits, Chlorine Residual, Ph, Turbidity, Sample Bottles  <b>Location</b> Treatment Plant Lab	<i>This equipment is available to assist in the execution of this AP.</i>
<b>Specific Activities:</b>	Investigate site, Test for cl2 residual, Ph, at site.	
<b>I. Assess the Problem</b>	A. Complete the following <b>Threat Warning Report Forms</b> according to the type of Threat Warning received. (Section XX of ERP). <ul style="list-style-type: none"> <li>• <b>Security Incident Report Form</b></li> <li>• <b>Witness Account Report Form</b></li> <li>• <b>Phone Threat Report Form</b> (to be filled out during actual phone call)</li> <li>• <b>Written Threat Report Form</b></li> <li>• <b>Water Quality / Consumer Complaint Report Form</b></li> <li>• <b>Public Health Information Report Form</b></li> </ul> B. Complete <b>Threat Evaluation Worksheet</b> (Section XX of ERP). C. Evaluate <b>Threat Evaluation Worksheet</b> , and determine if threat is Possible. <p style="margin-left: 40px;">If YES, perform Response Steps 1 – 8 below.</p> <p style="margin-left: 40px;">If NO,</p> <ul style="list-style-type: none"> <li>i. Return to normal operations.</li> <li>ii. Document and record the threat for future reference.</li> </ul>	<i>Threat Warning Report Forms help document, organize and summarize information about a security incident. The individual who discovers the incident warning, the [WUERM], or another designated individual may complete the form. Only the form that corresponds to the type of threat warning needs to be completed. Completion of the form should not distract emergency responders from more urgent matters.</i>  <i>Threat Evaluation Worksheets help organize information about a threat warning that will be used during the Threat Evaluation Process. The individual responsible for conducting the Threat Evaluation (e.g., the [WUERM]) should complete this worksheet.</i>

<b>AP 1A - Threat of or Actual Contamination to Water System POSSIBLE STAGE</b>		
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>1. Notify local law enforcement.</li> <li>2. Notify State Drinking Water Agency.</li> <li>3. Do not disturb site if location could be possible crime scene. Consult <b>Maintaining Crime Scene Integrity</b> Form in Section XX.</li> <li>4. Alert staff and emergency response personnel about threat.</li> <li>5. Consider containment / isolation, elevating chlorination, and/or discharge of suspect water.</li> <li>6. Evaluate spread of suspect water and potential impact on public health.</li> </ol>	<p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p> <p><i>The immediate operational response actions are primarily intended to limit exposure of customers to potentially contaminated water.</i></p> <p><i>See EPA Toolbox Module 2, Section 3.3.2 for guidance on containing contaminants and evaluating movement of potentially contaminated water through distribution systems.</i></p>
<b>III. Monitoring</b>	<ol style="list-style-type: none"> <li>7. Initiate Site Characterization Activities: <ul style="list-style-type: none"> <li>• Define the investigation site.</li> <li>• Designate site characterization team members.</li> <li>• Conduct preliminary assessment of potential site hazards.</li> <li>• Approach site and conduct field safety screening to detect any hazards to the characterization team.</li> <li>• Search for physical evidence (discarded containers, etc.).</li> <li>• Investigate records from CCTV cameras.</li> <li>• Look for environmental indicators (dead animals or fish, dead vegetation, unusual odors or residues).</li> <li>• Perform rapid field testing of the water.</li> <li>• Collect water samples according to sampling plan.</li> </ul> </li> </ol>	<p><i>Site Characterization is intended to gather critical information to support the 'credible' stage of threat evaluation.</i></p> <p><i>If signs of a hazard are evident during the site approach, the team should halt their approach and immediately inform the [WUERM] of their findings. The site may then be turned over to the HAZMAT Team.</i></p> <p><i>The [WUERM] may determine the threat is credible based preliminary information before the site characterization has been completed.</i></p>
<b>IV. Recovery and Return to Safety</b>	<ol style="list-style-type: none"> <li>8. Determine if threat is credible. If YES, initiate AP 1B.</li> </ol>	<p><i>You should determine whether or not the threat is 'credible' <b>within 2 to 8 hours (preferably within 2 hours)</b> from the time the threat is deemed 'possible', depending on the effectiveness of the containment strategy.</i></p>

<b>AP 1A - Threat of or Actual Contamination to Water System POSSIBLE STAGE</b>		
	<p>If NO,</p> <ul style="list-style-type: none"> <li>• Return to normal operations.</li> <li>• Store water samples for 24 hours.</li> </ul>	<p><i>If the threat is not deemed 'credible', the samples obtained during site characterization should be stored in case the situation changes and analysis is determined to be necessary.</i></p>
<b>V. Report of Findings</b>	<p>9. File incident reports.</p>	<p><i>The Utility [Security Director] should file an internal report for the Utility's files, and also provide information as requested to Local Law Enforcement.</i></p>
<b>VI. AP-1A Revision Dates</b>		

<b>AP 1B - Threat of or Actual Contamination to Water System</b> <b>CREDIBLE STAGE</b>		
<b>AP Summary:</b>	This Action Plan applies to the intentional introduction of a contaminant into the water system. The contaminant could be introduced at any point within the system, including raw water, treatment facilities, distribution system including distribution pipes, finished water storage, or pump stations. The adversary may or may not give notice, identify the contaminant, or provide the location. Contamination may have actually occurred or it may be a hoax.	
<b>Initiation and Notification:</b>	<p>A. Initiate this AP if there is credible evidence that the water system has been contaminated:</p> <ul style="list-style-type: none"> <li>• Additional information collected during the investigation corroborates the threat warning.</li> <li>• Collective information indicates that contamination is likely.</li> <li>• Signs of contamination are observed during site characterization.</li> <li>• Additional water quality data shows unusual trends that are consistent with the initial data and corroborate the threat.</li> <li>• A pattern of customer complaints emerges.</li> <li>• Previous threats and incidents corroborate the current threat.</li> </ul> <p>B. Notify <b>GM, WUERM or Designated Personnel</b> immediately upon discovery of credible evidence of threat (if not already notified).</p> <p>C. Initiate ERP.</p> <p>D. Initiate partial or full activation of the Emergency Operations Center (EOC).</p> <p>Perform internal and external notifications according to ERP.</p>	<p><i>If there is confirmed evidence and/or definitive information that the water system has been contaminated, <b>GO TO AP 1C – CONFIRMED STAGE.</b></i></p> <p><i>The individual who first notices or receives the credible evidence should contact the <b>[WUERM]</b> immediately by whatever means of communication may be available.</i></p> <p><i>The <b>[WUERM]</b> will decide whether to initiate the ERP on a partial or full basis. The <b>[WUERM]</b> will also decide when and to what extent to activate the EOC.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p> <p><i>The <b>[Information Officer], [IO]</b> is the only one authorized to make notifications to outside agencies.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>Test Kits, Chlorine Residual, Ph, Turbidity, Sample Bottles</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>

<b>AP 1B - Threat of or Actual Contamination to Water System</b> <b>CREDIBLE STAGE</b>		
	<b>Location</b> Treatment Plant Lab	
<b>Specific Activities:</b>	Investigate site, Test for cl2 residual, Ph, at site.	
<b>I. Assess the Problem</b>	1. Assess results of previous sample analysis. 2. Perform additional site characterization at primary sites as needed. 3. Perform site characterization at any new investigation sites.	
<b>II. Isolate and Fix the Problem</b>	4. Perform actions to estimate the contaminated area and predict movement of contamination. 5. Take actions to isolate portions of system containing suspect water. <i>See</i> ERP Section XX for <b>System Shut Down Plan</b> . 6. Issue “Boil Water”, “Do not Drink”, or “Do not Use” orders and Press Releases as appropriate. <i>See</i> Section XX of ERP for <b>Press Release Forms</b> . 7. Initiate <b>Alternate Water Supply Plan</b> (ERP Section XX) to provide alternate water supply for customers and fire protection as necessary.	<i>The contaminated area can be estimated using hydraulic models, consumer complaints, public health agency reports, water quality data, or other available information. The estimate may define additional locations where site characterization should be performed</i>
<b>III. Monitoring</b>	8. Continue to monitor water quality in suspect parts of system by manual sampling, rapid field testing, or automated means.	
<b>IV. Recovery and Return to Safety</b>	9. Determine if threat is Confirmed.  If YES, Initiate AP 1C.	<i>It may take several days to collect sufficient evidence to confirm a contamination incident, depending on the type of information used for confirmation. (Some microbiological analytical procedures may take several days.)</i>

<b>AP 1B - Threat of or Actual Contamination to Water System</b> <b>CREDIBLE STAGE</b>		
	If NO, <ul style="list-style-type: none"> <li>• Verify that water is safe.</li> <li>• Notify public that water is safe.</li> <li>• Notify outside agencies that water is safe.</li> <li>• Return to normal operations.</li> <li>• Store water samples for 24 hours.</li> </ul>	<i>If the threat is not deemed 'confirmed', the samples obtained during site characterization should be stored in case the situation changes and an analysis is determined to be necessary.</i>
<b>V. Report of Findings</b>	E. File incident reports.	<i>The Utility GM should file an internal report for the Utility's files, and also provide information as requested to Local Law Enforcement and other outside agencies.</i>
<b>VI. AP-1B Revision Dates</b>		

<h2 style="margin: 0;">AP 1C - Contamination to Water System</h2> <h3 style="margin: 0;">CONFIRMED STAGE</h3>		
<p><b>AP Summary:</b></p>	<p>This Action Plan applies to the intentional introduction of a contaminant into the water system. The contaminant could be introduced at any point within the system, including raw water, treatment facilities, distribution system including distribution pipes, finished water storage, or pump stations. The adversary may or may not give notice, identify the contaminant, or provide the location. Contamination may have actually occurred or it may be a hoax.</p>	
<p><b>Initiation and Notification:</b></p>	<p>A. Initiate this AP if there is confirmed evidence that the water system has been contaminated:</p> <ol style="list-style-type: none"> <li>1. There is <b>analytical confirmation</b> of the presence of one or more contaminants in the water system.</li> <li>2. The <b>preponderance of the evidence</b> confirms that a contamination incident has occurred.                             <ul style="list-style-type: none"> <li>• There is a security breach with obvious signs of contamination along with unusual water quality and consumer complaints in the vicinity of the security breach.</li> <li>• Additional findings (laboratory analysis, field observations) of continued site characterization activities add to other credible evidence of contamination.</li> <li>• There is information from public health officials, area hospitals, or 911 call centers indicating a problem with the water supply.</li> <li>• Law enforcement agencies have discovered crucial evidence or apprehended a suspect that helps confirm that the water has been contaminated.</li> <li>• Specific information on a number of potential contaminants can be used in conjunction with other available</li> </ul> </li> </ol>	<p><i>If there is <b>no</b> confirmed evidence and no definitive information that the water system has been threatened or contaminated, <b>GO TO AP 1B – CREDIBLE STAGE.</b></i></p> <p><i>It may take several days to collect sufficient evidence to confirm a contamination incident, and the required time will depend on the type of information used for confirmation (some microbial analytical procedures may take several days).</i></p>

<b>AP 1C - Contamination to Water System</b>		
<b>CONFIRMED STAGE</b>		
	information to narrow down the number of contaminant candidates.	
<b>Initiation and Notification:</b>	<p>B. Notify <b>GM, WUERM or Designated Personnel</b> immediately upon discovery of confirmed evidence of contamination (if not already notified).</p> <p>C. Initiate full ERP activation.</p> <p>D. Initiate full activation of Emergency Operations Center (EOC).</p> <p>E. Engage other organization as needed (drinking water primacy agency, public health agency, response agencies, law enforcement).</p> <p>F. Perform internal and external notifications according to ERP.</p>	<p><i>The individual who first becomes aware of the confirmed evidence should contact the [WUERM] immediately by whatever means of communication may be available.</i></p> <p><i>The [WUERM] will decide whether to initiate the ERP on a partial or full basis. The [WUERM] will also decide when and to what extent to activate the EOC.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p> <p><i>The [Information Officer], [IO], should make the notifications to the outside agencies.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>Test Kits, Chlorine Residual, Ph, Turbidity, Sample Bottles</p> <p><b>Location</b></p> <p>Treatment Plant Lab</p>	<i>This equipment is available to assist in the execution of this AP.</i>
<b>Specific Activities:</b>	Investigate site, Test for cl2 residual, Ph, at site.	
<b>I. Assess the Problem</b>	<p>1. Assess results of previous sample analysis and attempt to identify the contaminant.</p> <p>2. Confirm the identity of the contaminant.</p>	<i>Effective implementation of response actions depends on positive identification of the contaminant and knowledge of contaminant properties, including public health protection strategies and selection of treatment technologies.</i>
	3. Perform a full characterization of the contaminated area, including contaminant properties, contaminant concentration profiles, and characteristics of the impacted area.	<i>If information from site characterization activities indicates that the contaminant impacts water quality in a certain manner (i.e., consumes free chlorine or imparts a certain odor to the water), the contaminant specific information may facilitate tentative identification of a contaminant and determine</i>

<b>AP 1C - Contamination to Water System</b> <b>CONFIRMED STAGE</b>		
<b>I. Assess the Problem</b>	4. Evaluate the likely direction and extent of future movement of the contaminant within the distribution system.  5. Evaluate all available information about the contamination incident	<i>the analytical approach that should be used to positively identify the specific contaminant. Sources of contaminant information include:</i>  <a href="http://www.bt.cdc.gov/agent/agentlistchem.asp">http://www.bt.cdc.gov/agent/agentlistchem.asp</a>  <a href="http://www.cdc.gov/atsdr/index.html">http://www.cdc.gov/atsdr/index.html</a>  <a href="http://www.waterisac.org/">http://www.waterisac.org/</a>  <i>EPA Water Contaminant Information Tool (WCIT) – under development</i>
<b>II. Isolate and Fix the Problem</b>	6. Take actions to isolate portions of system containing suspect water. See ERP Section XX for <b>System Shut Down Plan</b> .  7. Shut down system if obvious or confirmed contamination warrants.  8. Issue “Boil Water”, “Do not Drink”, or “Do not Use” orders and Press Releases as appropriate. See Section XX of ERP for <b>Press Release Forms</b> .  9. Initiate <b>Alternate Water Supply Plan</b> (ERP Section XX) to provide alternate water supply for customers and fire protection as necessary.  10. Revise public health response measures and public notifications as necessary.	<i>The contaminated area can be estimated using hydraulic modes, consumer complaints, public health agency reports, water quality data, or other available information. The estimate may define additional locations where site characterization should be performed.</i>
<b>III. Monitoring</b>	11. Continue sampling and analysis to monitor the status and extent of the contamination, and to verify that containment strategies are working.	
<b>IV. Recovery and Return to Safety</b>	12. Consult with appropriate officials to develop a Remediation and Recovery Plan. <ul style="list-style-type: none"> <li>a. Evaluate options for treating contaminated water and rehabilitating system components.</li> <li>b. Select treatment and rehabilitation technology/approach.</li> </ul>	<i>Remediation and recovery activities will likely be planned and implemented by a number of agencies. The first step of the process is to establish the roles and responsibilities of each organization</i>  <i>The samples obtained during site characterization and monitoring should be stored in case the situation changes and further analysis is determined to be necessary.</i>

<b>AP 1C - Contamination to Water System</b> <b>CONFIRMED STAGE</b>		
	<ul style="list-style-type: none"> <li>c. Develop strategy for disposal of contaminated residuals.</li> <li>d. Develop sampling and analysis plan to verify remediation.</li> <li>e. Develop communications and public relations plan.</li> </ul> <p>13. Implement Remediation and Recovery Plan.</p> <ul style="list-style-type: none"> <li>a. Verify that water is safe by performing additional sampling and analysis to confirm the progress of system treatment and remediation.</li> <li>b. Notify public that water is safe.</li> <li>c. Notify outside agencies that water is safe.</li> <li>d. Return to normal operations.</li> <li>e. Store water samples for (<i>enter predetermined time period here</i>).</li> </ul>	
<b>V. Report of Findings</b>	G. File incident reports with internal and external agencies as required.	<i>The Utility <b>GM</b> should file an internal report for the Utility's files, and also provide information as requested to outside agencies.</i>
<b>VI. AP-1C Revision Dates</b>		

## AP 2 - Structural Damage from Explosive Device

<p><b>AP Summary:</b></p>	<p>This Action Plan applies to an incident where intentional structural damage has occurred to the water system as a result of an explosive device. The assumed intent of the explosion is to disrupt normal system operations any point within the system, including raw water, treatment, finished water storage, or the distribution network.</p>	
<p><b>Initiation and Notification:</b></p>	<p>A. Initiate this AP if it appears that an explosive device has caused damage, or has the potential to cause damage to one or more components of the water system. The event will begin with an “incident discovery” which may come to <b>LDPCSD</b> by one (or more) of the following:</p> <ul style="list-style-type: none"> <li>• Security Equipment</li> <li>• Employee Discovery</li> <li>• Witness Account of Explosion</li> <li>• Notification By Adversary</li> <li>• Notification by Fire Department</li> <li>• Notification By Law Enforcement</li> <li>• Notification By News Media</li> </ul> <p>B. Call 911 and notify <b>GM, WUERM or Designated Personnel</b> immediately upon discovery of the explosion. The <b>WUERM</b> should then notify others as appropriate. Examples include:</p> <ol style="list-style-type: none"> <li>a. Local Fire Department</li> <li>b. Local Police Department</li> <li>c. FBI</li> <li>d. ATF</li> </ol> <p>C. Take all practical measures to ensure that the building or facility is evacuated.</p>	<p><i>The individual who first notices or receives word of the explosion should contact the <b>WUERM</b> immediately by whatever means of communication are available.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<p><b>Initiation and Notification:</b></p>	<p>D. In cases where an adversary calls, a <b>LDPCSD</b> employee in advance that employee should complete the <b>Bomb Threat Checklist OR Phone Threat Report Form</b> found in Section VIII of the ERP.</p> <p>E. Initiate partial or full ERP activation.</p> <p>F. Initiate partial or full activation of the Emergency Operations Center (EOC).</p>	<p><i>The <b>Bomb Threat Checklist</b> and the <b>Phone Threat Report Form</b> contain questions that should be asked the caller if possible to help determine the specifics of the threat including the location of the explosive device, type of device, time of detonation, and reason for the attack.</i></p> <p><i>The <b>WUERM</b> will decide whether to initiate the ERP on a partial or full basis. The</i></p>

<b>AP 2 - Structural Damage from Explosive Device</b>		
	<p>G. Engage other organization as needed (Law Enforcement, Fire Protection, FBI).</p> <p>H. Perform internal and external notifications according to ERP.</p>	<p><i>WUERM will also decide when and to what extent to activate the EOC.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>Phones</p> <p><b>Location</b></p> <p>Administration Office, Plant</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>
<b>Specific Activities:</b>	<p>Notify proper response units.</p>	
<b>I. Assess the Problem</b>	<ol style="list-style-type: none"> <li>1. Deploy Damage Assessment Team(s) (DAT) <ul style="list-style-type: none"> <li>• Perform a thorough assessment of the structural damage caused by the explosion.</li> <li>• Determine how explosion is effecting system operations.</li> </ul> </li> <li>2. Check and monitor all other water system functions and facilities to ensure that the rest of the system is operating normally. (The initial explosion could be a diversion to a larger event, or it could be the first in a series of similar attacks.)</li> <li>3. If the damage appears to be intentional, treat as a crime scene. Consult with local police, state police, and the FBI on evidence preservation. Also see <b>Maintaining Crime Scene Integrity</b> Form, Section XX of ERP.</li> <li>4. Isolate damaged facility from rest of water system, and take measures to bypass the damaged area if possible.</li> <li>5. Inform local police, state police, and the FBI of potential hazardous materials.</li> </ol>	<p><i>The DAT will work in conjunction with local/state law enforcement in terms of incident command and control.</i></p> <p><b><i>UNDER NO CIRCUMSTANCES WILL THE DAT TEAM ENTER THE AREA CONTAINING THE EXPLOSIVE DEVICE UNTIL AFTER THE LOCAL LAW ENFORCEMENT EXPLOSION SPECIALISTS (BOMB SQUAD) HAS DETERMINED THAT THE AREA IS SAFE.</i></b></p>
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>6. Physically secure water system facilities and implement heightened security procedures throughout the system.</li> <li>7. Initiate <b>Alternate Water Supply Plan</b> (ERP Section XX) to provide alternate water supply</li> </ol>	

<b>AP 2 - Structural Damage from Explosive Device</b>		
	<p>for customers and fire protection as necessary.</p> <p>8. Based on extent of damage, consider alternate (interim) treatment schemes.</p> <p>9. Issue public notification, "Boil Water", "Do not Drink", or "Do not Use" orders and other Press Releases as appropriate. See Section XX of ERP for <b>Press Release Forms</b>.</p> <p>10. Request assistance from outside contractors or other water utilities if needed to help repair the damage.</p>	
<b>III. Monitoring</b>	<p>11. Perform sampling and monitoring activities and analysis to determine if the explosion has rendered the water supply unsafe for customers.</p> <p>12. Perform a system pressure evaluation to determine how the explosion has affected customers and fire water capability in each pressure zone.</p>	
<b>IV. Recovery and Return to Safety</b>	<p>13. Repair damage to critical equipment and facilities as soon as possible.</p> <p>14. Determine and mitigate effects on other system components. For example, replace water storage capacity if it was diminished during repairs.</p> <p>15. Clean and disinfect system components as necessary.</p> <p>16. Resume normal operations.</p> <p>17. Assess need for additional protection/security measures.</p>	<p><i>The WUERM will inspect the repairs and will give the OK to resume normal operation of the water system</i></p> <p><i>The WUERM will evaluate a heightened security posture. As a result, security will be increased or decreased as necessary according to the perceived threat.</i></p>
<b>V. Report of Findings</b>	<p>18. File incident reports.</p>	<p><i>The Utility GM should file an internal report for the Utility's files, and also provide information as requested to Local Law Enforcement and other outside agencies.</i></p>
<b>VI. AP-2 Revision Dates</b>		

<b>AP 3 – Employee Assaulted with Weapon (Armed Intruder)</b>		
<b>AP Summary:</b>	<p>This Action Plan applies to the threat of an employee(s) being assaulted by an intruder (possibly an ex-employee), with a weapon. Incidents of this type will vary in scale and severity, but the following should generally apply across the spectrum of threat conditions.</p> <p><b>If you believe this threat is of current importance and have not yet dialed 911 or an emergency equivalent, do so immediately before proceeding.</b></p>	
<b>Initiation and Notification:</b>	<p>Initial notification of the incident will vary in both method and urgency, however in any scenario the first priority is the welfare of the assault victim. Under all circumstances, emergency personnel should be notified and consulted immediately.</p> <p>This threat requires a response addressing three distinct categories:</p> <ul style="list-style-type: none"> <li>• Ensuring the health and safety of the victim and other employees.</li> <li>• Notifying and facilitating involvement of the proper authorities.</li> <li>• Communicating specifics of the incident to other staff, the media, and the victim’s relatives.</li> </ul> <p>Remain aware of these aspects of your response as the AP is initiated and consulted.</p>	<p><i>The individual who first notices or receives word of the assault should contact 911 immediately by whatever means of communication may be available.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>Phones</p> <p><b>Location</b></p> <p>Administration Office, Plant</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>
<b>Specific Activities:</b>	<p>Notify proper response units.</p>	
<b>I. Assess the Problem</b>	<p>Assessment of the severity of injury should not be made by Utility staff; proper diagnosis should be made only by trained medical personnel. The following general steps will be prudent:</p> <ol style="list-style-type: none"> <li>1. The first task upon discovery of the incident is to dial 911 and report the incident in detail.</li> <li>2. An ambulance (or other transportation to the</li> </ol>	<p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>

<b>AP 3 – Employee Assaulted with Weapon (Armed Intruder)</b>		
	<p>hospital in less urgent situations) should be immediately arranged in all cases.</p> <p>3. Decision-making control of the situation should be readily surrendered to the proper authorities.</p> <p>4. In the event of a hostage situation or extended incident, Utility staff should notify the authorities and evacuate the area quickly.</p> <p>5. Under no circumstances should Utility personnel attempt to subdue the adversary or bring personal weapons onto the scene.</p>	
<b>II. Isolate and Fix the Problem</b>	<p>6. If witnesses were present they should be readily available to provide information to the authorities. Fill out the <b>Suspect Identification Form</b>. See Section XX of ERP.</p> <p>7. The area surrounding the incident is a crime scene and care should be taken not to alter anything that may impair the ability of the authorities to interpret or recreate the assault. Consult the <b>Maintaining Crime Scene Integrity Form</b> located in Section XX of this ERP.</p> <p>8. The weapon, if present, should not be handled or touched in any way.</p>	
<b>III. Monitoring</b>	<p>9. Communication with the media should be handled in a proactive fashion, with statements made only by the identified Utility spokesperson. Similarly, employees should not be left to spread the word through gossip and hearsay. An announcement carrying relevant details should be disseminated promptly.</p> <p>10. If the assault victim is injured or otherwise unable to perform his/her duties, the replacement personnel may also be under significant stress. Care should be taking in selecting replacement personnel including monitoring of performance and behavior.</p>	<i>See ERP Section XX.</i>

<b>AP 3 – Employee Assaulted with Weapon (Armed Intruder)</b>		
<b>IV. Recovery and Return to Safety</b>	<p>11. Staff stress may have serious ramifications. It is important to evaluate these effects in an ongoing fashion and address them accordingly. The Utility should consider temporary mental health counselors under such tragic circumstances.</p> <p>12. In the event of a fatality, notification of family is an unfortunate duty, which may be best handled by the local police or other authorities experienced in such tasks.</p> <p>13. If security was breached during the incident, rapidly address any weakness the incident may have identified. Evaluate access to the incident location and modify where necessary.</p> <p>14. If the adversary was acting with an identifiable motive, consider the mentality and culture of the utility to evaluate if the underlying issue may be significant and widespread.</p> <p>15. If assault was of a sexual nature consider awareness training for utility staff.</p> <p>16. The need to maintain a heightened security posture should be evaluated, and security should be increased and decreased as necessary according to the perceived threat.</p>	
<b>V. Report of Findings</b>	<p>17. In addition to completing the appropriate filings with the local police and other agencies, the utility should assemble relevant personnel to review the effectiveness of the action plan and reinforce lessons learned in the process.</p>	
<b>VI. AP-3 Revision Dates</b>		

<b>AP4 - SCADA Security</b>		
<b>AP Summary:</b>	<p>This Action Plan applies to a cyber attack on a SCADA network system when the cyber intruder is:</p> <ul style="list-style-type: none"> <li>• Conducting DoS (Denial of Service)</li> <li>• Initiating SCADA/DCS command spoofing</li> <li>• Attempting to take the SCADA/DCS system down</li> <li>• Attempting to take control of or is in control of the system</li> </ul> <p><b><u>Prepare for problems by:</u></b></p> <ul style="list-style-type: none"> <li>• Updating all network documentation around the SCADA/DCS</li> <li>• Documenting all network data flows to/from Intranet systems, SCADA/DCS and surrounding systems</li> <li>• Identifying Zones of Vulnerability</li> <li>• Identifying ramifications and feasibility of disconnecting networks, computers and data flows</li> <li>• Ensuring that sufficient monitoring and network control points (firewalls, IPS, etc.) are in place to both know what's happening on your network and how to control it</li> <li>• Characterizing network traffic so that anomalous behavior can be identified</li> <li>• Becoming familiar with computer forensics tools and practices before being forced to learn them "under fire"</li> <li>• Becoming familiar with host-based monitoring and intrusion detection, since most hacking over networks is now conducted via encrypted tunnels or data streams.</li> <li>• Ensuring that backup/restore procedures are up to date, as are the backups themselves</li> </ul>	
<b>Initiation and Notification:</b>	<p>Notify immediately upon discovery of the attack:</p> <ul style="list-style-type: none"> <li>• <b>GM, WUERM or Designated Personnel</b></li> </ul> <p>Others as appropriate (for example):</p> <ul style="list-style-type: none"> <li>• SCADA Vendor</li> <li>• Internet Service Provider</li> <li>• Computer Equipment Vendor</li> </ul>	<p><i>The individual that first notices or receives word of an attack should contact the <b>WUERM</b> immediately by whatever means of communication may be available.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>Phones</p> <p><b>Location</b></p> <p>Administration Office, Plant</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>

<b>AP4 - SCADA Security</b>		
<b>Specific Activities:</b>	Disconnect SCADA System Inspect sites for operation and levels.	
<b>I. Assess the Problem</b>	<p>An attack on SCADA system may be manifested in several different manners and may be quite difficult to initially determine the specific mode of attack or objective of the SCADA threat. Initial areas for investigation are:</p> <ul style="list-style-type: none"> <li>• SCADA is not controlling plant parameters</li> <li>• Complaints from customers</li> <li>• Quality of water results</li> <li>• Inadequate throughput</li> </ul>	<p><i>In a DoS an intruder breaks into a number of computers and plants programs that lie dormant until activated by the attacker. The computers then send a steady stream of data packets to a targeted Web site in an attempt to crash a service (or server), overload network links, or disrupt other mission-critical resources. DoS attacks are powerful because they can be launched simultaneously from hundreds of remotely controlled computers, thereby amplifying their reach. The objective of a DoS attack is to exhaust the resources of the target until the underlying network fails. The tools for DoS attacks are widely available and can be found at numerous hacker Web sites.</i></p>
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>1. Restrict physical access to the area.</li> <li>2. Physically unplug any phone lines that could dial in to the attacked computer.</li> <li>3. Unplug the computer from the network.</li> <li>4. Determine if the SCADA system needs to be isolated from process operations and taken completely off line.</li> <li>5. Photograph the scene, including connections to any peripherals.</li> <li>6. IF the computer is off, DO NOT turn it on (preferred method is to jumper system disk drive(s) as read only, and perform a post-mortem on a separate computer using suitable tools.)</li> <li>7. IF the computer is on, DO NOT reboot it.</li> <li>8. Avoid accessing any files on the compromised machine.</li> </ol>	<p><i>Restricting access helps to preserve fingerprints for later prosecution (if physical access to systems is involved)</i></p> <p><i>These steps isolate the SCADA system from the outside world where the cyber attack is originating.</i></p> <p><i>The SCADA system itself may be malfunctioning as a result of the attacks with equipment not operating as originally intended.</i></p> <p><i>Useful for later reference if the machine needs to be disassembled for examination.</i></p> <p><i>Merely turning on a Windows computer changes time stamps and other important evidence, for example.</i></p> <p><i>Rebooting your computer may launch viruses or time bombs.</i></p> <p><i>Access timestamps may be altered.</i></p> <p><i>Manual sampling may be necessary if computerized process are not functioning properly.</i></p> <p><i>A baseline analysis is important for determining if changes of an unknown nature are made to the water supply</i></p> <p><i>Contamination may pass through the system unnoticed if an insufficient number of sampling points are used or if sampling points</i></p>

<b>AP4 - SCADA Security</b>		
	<p>9. Increase sampling at or near system intakes – consider whether to isolate.</p> <p>10. Preserve latest full battery background test at baseline.</p> <p>11. Increase sampling efforts.</p> <p>12. Check for NIPC water sector warnings (<i>NIPC may contain additional protective actions to consider: <a href="http://www.NIPC.gov">http://www.NIPC.gov</a> or <a href="https://www.infraguard.org">https://www.infraguard.org</a> for secure access infraguard members</i>)</p>	<p><i>and mis-specified.</i></p>
<b>III. Monitoring</b>	<p>13. Monitor unmanned components (storage tanks &amp; pumping stations) – consider whether to isolate.</p>	<p><i>With the SCADA system down, it may be easier for attackers to physically enter the site undetected</i></p>
<b>IV. Recovery and Return to Safety</b>	<p>14. Solicit the assistance of a Computer Emergency Response Team or Network Forensics Specialists.</p> <p><b>OR with appropriate training, develop site-specific procedures to:</b></p> <p>15. Retrieve logged data from the various equipment and server logs.</p> <p>16. Collect adequate information (make image copies).</p> <p>17. With law enforcement/FBI assistance, check for implanted backdoors and other malicious code (i.e., Trojan horse, or worm).</p> <p>18. Install safeguards and patch to current levels.</p>	<p><i>Computer Emergency Response Teams:</i></p> <p><i>Preserve the evidence,</i></p> <p><i>Determine the extent of damage,</i></p> <p><i>Return the system to normal operation.</i></p> <p><i>The goal is for proper forensics to be performed on these logs such that it cannot be claimed that these logs were tampered or altered and prosecution can therefore take place.</i></p> <p><i>The goal is to preserve evidence for identifying and prosecuting the attacker utilizing assistance from the proper authorities in command (FBI, EPA, Police, Computer Emergency Response Team, etc.).</i></p>
<b>IV. Recovery and Return to Safety</b>	<p>19. Test security breach to ensure plugged (in a safe mode, in case the either the problem hasn't been fixed or some other attack</p>	<p><i>Prematurely returning the system to operation may make the utility susceptible to specific attack via purposefully implanted attack pathways.</i></p> <p><i>Simply returning the system to operation may</i></p>

<b>AP4 - SCADA Security</b>		
	<p>was installed unbeknownst).</p> <p>20. Assess / implement additional precautions for SCADA system.</p>	<p><i>be insufficient and invite future attacks.</i></p> <p><i>Ensures attacker can not use same method to compromise SCADA system.</i></p> <p><i>Simply restoring from recent backup media may be insufficient to restore the system to a trusted state.</i></p>
<b>V. Report of Findings</b>	<p>21. Turn over evidence to the proper authorities.</p>	<p><i>Supports prosecution of attack</i></p>
<b>VI. AP-4 Revision Dates</b>		

## AP5 - IT Security

<p><b>AP Summary:</b></p>	<p>This Action Plan applies to a cyber attack on an IT intranet system. Examples of cyber include:</p> <ul style="list-style-type: none"> <li>• Virus</li> <li>• Denial of Service (DoS) including Smurf, ICMP, TCP SYN, UDP, TCP, Distributed Denial of Service, and various combinations</li> <li>• Internet facing server attacks</li> <li>• Unauthorized Network Intrusions / Unauthorized Access</li> </ul> <p><u><i>Prepare for problems by:</i></u></p> <ul style="list-style-type: none"> <li>• Updating all network documentation around the SCADA/DCS</li> <li>• Documenting all network data flows to/from Intranet systems, SCADA/DCS and surrounding systems</li> <li>• Identifying Zones of Vulnerability</li> <li>• Identifying ramifications and feasibility of disconnecting networks, computers and data flows</li> <li>• Ensuring that sufficient monitoring and network control points (firewalls, IPS, etc.) are in place to both know what’s happening on your network and how to control it</li> <li>• Characterizing network traffic so that anomalous behavior can be identified</li> <li>• Becoming familiar with computer forensics tools and practices before being forced to learn them “under fire”</li> <li>• Becoming familiar with host-based monitoring and intrusion detection, since most hacking over networks is now conducted via encrypted tunnels or data streams</li> <li>• Ensuring that backup/restore procedures are up to date, as are the backups themselves</li> </ul>	
<p><b>Initiation and Notification:</b></p>	<p>Notify immediately upon discovery of the attack:</p> <ul style="list-style-type: none"> <li>• <a href="#">GM, WUERM or Designated Personnel</a></li> </ul> <p>Contact others as appropriate:</p> <ul style="list-style-type: none"> <li>• Internet Service Provider,</li> <li>• Computer Equipment Vendor</li> <li>• Computer Support Team</li> </ul>	<p><i>The individual that first notices or receives word of the attack should contact both the [Data (IT) Manager] and [WUERM] by whatever means of communication may be available.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>

<b>AP5 – IT Security</b>		
<b>Initiation and Notification:</b>	<p><b>Initiate this AP if any of the following has occurred:</b></p> <ul style="list-style-type: none"> <li>• More than one user reports unusual behavior of any IT system or software.</li> <li>• Network intrusion detection indicates a violation.</li> <li>• Unusual IT system activity is noted on holidays, evenings, or weekends.</li> <li>• Unusual log file entries are noticed.</li> <li>• Presence of new <b>setuid</b> or <b>setgid</b> files are discovered.</li> <li>• Changes in system directories and files are noted.</li> <li>• Unusual hidden files or ambiguous files, such as those from past incidents, are noticed.</li> <li>• Users’ home pages are altered.</li> <li>• Accounting discrepancies are noticed.</li> <li>• Suspicious probes and /or browsing is identified.</li> <li>• Presence of cracking utilities is found.</li> <li>• Unaccounted for changes in the DNS tables, router rules, or firewall rules are discovered.</li> <li>• Unexplained elevation or use of privileges.</li> </ul>	<p><i>Unusual log file entries - Although expert intruders are good at covering their tracks, examples include numerous failed login attempts, and logins into dormant or default accounts (logins when not expected, logins to infrequently used accounts)</i></p> <p><i>Missing files, altered files, unknown users in password files</i></p> <p><i>Unusual hidden files– For example, /tmp/bob and /etc/inet/d (/tmp/..., /tmp/(space), /dev/* as real files rather than device files)</i></p> <p><i>Altered home pages – These are usually the intentional target for visibility or other pages on the Web server</i></p> <p><i>Suspicious probes – For example login attempts</i></p> <p><i>An authorized user with bad intentions might, have loaded cracking utilities such as Crack.</i></p> <p><i>Unexplained elevation – for example gaining super user privileges.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>Phones</p> <p><b>Location</b></p> <p>Administration Office, Plant</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>
<b>Specific Activities:</b>	<p>Complete:</p> <p><b>IT Incident Response and Reporting Checklist.</b></p>	<p><i>Human error or a software failure can sometimes mimic the actions of an intruder. New content on a Web server, newly released products, or anything that may generate above-normal amounts of traffic may seem like a DoS attack</i></p> <p><i>In many incidents, the perpetrator gains unauthorized access, but doesn’t actually access privileged information or alter data.</i></p>

<b>AP5 – IT Security</b>		
<b>I. Assess the Problem</b>	<p><b>Note:</b> Because the approach to addressing an incident can vary depending on the nature of the incident, it is critical to be aware of the type of incident that has occurred <b>BEFORE</b> taking action.</p> <ol style="list-style-type: none"> <li>1. Protect Customer Information (Take the customer information database, assuming it is a standard database, off the network, so that it is no longer accessible). Note: Modems should not be allowed on the database machine.</li> <li>2. Isolate and Contain the Threat (Insert site-specific procedures consistent with your system architecture)</li> <li>3. Document the event (See items 4 and 16)</li> <li>4. Take a snapshot of the system – Obtain forensic images and preserve original media. <ul style="list-style-type: none"> <li>• Registers, peripheral memory, caches</li> <li>• Memory (kernel and physical)</li> <li>• Network state</li> <li>• Running processes</li> <li>• Hardware data residue, memory chips, and PDA-type systems</li> <li>• Hard disks</li> <li>• Disks and backup media</li> <li>• CD-ROMs</li> <li>• Printouts</li> </ul> </li> </ol>	<p><i>Note: Be prepared to revise the response plan as necessary based on new information. Flexibility is important. Be ready to change monitoring and defensive strategies during an incident as necessary to handle the distinctive circumstances of an individual attack.</i></p> <p><i>You might maintain critical customer information on your network. If a hacker steals, modifies, destroys, or even posts the information to the Internet, you may find yourself in court.</i></p> <p><i>In general, the intruder or the malicious code should be prevented from working through the network. Attempts to contain the threat should also take into account every effort to minimize the impact to business operations. Prevent the use of your systems to launch attacks against other companies. Your computer may become one of hundreds of “soldier” machines rather than an “end target”.</i></p> <p><i>Recording all of the details may provide management with the information necessary to assess the break-in and could assist in the prosecution of specific individuals.</i></p> <p><i>A snapshot is basically a photo of what a computer’s memory (primary storage, specific registers, etc) contains at a specific point in time. It can be used to catch intruders by recording information that the hacker may erase before the attack is completed or repelled.</i></p>
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>5. Save the system state by backing up as much of the system as necessary.</li> <li>6. Alert others according to the response strategy including contacting a Computer Emergency Response Team.</li> <li>7. Determine if the system should be</li> </ol>	<p><i>Serves to further diagnose the incident</i></p> <p><i>Alerting others may be done in parallel with other steps. The Computer Emergency Response Team may know how to fix the flaw in the vendor’s software or hardware that allowed the intruder to access your network.</i></p> <p><i>Users should still be able to use some local services. Be careful. The network</i></p>

<b>AP5 – IT Security</b>		
	<p>disconnected from the network.</p> <p>8. Determine if the system should be shut down entirely.</p>	<p><i>might involve wireless local area networks. In these cases, it might be important to disable and/or remove the wireless access points from the internal network. Sometimes you may need to disconnect a system from the network to prevent further damage and limit the extent of the attack.</i></p> <p><i>This action might appear drastic, but is sometimes advisable usually based on a decision to prevent further loss and/or disruption. Shut down or disconnect resources only when absolutely necessary.</i></p>
<b>III. Monitoring</b>	<p>9. Perform real-time scanning and detection to prevent further infection</p> <p>10. Set up traps.</p>	<p><i>This involves actively tracking traffic for unusual activity (for example, port scanning) or patterns of an attack stream of bits, bytes, or packets. Attackers sometimes use a “smoke screen”, an attack that attempts to divert attention from a more stealthy network intrusion. It is therefore important not to focus all attention on an initial attack, but to continue diligently looking for other attacks.</i></p> <p><i>This action involves learning the intruder’s identity or modus operandi (MO). The MO is a mechanism by which the perpetrator commits his or her crime. It is a learned behavior and can change over time. A MO can be considered a pattern, allowing for some variance. Examples of traps are honeypots (that is, computers designed to attract attackers in order to record their behavior and to gather evidence, but not meant for legitimate users.)</i></p>
<b>IV. Recovery and Return to Safety</b>	<p>11. Change the filtering rules of firewalls and routers.</p> <p>12. Disable known vulnerable services.</p> <p>13. Remove any hidden malicious programs or directories added by the intruder or deployed by the malicious code, up to and including a system-wide removal of all programs and files (i.e., format the disk and re-install).</p>	<p><i>This action excludes traffic from hosts that appear to be the source of an attack.</i></p> <p><i>Such as file transfer or calendar services. This action is effective when attackers exploit newly discovered service vulnerabilities.</i></p> <p><i>Need to balance the need recovery with the need to preserve evidence for prosecution.</i></p> <p><i>Although it takes longer to update</i></p>

<b>AP5 – IT Security</b>		
	<p>14. Update virus signatures.</p> <p>15. Eliminate the vulnerability that allowed the exploit and ensure the system is restored with an optimal security configuration.</p> <p>16. Complete a break-in report.</p> <p>17. Based on experience, identify and document tools and techniques that would improve future incident responses.</p>	<p><i>antivirus signatures to the desktop community, IT professionals can quickly update antivirus signatures at the gateway and perimeter to minimize the impact immediately.</i></p> <p><i>Break-in reports provide an overall picture of the status of network security. Chronic, increasing break-in reports indicate need to update system security overall and help pinpoint weak points.</i></p> <p><i>Thoroughly examine how well your procedures worked and decide whether you need to make changes for the future.</i></p>
<b>V. Report of Findings</b>	18. Turn over evidence to the proper authorities.	<i>Supports prosecution of attack.</i>
<b>VI. AP-5 Revision Dates</b>		

<b>AP 6 - Chlorine Release</b>	
<b>AP Summary:</b>	This Action Plan is not Required as the LDPCSD has discontinued use and storage of chlorine gas.
<b>AP-6 Revision Dates</b>	

<b>AP 7 - Power Outage</b>		
<b>AP Summary:</b>	<p>This Action Plan applies to events that result in power outages. Note that this Action Plan may need to be implemented in conjunction with other Action Plans (for example, severe weather) as necessary.</p> <p>Consider agreement with the power company to determine the priority of drinking water and wastewater systems for recovery prior to the emergency.</p>	
<b>Initiation and Notification:</b>	<p>Initiate this AP upon a loss of offsite power</p> <p>Notify:</p> <ul style="list-style-type: none"> <li>• GM, WUERM or Designated Personnel</li> </ul> <p>Others as appropriate, examples include:</p> <ul style="list-style-type: none"> <li>• Fuel supplier (back up generator)</li> <li>• Critical Care Customers</li> <li>• Large Water Users</li> </ul>	<p><i>Notify the WUERM by whatever means of communication may be available.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<b>Equipment Identified:</b>	<p style="text-align: center;"><b>Equipment</b></p> <p>UPS for SCADA computers (Installed)            Mobile/cellular phones            Flashlights            Spare batteries            Emergency kits</p> <p>Accessory requirements (cables for generators, transformers, load banks, bus bars, distribution panels, feeder panels, fuses, outlets, load centers, etc)</p>	<p><i>Radios should have access to a frequency compatible with the local fire dept, sheriff, public health officials, other government departments, utilities, services, or consultants.</i></p> <p><i>Cell phones may not be available during power outages.</i></p>
<b>Specific Activities:</b>	<p>LDPCSD has 4.7 mg treated in storage and most services are gravity feed.</p>	<p><i>Monitoring down time updates form electric provider.</i></p>
<b>I. Assess the Problem</b>	<ol style="list-style-type: none"> <li>1. Call local hydro-electric Supply Company - request information on the estimated down time.</li> <li>2. <b>IF</b> backup generation is available, <b>THEN</b> assess the ability to supply fuel for extended periods.</li> <li>3. Assess ability for HVAC or alternate to provide proper temperatures for SCADA, computer, and control systems.</li> <li>4. Estimate potable water requirements under the emergency condition and determine if the utility can still meet requirements.</li> </ol>	<p><i>Consider agreements with fuel supply company to supply fuel automatically upon a power loss if the capability to store fuel on site is not practical. A fuel tank with capacity for at least 24 hours of run time is advisable.</i></p> <p><i>If on-staff personnel are not experienced with power-generation equipment, it is necessary to arrange for professional assistance to install and operate the mobile units.</i></p> <p><i>Evaluate back-up power with controllers that sense problems with purchased power and come up automatically.</i></p> <p><i>Complete assessment as quickly as</i></p>

<b>AP 7 - Power Outage</b>		
	<p>5. <b>IF</b> telephone is also down, <b>THEN</b> SCADA communications may be blocked.</p> <p>6. Loss of power could affect utility access gates, CCTV, intrusion alarms and other remote monitoring abilities. Loss of power may be a diversionary tactic for other terrorist activity. Be alert.</p>	<p><i>possible.</i></p>
<b>II. Isolate and Fix the Problem</b>	<p>7. Turn off unnecessary electrical equipment.</p> <p>8. Start back up generators as necessary for key components: Note: Uninterruptible Power Supply (UPS) for SCADA and computers, battery back-up for Remote Terminal Unit (RTU) may only supply power for a few hours.</p>	<p><i>This can prevent injuries and damage from unexpected equipment startups, power surges to the equipment and possible fires. If power goes out, an Uninterruptible Power Supply (UPS) provides battery power at a constant rate for several minutes, allowing you to safely turn off equipment with minimal risk or loss.</i></p> <p><i>If you permanently connect a backup electrical generator, the connection may have to meet certain technical standards required by law. Some states also require you to notify your electric utility. If you do not, utility personnel working nearby could be seriously injured.</i></p>
<b>II. Isolate and Fix the Problem</b>	<p>9. Increase disinfectant residual as a precaution to potential contamination.</p> <p>10. <b>IF</b> not able to meet community requirements for water <b>THEN</b> arrange for water to be supplied by another source. See Mutual aid agreements Section II B. of ERP and Section III.G of ERP for Alternate Water Sources.</p> <p>11. Notify priority customers</p> <p>12. Notify users of interruption of service if backup pump(s) is/are not capable of maintaining supply.</p> <p>13. Issue "Boil Water", "Do not Drink", or "Do not Use" orders and Press Releases as appropriate. See Section VIII.A.1 of</p>	<p><i>A temporary portable generator should not be connected to building wiring unless the building meets the same technical standards legally required for a permanent generator. Most buildings are not so equipped. As an alternative, use properly rated extension cords to connect electrical loads directly to the generator receptacles.</i></p> <p><i>This is an analysis of all available sources of water, not just those used under conditions of normal operation. These sources might include both new intakes or wells, public or private ponds, reservoirs, swimming pools, interconnections with other water utilities, water stored within building water systems, water provided in bottles or tank trucks from outside sources of potable water, local dairies or bottling plants, etc.</i></p> <p><i>Since computers may be down, access to Water ISAC, police, government,</i></p>

<b>AP 7 - Power Outage</b>		
	<p>ERP for <b>Press Release Forms</b>.</p> <p>14. Initiate back up plan for retrieval of current information from outside sources.</p>	<i>etc. could be compromised.</i>
<b>II. Isolate and Fix the Problem</b>	<p>15. Consider initiating back-up portable pumping and generating capability to serve areas with limited storage, critical wastewater collection and treatment operations.</p> <p>16. Facilities with freezing temperatures should turn off and drain the following lines in the event of a long term power loss:</p> <ul style="list-style-type: none"> <li>a. Fire sprinkler system</li> <li>b. Standpipes</li> <li>c. Potable Water Lines</li> <li>d. Toilets</li> </ul>	
<b>III. Monitoring</b>	<p>17. <b>IF</b> damage to equipment occurs, <b>THEN</b> contact vendor/mutual aid companies to replace/repair damaged equipment.</p> <p>18. Monitor the status of the backup power supply and regularly test whether battery levels are adequate and the backup generators are functional.</p>	<i>Ask your vendors about specific limitations of your equipment. Find out how long it would take to repair or replace damaged equipment.</i>
<b>IV. Recovery and Return to Safety</b>	<p>19. Conduct disinfection, flushing, and bacteriological sampling after repairs of equipment lost.</p> <p>20. <b>IF</b> power outage occurs during freezing conditions <b>THEN</b> allow electronic equipment to reach ambient temperatures before energizing to prevent condensate from forming on circuitry.</p> <p>21. Fire and potable water piping should be checked for leaks from freeze damage after the heat has been restored to the facility and water turned back on.</p> <p>22. Notify public/customers when it is safe to use the drinking water again.</p>	

## AP 7 - Power Outage

<p><b>V. Report of Findings</b></p>	<p>23. All the components of the incident should be correlated and established in writing. This would include how the response was managed and suggestions to improve the facility / community response in the future. The report should incorporate all relevant data from the incident and suggested changes in the emergency response plans and procedures.</p> <p>24. Suggestions from the report should be submitted to the governing board/individuals for evaluation and actions to be taken.</p>	<p><i>To learn from the incident and reduce the likelihood of future such events, a Report of Findings should be provided to the decision makers for the Utility so consideration can be given for changes in facility structure, security, procedures or personnel.</i></p>
<p><b>VI. AP-7 Revision Dates</b></p>		

<b>AP 8A - Natural Event (Flood)</b>		
<b>AP Summary:</b>	<p>This Action Plan applies to flooding events. In general, these events occur with reasonable lead times, and it is possible to take proactive measures, as outlined below. Response and recovery can be time consuming during flood events, as they can involve loss of electrical power supply, damage of structures and equipment, disruptions of service, and injuries to utility personnel.</p> <p>LDPCSD is located in the foothills among rolling hills and valleys, flooding events would be localized in nature. Flooding would also be for brief intervals.</p>	
<b>Initiation and Notification:</b>	<p>This AP should be initiated upon official notification of either a flood “watch” (a flood is possible in your area), or a flood “warning” (flooding is already occurring or will occur soon in your area). Such information will almost certainly be issued in the form of forecasts from the National Weather Service (NWS) and other governmental agencies. Also initiate if actual flooding is discovered.</p> <p>Notify</p> <ul style="list-style-type: none"> <li>• <b>GM, WUERM or Designated Personnel</b></li> </ul> <p>The <b>GM, WUERM or Designated Personnel</b> will make the decision to contact local response authorities to request possible assistance.</p>	<p><i>Links to specific RFCs can be found at the following website: <a href="http://www.nws.noaa.gov/oh/hic/rfc.html">http://www.nws.noaa.gov/oh/hic/rfc.html</a></i></p> <p><i>The NWS maintains 13 regional River Forecast Centers (RFC) that are responsible for issuing flood forecasts synthesized from hydro-meteorological data. These centers offer current river conditions and observations, as well as forecast and guidance for both major river and flash floods, hydrographs for gauging stations, and flood outlook potentials. Be aware that floods often occur without local precipitation as a result of precipitation upstream.</i></p> <p><i>Flash flood guidance values can also typically be obtained via your local RFC. These values show data suggesting the amount of rain necessary over 1-, 3-, and 6-hour periods that could cause flash floods.</i></p> <p><i>While major floods can take several hours to days to develop, flash floods can take only a few minutes to a few hours to develop.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b> Radio, Internet</p> <p><b>Location</b> Administration Office</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>
<b>Specific Activities:</b>	<p>Monitor Situation</p>	

<b>AP 8A - Natural Event (Flood)</b>		
<b>I. Assess the Problem</b>	<p><b>If a Flood Watch or Warning is received:</b></p> <ol style="list-style-type: none"> <li>1. Contact local representative of NWS for additional information on exact location and probable extent (stage) of flooding, relative to utility facilities.</li> <li>2. Use site maps or other available information to assess location of all facilities for location in flood plain.</li> <li>3. Prioritize pre-flooding activities on basis of flooding potential (in part, based on location).</li> <li>4. If flooding has already occurred:                             <ul style="list-style-type: none"> <li>• Conduct site assessment from nearest safe location.</li> <li>• Based on peak flood stage, predict and build inventory of equipment likely to be most affected.</li> <li>• List equipment needed to restore water service when flood waters recede.</li> </ul> </li> </ol>	<p><i>Flood damage is proportional to the to the volume and the velocity of the water. Floods are extremely dangerous because they destroy through inundation and soaking as well as the incredible force of moving water. High volumes of water can move heavy objects and undermine roads and bridges. Flooding can also facilitate other hazards such as landslides, or cause other hazards such as material hazard events</i></p>
<b>II. Isolate and Fix the Problem</b>	<p>The following steps should be taken in preparation for the event:</p> <ol style="list-style-type: none"> <li>1. Activate Emergency Operations Center (EOC).</li> <li>2. Assemble essential personnel and designate duties, such as:                             <ul style="list-style-type: none"> <li>• Elevate in-place or remove water-sensitive equipment within structures to prevent flood damage.</li> <li>• Anchor fuel tanks.</li> <li>• Elevate electrical system components.</li> <li>• Take appropriate flood-proofing steps (sandbags or other).</li> <li>• Install sewer backflow valves.</li> <li>• Flood-proof or elevate heating, cooling, and ventilating equipment.</li> </ul> </li> </ol> <p>Assemble and stage mobile stand-by generators and auxiliary water pumps.</p>	<p><i>Steps in advance of flooding obviously will be different than steps in reaction to flooding. Both may be needed for any one flooding event.</i></p>

<b>AP 8A - Natural Event (Flood)</b>		
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>3. Notify neighboring utilities or other sources of emergency response support if manpower or equipment will be needed.</li> <li>4. The IO is to notify customers, media, and state and local authorities that service may be disrupted and/or that demand reductions may be necessary.</li> <li>5. Pre-test and/or initiate emergency communications plan</li> <li>6. Consider shut-down if flooding appears imminent.</li> </ol>	<p><i>Flood water may have to be pumped out of facilities before utility equipment can be restored.</i></p> <p><i>Decision to shutdown must balance protection of utility equipment and maintenance of fire flows.</i></p>
<b>III. Monitoring</b>	<p>Observe the following recommended practices during the flood event:</p> <ul style="list-style-type: none"> <li>• Take pictures of the damage, both of buildings and their contents, for insurance claims.</li> <li>• Instruct Utility personnel to avoid floodwaters whenever possible.</li> <li>• If a vehicle stalls in rapidly rising waters, abandon it immediately and climb to higher ground. Vehicles can be swept away in two feet of water.</li> <li>• Stay out of any building if floodwaters remain around the building.</li> <li>• Avoid smoking inside buildings. Smoking in confined areas can cause fires.</li> <li>• Wear sturdy shoes. The most common injury following a disaster is cut feet.</li> <li>• Use battery-powered lanterns or flashlights when examining buildings. Battery-powered lighting is the safest and easiest, preventing fire hazard for the user, occupants, and building.</li> <li>• Look for fire hazards. There may be broken or leaking gas lines, flooded electrical circuits, or submerged furnaces or electrical appliances.</li> </ul>	<p><i>If it is moving swiftly, even water six inches deep can knock an individual off their feet. Many people are swept away wading through floodwaters, resulting in injury or death. Floodwaters may still be rising. Staff may not be able to see on the surface how fast floodwater is moving or see holes and submerged debris.</i></p> <p><i>Floodwaters often undermine foundations, causing sinking, floors can crack or break and buildings can collapse. Buildings may have hidden damage that makes them unsafe such as gas leaks or electric hazards.</i></p>

<b>AP 8A - Natural Event (Flood)</b>		
	<p>Flammable or explosive materials may travel from upstream. Fire is the most frequent hazard following floods.</p> <ul style="list-style-type: none"> <li>The <b>WUERM</b> or <b>IO</b> is to communicate with customers and the Local Emergency Planning Committee (LEPC) as to current conditions.</li> </ul>	
<p><b>IV. Recovery And Return to Safety</b></p>	<p>Once floodwaters recede, the following may be of relevance:</p> <ul style="list-style-type: none"> <li>Check insurance policy for procedures to recover losses, including the national Flood Insurance Program.</li> <li>Inspect foundations for cracks or other damage.</li> <li>Check power lines for damages</li> <li>Arrange for alternate source of electrical power or fuel for diesel generators, sufficient for period of outage following flood. See AP-7 Power Outage.</li> <li>Throw away all food that has come into contact with floodwaters.</li> <li>Inspect, clean, rebuild, replace all affected equipment as necessary</li> <li>Contact state and local authorities to determine if there are any restrictions on disposal of materials and debris removed from the site or if a temporary discharge permit (NPDES or other) is needed for the water pumped from tanks and other flooded structures.</li> </ul>	<p><i>More information can be found here:</i> <a href="http://www.fema.gov/nfip">http://www.fema.gov/nfip</a></p> <p><i>Cracks and damage to a foundation can render a building uninhabitable.</i></p> <p><i>See AP-7 Power Outage</i></p> <p><i>Contaminated floodwater contains bacteria and germs. Eating foods exposed to flood waters can make personnel very sick.</i></p> <p><i>In the longer-term, mitigation against loss of life and property caused by flood events is principally accomplished before the events, through sensible floodplain management and regulation. This involves strategies to modify flooding and to modify infrastructure to reduce likelihood of damage.</i></p> <p><i>Guidelines to a variety of flood-proofing and elevation methods are available from FEMA and NOAA.</i></p>
<p><b>V. Report of Findings</b></p>	<p>Assemble relevant personnel to review effectiveness of action plan and reinforce lessons learned.</p>	
<p><b>VI. AP-8A Revision Dates</b></p>		

<b>AP 8B - Natural Event (Winter Storm)</b>	
<b>AP Summary:</b>	This Action Plan applies to winter storm events. In general, these events occur with reasonable lead times, and it is possible to take proactive measures, as outlined below. Response and recovery can be time consuming during such events, and they can involve loss of electrical power supply, damage of structures and equipment, disruptions of service, and injuries to utility personnel.
<b>Initiation and Notification:</b>	<p>When hazardous winter weather conditions are expected to affect the region, the National Weather Service (NWS) issues public advisories. This AP should be initiated upon official notification of a “winter storm watch” or more elevated status. In order of increasing severity, the standard terminology is as follows:</p> <p><b>Winter Storm Outlook:</b> Issued prior to a Winter Storm Watch. The Outlook is given when forecasters believe winter storm conditions are possible and are usually issued 3 to 5 days in advance of a winter storm.</p> <p><b>Winter Weather Advisory:</b> Issued for accumulations of snow, freezing rain, freezing drizzle, and sleet which will cause significant inconveniences and, if caution is not exercised, could lead to life-threatening situations.</p> <p><b>Winter Storm Watch:</b> Alerts the public to the possibility of a blizzard, heavy snow, heavy freezing rain, or heavy sleet. Winter Storm Watches are usually issued 12 to 48 hours before the beginning of a Winter Storm.</p> <p><b>Winter Storm Warning:</b> Issued when hazardous winter weather in the form of heavy snow, heavy freezing rain, or heavy sleet is imminent or occurring. Winter Storm Warnings are usually issued 12 to 24 hours before the event is expected to begin.</p> <p><b>Blizzard Warning:</b> Issued for sustained or gusty winds of 35 mph or more, and falling or blowing snow creating visibilities at or below ¼ mile; these conditions should persist for at least three hours.</p> <p>It is expected that the local the Local Emergency Planning Committee (LEPC) will carefully and continually monitor meteorological conditions and forecasts. During such events, the Local Emergency Planning Committee (LEPC) shall be in constant contact with the National Weather Service (NWS) and disseminate information to agencies via conference call, e-mail and broadcast fax.</p>
	<p><i>See the NWS website for current warnings here:</i></p> <p>NWS</p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>

<b>AP 8B – Natural Event (Winter Storm)</b>		
<b>Equipment Identified:</b>	<b>Equipment</b> Radio, Internet  <b>Location</b> Administration Office	<i>This equipment is available to assist in the execution of this AP.</i>
<b>Specific Activities:</b>		
<b>I. Assess the Problem</b>	Winter storms, accompanied by strong winds and blizzard conditions, have resulted in localized power and phone outages; closures of streets, highways, schools, businesses, and nonessential government operations. People have been isolated from essential services in their homes and vehicles. A winter storm may escalate into a catastrophic event paralyzing municipalities, and rural areas for several days. Life threatening situations may occur in which emergency response agencies cannot perform their duties due to extreme weather conditions. Individual jurisdictions may be over-whelmed and need mutual aid assistance.	
<b>II. Isolate and Fix the Problem</b>	Snow removal capabilities will vary widely, general procedures are as follows:  <b>Before the storm:</b> <ol style="list-style-type: none"> <li>1. Activate Emergency Operations Center (EOC).</li> <li>2. Monitor track of storm.</li> <li>3. Release nonessential personnel, as warranted.</li> <li>4. Assemble essential personnel and designate duties.</li> <li>5. Typical duties at this stage may include:                             <ul style="list-style-type: none"> <li>• Fill gravity storage tanks.</li> <li>• Test auxiliary power sources.</li> <li>• Fill fuel tanks.</li> <li>• Secure windows and doors.</li> <li>• Mobilize snow removal equipment, as warranted.</li> <li>• Man remote stations essential to operations.</li> <li>• Stockpile chemicals, food, etc.</li> </ul> </li> </ol>	

<b>AP 8B – Natural Event (Winter Storm)</b>		
<b>II. Isolate and Fix the Problem</b>	<p>6. Discuss needs with electric company.</p> <p>7. Test back-up communications system.</p> <p>8. Review mutual aid agreements and verify connections to/from neighboring water systems.</p> <p>Review specific power outage contingency action plan.</p> <p><b>During the storm:</b></p> <ol style="list-style-type: none"> <li>1. Notify customers, media, and state and local authorities if service is disrupted or if significant demand management is necessary.</li> <li>2. Monitor reservoirs.</li> <li>3. Monitor changes in water quality. If a water quality emergency should develop, follow the appropriate procedure.</li> <li>4. Open connections with neighboring water systems if necessary.</li> <li>5. Provide backup power to facilities utilizing mobile generators, as appropriate.</li> </ol>	
<b>III. Monitoring</b>	<p>In order to monitor the infrastructure status and residents' health during a winter weather event, it is expected that the Utility will assist the Local Emergency Planning Committee (LEPC) in gathering the following types of information:</p> <ul style="list-style-type: none"> <li>• Electrical load</li> <li>• EMS cold-related responses / total responses</li> <li>• Cold weather-related water main breaks</li> <li>• Available sheltering centers</li> <li>• Status of salt and sand stockpiles</li> <li>• Available snow removal assets</li> <li>• Cold-related incidents / concerns</li> </ul> <p>During winter weather emergencies, heavy snowfall, coupled with icy roads or ice accumulations on aboveground electrical transmission lines, can result in vehicular accidents and transmission line failure. Power outages during winter weather events can pose serious problems, particularly among those communities where life-sustaining equipment (LSE) is a necessity.</p>	

<b>AP 8B - Natural Event (Winter Storm)</b>	
<b>III. Monitoring</b>	<p>Personnel should avoid traveling by vehicle, but if necessary, it is important to communicate destinations, routes, and expected arrival times. If vehicles get stuck along the way, help can be sent along the predetermined route. If personnel do get stuck:</p> <ul style="list-style-type: none"> <li>• Staff should stay with their car and not try to walk to safety.</li> <li>• Tie a colored cloth to the antenna for rescuers to see.</li> <li>• Start the car and use the heater for about 10 minutes every hour. Keep the exhaust pipe clear so fumes won't back up in the car.</li> <li>• Leave the overhead light on when the engine is running to be seen.</li> </ul> <p>Keep arms and legs moving to keep blood circulating and to stay warm and keep one window away from the blowing wind slightly open to let in air.</p> <p>During heavy storms, search and rescue operations, movement of emergency response agencies to assigned duties and restoration of essential services are likely to become the primary focus of the EOC.</p> <p>Priorities of response forces, prioritization of the use of snow removal equipment and allocation of all critical resources and response personnel will be the responsibility of the EOC.</p>
<b>IV. Recovery And Return to Safety</b>	<p>It is recommended that staff observe the following safety tips in recovery from winter storm events:</p> <ul style="list-style-type: none"> <li>• After the storm, if personnel are required to shovel snow, be extremely careful. It is physically strenuous work, requiring frequent breaks. Avoid overexertion. Heart attacks from shoveling heavy snow are a leading cause of deaths during winter.</li> <li>• Walk carefully on snowy, icy, sidewalks.</li> </ul>
<b>V. Report of Findings</b>	Assemble relevant personnel to review effectiveness of action plan and reinforce lessons learned.
<b>VI. AP-8B Revision Dates</b>	

<b>AP 8C – Natural Event (Earthquake)</b>		
<b>AP Summary:</b>	This Action Plan applies to earthquake events. In general, these events occur without any lead times, making it impossible to take proactive measures. Response and recovery can be time consuming during such events, and they can involve loss of electrical power supply, damage of structures and equipment, disruptions of service, and injuries to utility personnel.	
<b>Initiation and Notification:</b>	<p>An earthquake usually occurs without any type of warning. Due to the suddenness, all personnel should attempt to find immediate shelter. This may include:</p> <ul style="list-style-type: none"> <li>• Standing in a doorway and bracing your hands and feet against each side.</li> <li>• Getting under a desk or heavy table.</li> <li>• Standing flat against an interior wall.</li> <li>• Do not seek cover under laboratory tables or benches as chemicals could spill and harm personnel.</li> </ul> <p>After an earthquake has stopped, initiate this earthquake AP 8C.</p>	<p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b> Radio, Internet</p> <p><b>Location</b> Administration Office</p>	<p><i>This equipment is available to assist in the execution of this AP.</i></p>
<b>Specific Activities:</b>	Monitor Situation	
<b>I. Assess the Problem</b>	<p>In general, the <a href="#">WUERM</a> will organize an assessment team to undertake the following activities:</p> <ul style="list-style-type: none"> <li>• Inspect all structures for obvious cracks and damage.</li> <li>• Assess condition of all electrical power feeds and switchgear.</li> <li>• If SCADA is working, immediately review system for all types of malfunctions, including telemetry, pressure in the distribution system, and operation of pumps and other equipment.</li> <li>• If buildings have any sign of damage, such as cracked walls, broken windows, downed power lines, do not enter, but wait for trained personnel.</li> <li>• If buildings appear safe, cautiously inspect condition of interiors for damaged equipment, leaks, chemical spills, etc.</li> </ul>	<p><i>Be prepared for aftershocks. Although smaller than the main shock, aftershocks cause additional damage and may bring weakened structures down. Aftershocks can occur in the first hours, days, weeks, or even months after the quake. Follow the same procedures as for earthquakes.</i></p>

<b>AP 8C - Natural Event (Earthquake)</b>		
	<ul style="list-style-type: none"> <li>• Communicate all findings via radio to Emergency Operations Center (EOC) or <a href="#">WUERM</a>, as appropriate.</li> <li>• Activate personnel accountability network to check for injury of staff.</li> </ul>	<i>See AP 7 for specific power loss procedures.</i>
<b>I. Assess the Problem</b>	Earthquakes can cause significant power outages because of the impact on outside generation and transmission lines. After a major earthquake, power might be interrupted for an extended period of time over the entire operations area. In this instance, power restoration will most probably be slow and, depending upon the infrastructure damage, localized. Some isolated areas could take considerably longer for power restoration than others.	
<b>II. Isolate and Fix the Problem</b>	<p>General earthquake procedures during an earthquake are as follows:</p> <ol style="list-style-type: none"> <li>1. Seek shelter under a deck, table, doorway, or inside wall.</li> <li>2. Once the shaking has stopped, gather valuables and quickly make your way outside. (DO NOT USE ELEVATORS.)</li> <li>3. Avoid electric wires, poles and equipment, once outside.</li> <li>4. Prepare for aftershocks.</li> </ol>	
<b>III. Monitoring</b>	<p>At all times, personnel should observe the following general steps:</p> <ul style="list-style-type: none"> <li>• Stay calm and await instructions from the designated official.</li> <li>• Keep away from overturned fixtures, windows, filing cabinets, and electrical power.</li> <li>• Provide assistance and/or call for medical help for injured employees as needed.</li> <li>• If major structural damage has occurred, order a complete evacuation. The building should be inspected by trained personnel for damage before reentry.</li> <li>• Protect from further danger by putting on long pants, a long-sleeved shirt, sturdy shoes, and work gloves.</li> <li>• Look for and extinguish small fires. Eliminate fire hazards.</li> <li>• Monitor the radio for instructions.</li> <li>• Expect aftershocks.</li> <li>• Use the telephone only to report life-threatening emergencies.</li> </ul>	

<b>AP 8C - Natural Event (Earthquake)</b>		
<b>IV. Recovery And Return to Safety</b>	<p>General earthquake procedures after an earthquake are as follows:</p> <ol style="list-style-type: none"> <li>1. Activate Emergency Operations Center (EOC).</li> <li>2. Contact emergency assistance (local police, local fire department, rescue squad, etc) as necessary to respond to injuries of staff.</li> <li>3. The [IO] is to notify customers, media, and state and local authorities if service is disrupted or if significant demand management is necessary.</li> <li>4. Inspect facilities for structural damage, including: buildings, storage tanks, pipelines, and process equipment. Consider the use of an outside engineering consultant.</li> <li>5. Prioritize and repair water main leaks.</li> <li>6. Contact neighboring purveyors for mutual aid arrangements, and open connections as needed.</li> <li>7. Respond to side effects (loss of power, fire chemical spills, etc.)</li> </ol>	
<b>V. Report of Findings</b>	Assemble relevant personnel to review effectiveness of action plan and reinforce lessons learned.	
<b>VI. AP-8C Revision Dates</b>		

<b>AP 9 - Water Supply Interruption</b>		
<b>AP Summary:</b>	This action plan applies to water supply interruptions. These events will vary in scale from compromised incremental supply volumes to complete, catastrophic loss of water supply. The ability for a utility to successfully respond to a catastrophic water supply interruption will be highly correlated to the existence of interconnections and alternative sources of supply.	
<b>Initiation and Notification:</b>	Catastrophic water supply interruptions will generally be identified by other events, such as physical equipment damage, severe weather or others, which are likely to have a specific direct action plan. Incremental interruptions due to longer-term events such as drought or acute loss of one source, will lead to a prescribed series of contingency measures, as outlined below.	<p><i>It is recognized that many utilities will already have an action plan in place to address this event.</i></p> <p><i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i></p>
<b>Equipment Identified:</b>	<p><b>Equipment</b></p> <p>SCADA system</p> <p><b>Location</b></p> <p>Treatment Plant</p>	<i>This equipment is available to assist in the execution of this AP.</i>
<b>Specific Activities:</b>	Monitor system for leaks, tank levels, pumping conditions.	
<b>I. Assess the Problem</b>	<p>There are a number of potential levels of severity involved in a water supply interruption. A series of stages of action corresponding to increasing impacts on water are:</p> <ul style="list-style-type: none"> <li>• Normal Conditions</li> <li>• Water Alert</li> <li>• Water Warning</li> <li>• Water Crisis</li> <li>• Water Emergency</li> </ul>	
<b>II. Isolate and Fix the Problem</b>	Each stage has specific customized definitions, in terms of percent of Water Supply reduction, with appropriate actions or restrictions at each stage. Utilities will have a series of escalating penalties for successive violations of restrictions. These stages are:	

<b>AP 9 – Water Supply Interruption</b>		
	<p><b>Normal Conditions</b> – Normal conditions apply. Water is available; but in arid environments there are specific watering days for various addresses or penalties for excess watering.</p>	
<p><b>II. Isolate and Fix the Problem</b></p>	<p><b>Water Alert</b> -- A 5% or greater reduction in water usage is to meet the immediate needs of customers. Voluntary conservation encouraged. The water shortage situation is explained to the public and voluntary water conservation is requested. LDPCSD maintains an ongoing public information campaign consisting of distribution of literature, speaking engagements, bill inserts, and conversation messages printed in local newspapers and on the web site.</p> <p><b>Water Warning</b> -- A 15% or greater reduction in water usage is to meet the immediate needs of customers. Water supply shortage is moderate. The utility aggressively continues its public information and education programs. Consumers are asked for a 15 percent or greater voluntary or mandatory water use reduction. Additional landscape irrigation restrictions may be implemented. Businesses may be asked not to serve water in restaurants unless requested.</p> <p><b>Water Crisis</b> – A 30% or greater reduction in water usage is to meet the immediate needs of customers. Water supply shortage is severe. Additional requirements may include: Dramatic landscape irrigation restrictions; Restrictions on use of potable water to fill or refill new swimming pools, artificial lakes, ponds, or streams until the water crisis is declared over; Prohibition of water use for ornamental ponds and fountains; Restrictions on washing of automobiles and equipment (such as requiring that it shall be done on the lawn or at a commercial establishment that uses recycled or reclaimed water); Restriction of flushing of sewers or fire hydrants to cases of emergency and essential operations, and; Introduction of a permanent water meter on existing non-metered services and/or flow restrictors on existing metered services at customer’s expense upon receipt of the second water violation.</p>	
<p><b>II. Isolate and Fix the Problem</b></p>	<p><b>Water Emergency</b> -- A 50% or greater reduction in water usage is to meet the immediate needs of customers. Water shortage is critical. Additional requirements may include:</p>	

<b>AP 9 – Water Supply Interruption</b>		
	<p>Disallowing all landscape irrigation; Disallowing potable water use for construction purposes such as dust control, compaction, or trench jetting.</p> <p>In addition to these incremental stages, the Utility should prepare for a catastrophic interruption of water supplies. A catastrophic event that constitutes a proclamation of a water shortage would be any event, either natural or manmade, that causes a severe water supply interruption, synonymous with or with greater severity than the “Water Warning” water supply shortage condition outlined above.</p>	
<b>III. Monitoring</b>	<p>Communication of water supply interruption stages should be handled according to the identified public notification procedures.</p> <p>Press releases should also be handled according to the identified utility procedures.</p>	<p><i>See ERP Section XX.</i></p> <p><i>See ERP Section XX for Press Releases.</i></p>
<b>IV. Recovery and Return to Safety</b>	<p>Alternative water supply options have been identified in the utility emergency response plan (ERP). In the event of a catastrophic, immediate need, it is likely these will be utilized. This includes information on local interconnections with neighboring sources, area water haulers, temporary storage options, etc.</p> <p>If there have been lines with no water or negative pressures, a precautionary boil order should be issued by the utility until line tests on two consecutive days show the lines to be safe. Chlorine residuals should be increased temporarily.</p> <p>The water system may have to valve off portions of the distribution system until above ground storage tanks are refilled. Valved off areas have the potential for external contamination to enter the system through leaking joints or cracked pipe. Before placing a valved off area back in service, the system should issue a precautionary boil order, increase the chlorine residual throughout the system and obtain safe bacteriological samples from representative areas of the system on two consecutive days. The precautionary boil order may be lifted once the required safe samples are obtained.</p> <p>The system should be repressurized slowly to avoid water hammer and the potential for damage to the lines.</p>	<p><i>See ERP Alternative Water Sources, Section XX.</i></p> <p><i>See boil order release Section XX, Press Releases.</i></p> <p><i>See boil order release Section XX, Press Releases.</i></p>

<b>AP 9 – Water Supply Interruption</b>		
	Air should be bled from lines as they refill since entrapped air can impede flows and may cause line damage.	
<b>V. Report of Findings</b>	In addition to completing the appropriate filings with local authorities and agencies, it is recommended that the Utility assemble the relevant personnel to review the effectiveness of the action plan and reinforce lessons learned in the process.	
<b>VI. AP-9 Revision Dates</b>		

<b>AP 10A - Bomb Threat (Telephone / In Person)</b>		
<b>AP Summary:</b>	This Action Plan applies to the receipt of a bomb threat via telephone or in person. It is important to develop this plan in counsel with the local police and the local fire department services.	
<b>Initiation and Notification:</b>	<p>Initiate this AP as soon as the bomb threat is received.</p> <p>As soon as possible, notify:</p> <ul style="list-style-type: none"> <li>• 911</li> <li>• <a href="#">GM, WUERM or Designated Personnel</a></li> </ul> <p>The WUERM should then notify others as appropriate. Examples include:</p> <ul style="list-style-type: none"> <li>• Local Fire Department</li> <li>• Local Police Department</li> <li>• FBI</li> <li>• ATF</li> </ul>	<i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i>
<b>Equipment Identified:</b>	<p><b>Equipment</b> Phones, e-mail, fax machine</p> <p><b>Location</b> Administration Office</p>	
<b>Specific Activities:</b>	Notify appropriate first response agency.	
<b>I. Assess the Problem</b>	As a rule, all bomb threats should be considered credible until proven otherwise.	<i>Due to the diversity of facilities, each utility is encouraged to undertake an audit of their own facilities and consult with local emergency services such as fire and police while creating their evacuation plan. If it is not possible during the creation, then certainly consult before instituting the plan.</i>
<b>II. Isolate and Fix the Problem</b>	<p><b>Threat received via Telephone</b></p> <ol style="list-style-type: none"> <li>1. Remain Calm</li> <li>2. If possible record the message</li> <li>3. Fill out <b>Bomb Threat Checklist</b> while performing the following:                             <ol style="list-style-type: none"> <li>a. Listen</li> <li>b. Be Calm and Courteous</li> <li>c. Keep the caller on the line as long as possible</li> </ol> </li> </ol>	<i>It is always desirable that more than one person listens in on the call. To do this, have a pre-established signaling system in place to engage another listener if possible. Not hanging up the phone may be useful to law enforcement authorities in tracing the call. Hanging up and dialing *57 (where available) may allow a trace of the call. Consult with <a href="#">LDPCSD</a> management and local law enforcement.</i>

<b>AP 10A - Bomb Threat (Telephone / In Person)</b>		
	<ul style="list-style-type: none"> <li>d. Ask him/her to repeat the message</li> <li>e. Record every word spoken by the person</li> <li>f. Do not speak to anyone unless directed to do so</li> <li>g. <b>WHEN</b> caller hangs up, <b>THEN</b> implement <b>LDPCSD</b> policy to either hang up or not hang up the phone.</li> </ul> <ol style="list-style-type: none"> <li>4. Notify the <b>WUERM</b> if not already done</li> <li>5. Call the local police (911 or the emergency number for your area) and report the threat immediately.</li> <li>6. Implement the <b>LDPCSD</b> policy on searching for the bomb.</li> <li>7. Implement the <b>LDPCSD</b> policy evacuation.</li> <li>8. <b>IF</b> evacuating building, <b>THEN</b> Take the <b>Bomb Threat Checklist</b> with you.</li> </ol>	<p><i>Develop a plan for conducting a bomb search. Establish time considerations in the plan commensurate with utility size and resources. For example, if time until detonation is less than ½ hour, immediate evacuation may be advisable. If greater than ½ hour a search should be conducted. Consult with the local police, local fire department, or other local authority to determine who will conduct the search. In most cases, because of their familiarity with the facility, the search is best conducted by utility personnel, however this requires that they be trained properly in search techniques. The police or fire department may be available to assist in the training or be able to provide advice as to who can provide the training.</i></p>
<p><b>II. Isolate and Fix the Problem</b></p>	<ul style="list-style-type: none"> <li>• Make a quick visual sweep of your area for any unusual items and proceed to a designated gathering area sufficiently located away from the building.</li> <li>• Direct any media questions to the <b>GM or other designated personnel</b></li> <li>• If a bomb is found note:             <ul style="list-style-type: none"> <li>• Exact location of the object</li> <li>• Size of object</li> <li>• Type of container or wrappings and marking on package</li> <li>• Any sound coming from object</li> </ul> </li> </ul> <p><b>Threat received in person:</b></p> <ol style="list-style-type: none"> <li>1. Cooperate with the individual or group.</li> <li>2. Try to get the attention of a co-worker.</li> <li>3. Co-worker call 911.</li> <li>4. Co-worker call <b>WUERM</b></li> </ol>	<p><i>Let the trained bomb technician determine what is or is not a bomb.</i></p> <p><i>Note that a bomber wishing to cause personal injuries could place a bomb near an exit normally used to evacuate and then call in the threat.</i></p>

<b>AP 10A - Bomb Threat (Telephone / In Person)</b>		
	<ol style="list-style-type: none"> <li>5. Create a description of the adversary using a <b>Suspect Description Form</b>. See ERP Appendix Section XX.</li> <li>6. Direct any media questions to the <b>GM</b> or <b>other designated personnel</b></li> </ol>	
<b>III. Monitoring</b>	<p>During a search of the building, rapid two-way communication is essential.</p> <ol style="list-style-type: none"> <li>1. Use existing installed telephones.</li> <li>2. Alert medical personnel to stand by in the event of an accident caused by the explosion of the devise.</li> <li>3. Alert fire department to stand by.</li> </ol> <p><b>In event of an explosion:</b></p> <ol style="list-style-type: none"> <li>1. Get out of the building as quickly as calmly as possible.</li> <li>2. <b>IF</b> items are falling from bookshelves or the ceiling, <b>THEN</b> get under a sturdy table or desk until the situation has stabilized enough for your safe passage.</li> <li>3. Ensure your own safety before trying to help others.</li> </ol>	<b><i>DO NOT USE RADIOS OR OTHER WIRELESS DEVICES DURING A SEARCH.</i></b> <i>The radio transmission energy can cause premature detonation of an electric initiator (blasting cap).</i>
<b>IV. Recovery and Return to Safety</b>	<b>IF</b> evacuated, <b>THEN</b> do not return to the building until it is determined safe by appropriate authorities.	
<b>V. Report of Findings</b>	Debrief after every bomb threat response to improve procedures.	<i>The Utility <b>GM</b> should file an internal report for the Utility's files and also provide information as requested to Local Law Enforcement and other outside agencies</i>
<b>VI. AP 10A Revision Dates</b>		

<b>AP 10B - Bomb Threat (Suspicious Package / Letter)</b>		
<b>AP Summary:</b>	This Action Plan applies to the receipt of a suspicious package / letter or a bomb found at the utility. It is important to develop this plan in counsel with your local police and local fire department.	
<b>Initiation and Notification:</b>	<p>Initiate this AP as soon as a suspicious package or letter has been discovered As soon as possible, notify:</p> <ul style="list-style-type: none"> <li>• 911</li> <li>• <a href="#">GM, WUERM or Designated Personnel</a></li> </ul> <p>The WUERM should then notify others as appropriate. Examples include:</p> <ul style="list-style-type: none"> <li>• Local Fire Department</li> <li>• Local Police Department</li> <li>• FBI</li> <li>• ATF</li> </ul>	<i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i>
<b>Equipment Identified:</b>	<p><b>Equipment</b> Phones, e-mail, fax machine</p> <p><b>Location</b> Administration Office</p>	
<b>Specific Activities</b>	Notify appropriate first response agency.	
<b>I. Assess the Problem</b>	<p>Determining if a package is suspicious involves a careful evaluation. Some points to consider are:</p> <ul style="list-style-type: none"> <li>• Incorrect address and or titles</li> <li>• Titles but no names</li> <li>• Visual distractions</li> <li>• Possess a foreign postmark, airmail, or special delivery markings (Personal, Confidential, Special Delivery, Open By Addressee Only)</li> <li>• Return address irregularities, including no address, one not matching the postmark, or not familiar</li> <li>• Badly typed or poorly written addresses</li> <li>• A package not expected by the addressee</li> <li>• Deficient or excessive postage, unusual stamps</li> <li>• Packages within packages</li> </ul>	<p><i>Most bombs are homemade and can look like nearly anything. Suspect anything that looks unusual.</i></p> <p><i>Although the presence of one of these conditions does not mean, for certain, that there is a bomb in the package, check further if any of these indicators are present. Find out if the recipient is expecting the package, recognizes the return address, and if the package is the right size for the item expected. Verify the return address. If any of these comes up a “no,” investigate further and alert <a href="#">WUERM</a>, and police.</i></p>
<b>I. Assess the Problem</b>	<ul style="list-style-type: none"> <li>• Be from a company/person you do not recognize</li> </ul>	<b><i>DO NOT OPEN SUSPICIOUS PACKAGES and / or</i></b>

<b>AP 10B - Bomb Threat</b> <b>(Suspicious Package / Letter)</b>		
	<ul style="list-style-type: none"> <li>• Be hand delivered by a person other than normal delivery persons, especially by a person using a non-delivery type vehicle</li> <li>• Foul Odor</li> <li>• Left behind by someone you have not seen before</li> <li>• Left behind by someone known to carry a grudge against you, your facility, someone at your facility</li> <li>• Oily, stained, or crystalization on the outside</li> <li>• Rigid or bulky</li> <li>• Odd shaped, unevenly-weighted, lopsided, or lumpy</li> <li>• Possess protruding wires or tinfoil</li> <li>• Over-wrapped with excessive securing material such as tape or string</li> <li>• Feel (See notes section to the right)</li> </ul>	<p><b>LETTERS.</b></p> <p><i>Packages within packages may be an attempt to mask or hide the actual explosive device</i></p> <p><i>If the bomb contains nitrogen based fertilizers there will be an odor that people can smell. The next time you fertilize your lawn or garden, smell the fertilizer. This is similar to the odor of nitrogen based bomb components.</i></p> <p><i>Chemicals used may “sweat” that in turn stain the package wrapper.</i></p> <p><i>Letters have a normal ‘feel’. Those that contain devices may not ‘feel’ right as the presence of plastic or metallic components may alter the normal ‘feel’ of a letter.</i></p>
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>1. Remain Calm.</li> <li>2. Do not touch or move package.</li> <li>3. Notify the <b>VERM</b> if not already done.</li> <li>4. While waiting for instructions, clear the area around the object and try to determine ownership. (Did anyone see who left this here?)</li> </ol>	<p><i>Let the trained bomb technician determine what is or is not a bomb.</i></p>
<b>II. Isolate and Fix the Problem</b>	<ol style="list-style-type: none"> <li>5. Notify police.</li> <li>6. Implement the <b>LDPCSD</b> policy on evacuation.</li> <li>7. Direct any media questions to the <b>GM</b> or <b>other designated personnel</b></li> </ol> <p><b>If a bomb is found note:</b></p> <ul style="list-style-type: none"> <li>• Exact location of the object</li> <li>• Size of object</li> <li>• Type of container or wrappings and marking on package</li> <li>• Any sound coming from object</li> </ul>	<p><b>DO NOT USE RADIOS OR OTHER WIRELESS DEVICES NEAR A SUSPECTED BOMB.</b></p> <p><i>The radio transmission energy can cause premature detonation of an electric initiator (blasting cap)</i></p>

<b>AP 10B - Bomb Threat</b> <b>(Suspicious Package / Letter)</b>		
<b>III. Monitoring</b>	<b>In event of an explosion</b> <ul style="list-style-type: none"> <li>• Get out of the building as quickly as calmly as possible.</li> <li>• <b>IF</b> items are falling from bookshelves or the ceiling, <b>THEN</b> get under a sturdy table or desk until the situation has stabilized enough for your safe passage.</li> <li>• Ensure your own safety before trying to help others.</li> </ul>	
<b>IV. Recovery and Return to Safety</b>	<b>IF</b> evacuated, <b>THEN</b> do not return to the building until it is determined safe by appropriate authorities.	
<b>V. Report of Findings</b>	Debrief after every bomb threat response to improve procedures.	<i>The Utility GM should file an internal report for the Utility's files and also provide information as requested to Local Law Enforcement and other outside agencies</i>
<b>VI. AP 10B Revision Dates</b>		

<b>AP 10C - Bomb Threat (Written Threat Received)</b>		
<b>AP Summary:</b>	This Action Plan applies to the receipt of a written bomb threat. It is important to develop this plan in counsel with your local police and local fire department.	
<b>Initiation and Notification:</b>	<p>Initiate this AP as soon as a suspicious package or letter has been discovered As soon as possible, notify:</p> <ul style="list-style-type: none"> <li>• 911</li> <li>• <a href="#">GM, WUERM or Designated Personnel</a></li> </ul> <p>The WUERM should then notify others as appropriate. Examples include:</p> <ul style="list-style-type: none"> <li>• Local Fire Department</li> <li>• Local Police Department</li> <li>• FBI</li> <li>ATF</li> </ul>	<i>Notification phone numbers can be obtained from the Organization Contact List in the Appendices as well as from Section XX of the ERP.</i>
<b>Equipment Identified:</b>	<p><b>Equipment</b> Phones, e-mail, fax machine</p> <p><b>Location</b> Administration Office</p>	
<b>Specific Activities</b>	Notify appropriate first response agency.	
<b>I. Assess the Problem</b>	As a rule, all bomb threats should be considered credible until proven otherwise.	
<b>II. Isolate and Fix the Problem</b>	<p><b>Written Threats:</b></p> <ol style="list-style-type: none"> <li>1. Remain Calm.</li> <li>2. Save all materials, including any envelope or container.</li> <li>3. Once recognized as a bomb threat, avoid further handling.</li> <li>4. Leave the message where found.</li> <li>5. Do not alarm others; however contact <a href="#">WUERM</a> immediately.</li> <li>6. Contact the local police.</li> <li>7. Implement the <a href="#">LDPCSD</a> policy on searching for the bomb.</li> <li>8. Implement the <a href="#">LDPCSD</a> policy on</li> </ol>	<p><i>Every effort must be made to retain evidence such as fingerprints, handwriting, or typewriting, paper, and postal marks. These will prove essential in tracing the threat and identifying the writer.</i></p> <p><i>Let a trained bomb technician determine what is or is not a bomb. Develop a plan for conducting a bomb search. Establish time considerations in the plan commensurate with utility size and resources. For example, if time until detonation is less than ½ hour, immediate evacuation may be advisable. If greater than ½ hour a search should be conducted. Consult with the police, fire department, or other local authority to determine who will conduct the search. ## System and Facility Information

---

## DISTRIBUTION SYSTEM, PRESSURE BOUNDARY MAP

## PROCESS FLOW DIAGRAM

## SCADA SYSTEM/PROCESS CONTROL SYSTEMS OPERATIONS

## SYSTEM SHUT DOWN AND ISOLATION PLAN

SYSTEM COMPONENT	METHOD OF SHUTDOWN OR ISOLATION		LOCATION & PERSON TO PERFORM SHUTDOWN OR ISOLATION		SPECIAL REQUIREMENTS
	Automated	Manual	SCADA Controlled	Manual Operation	
INTAKE FACILITY LAKE MCCLURE	SCADA	Manual Valve in Meter Vault	Water Plant Control Room / Operator	Utility Worker	Locked Access - Key required road and vault entry.
TREATMENT PLANT	SCADA	Manual valves in Distribution Vault	Water Plant Control Room / Operator	Utility Worker	Vault Lid Puller
STORAGE TANKS	SCADA	Manual valves in Distribution Vault	Water Plant Control Room / Operator	Utility Worker	Locked Access - Key required for gate access, Vault Lid Puller
HYDRO-PNEUMATIC STATIONS	Not-Automated	Manual valves, Electric Switches		Utility Worker	Locked Access - Key required for gate, electric panel

## Instructions for System Shut Down and Isolation Plan Table

The purpose of the System Shut Down and Isolation Plan is to provide clear and easy-to-understand guidance regarding how and where to isolate and/or shut down portions the water system to prevent the movement of contamination.

1. System Components – Enter all physical assets that could potentially be the introduction point for a contaminant. The System Components list can be imported from the VSAT physical asset list.
2. Method of Shut Down or Isolation – Describe automated and manual methods by which shutdown or isolation of the asset can occur. In cases where automated controls are available, be sure to list manual control points (valves, power cut-offs, etc.) that can be used if the SCADA system is not functioning.
3. Location & Person to Perform Shut Down or Isolation – Describe the individual (position, title, workplace) who will actually perform the SCADA controlled or manual shut down or isolation procedures. This table will serve as a reference for the WUERM during emergency situations and/or contamination incidents, so it is important to be as specific as possible regarding who will actually be executing the shut down or isolation order, and where the person can be found.
4. Special Requirements – Describe any special requirements that need to be considered in order to perform the shut down or isolation of the asset. Examples of special requirements include; confined space certification, PPE, entry codes, keys, specialized tools and safety equipment (wrenches, ladders, harnesses, flashlights, etc.), and locations of power cut-offs.

## CA Dept. of Health Services Recommended Emergency Sampling Kit

<u>Quantity Per Kit</u>	<u>Total Quantity Needed (50 Kits)</u>	<u>Size</u>	<u>Description</u>	<u>Supplier</u>	<u>Page No.</u>	<u>MFG Number</u>	<u>Catalog No.</u>	<u>Quantity to Order</u>	<u>Unit Price</u>	<u>Extended Price</u>
3	150	1 L	Wheaton Glass 24/case	VWR	190	219820	16159-903	7	\$166.46	<b>\$1,165.22</b>

## PUBLIC NOTICE

### CONSUMER ALERT DURING WATER OUTAGES OR PERIODS OF LOW PRESSURE

1. If you are experiencing water outages or low water pressure, immediately discontinue any non-essential water usage. This includes all outdoor irrigation and car washing. Minimizing usage will reduce the potential for the water system to lose pressure or completely run out of water. Please notify your water system of the outage or low pressure.
2. If the water looks cloudy or dirty, you should not drink it. Upon return of normal water service, you should flush the hot and cold water lines until the water appears clear and the water quality returns to normal.
3. If you are concerned about the water quality or are uncertain of its safety, you may add eight drops of household bleach to one gallon of water and let it sit for 30 minutes or alternatively, if you are able, water can be boiled for one minute at a rolling boil to ensure its safety.
4. Use of home treatment devices does not guarantee the water supply is safe after low pressure situations.
5. Do not be alarmed if you experience higher than normal chlorine concentrations in your water supply since the California Department of Health Services is advising public water utilities to increase chlorine residuals in areas subject to low pressure or outages.
6. The California Department of Health Services has also advised public water systems to increase the bacteriological water quality monitoring of the distribution system in areas subject to low pressure. They may be collecting samples in your area to confirm that the water remains safe. You will be advised if the sampling reveals a water quality problem.
7. Your water system is committed to make certain that an adequate quantity of clean, wholesome, and potable water is delivered to you. We recommend that you discuss the information in this notice with members of your family to ensure that all family members are prepared should water outages or low water pressure occur.

FECHA:

## ORDEN DE HERVIR EL AGUA

### Hierva su Agua antes de Usarla

Falta de seguir este aviso podría tener resultados estómago o enfermedad intestinal

*Debido a la [falta de agua (water outage), falta de electricidad (power outage), inundación (flood), incendio (fire), temblor (earthquake) or other emergency], durante [date, month, etc.], el Departamento de California de Servicios de Salud en conjunción con la [City, water system name] y el Condado de [County name] esta aconsejando a todos usuarios de el sistema de [water system name] que hiervan el agua de canilla o usen agua embotellada para beber y cocinar como medida de seguridad.*

#### Que debo hacer?

**NO BEBA EL AGUA SIN ANTES HERVIRLA.** Hierva toda el agua, **déjela hervir por un minuto**, y déjela reposar antes de usarla, o utilice agua embotellada. Agua hervida o embotellada debe ser usada para beber y para preparar la comida hasta el próximo aviso. **Hierviendo morta a bacteria y otros organismos en el agua.** [or Este es el metodo preferido para asegurar que el agua esta segura para beber.]

#### Optional alternative to include for prolonged situations where it fits.

- Otro método de purificación del agua para los residentes que no tengan gas o electricidad disponibles es utilizar blanqueador líquido de uso doméstico (Clorox®, Purex®, etc.). Para hacerlo, añada 8 gotas (o 1/4 cucharadita) de blanqueador por galón de agua clara, o 16 gotas (o media cucharadita) por galón de agua turbia, mézclelo bien y déjelo descansar 30 minutos antes de utilizarlo. Este procedimiento de purificación causa que el agua huela y tenga sabor a cloro, lo que indica que ha sido desinfectada de manera adecuada.
- También se puede utilizar tabletas de purificación del agua siguiendo las instrucciones del fabricante.
- **Optativo:** Hay agua potable disponible en los siguientes sitios: [List locations]  
Traiga un recipiente limpio para el agua (con una capacidad máxima de 5 galones).

Le informaremos cuando las pruebas demuestren que no hay bacterias y que usted ya no necesita hervir su agua. Anticipamos que resolveremos el problema el [date of expected resolution in Spanish day-month-year].

Para mas información, por favor póngase en contacto con:

Contacto del sistema de agua: [contact name] al [phone number] o escribiendo a [mailing address].

Departamento de Salud de California: XXX-XXX-XXXX.

Condado de [county name]: [XXXXXX County at (XXX) XXX-XXXX].

Por favor comparta esta información con otros que pueden tomar de esta agua, colocando este aviso en lugares visibles, o remitiéndolo por correo, o entregándolo manualmente. Es de particular interés distribuir este aviso ampliamente si usted lo recibe representando un negocio, un hospital u hogar de infantes u hogar de ancianos o comunidad residencial.

## UNSAFE WATER ALERT

**Lake Don Pedro Community Services District**  
**water is possibly contaminated**  
**with [an unknown substance]**

### DO NOT DRINK YOUR WATER

**Failure to follow this advisory could result in illness.**

An unknown substance has been added to the drinking water supplied by the [Lake Don Pedro CSD](#) due to a recent [\[intrusion; break-in\]](#) at [\[one of the wells; our treatment plant; storage tank; specific facility\]](#). The California Department of Health Services, [\[County Name\]](#) County Health Department, and [Lake Don Pedro CSD](#) Water System are advising residents of [the system](#) to NOT USE THE TAP WATER FOR DRINKING AND COOKING UNTIL FURTHER NOTICE.

#### What should I do?

- **DO NOT DRINK YOUR TAP WATER---USE ONLY BOTTLED WATER.** Bottled water should be used for all drinking (including baby formula and juice), brushing teeth, washing dishes, making ice and food preparation **until further notice**.
- **DO NOT TRY AND TREAT THE WATER YOURSELF.** Boiling, freezing, filtering, adding chlorine or other disinfectants, or letting water stand will not make the water safe.

#### OPTIONS

- **Optional:** Potable water is available at the following locations: [\[List locations\]](#)  
Please bring a clean water container (5 gallons maximum capacity).

**We will inform you when tests show that the water is safe again. We expect to resolve the problem within [\[estimated time frame\]](#).**

## BOIL WATER ORDER

Este informe contiene información muy importante sobre su agua potable.  
Tradúzcalo o hable con alguien que lo entienda bien.

### BOIL YOUR WATER BEFORE USING

**Failure to follow this advisory could result in stomach or intestinal illness.**

Due to the recent event [e.g., water outage, power outage, flood, fire, earthquake or other emergency situation], the California Department of Health Services in conjunction with the [County Name] County Health Department, and [Water System name] Water System are advising residents of [City, Town, System] to use boiled tap water or bottled water for drinking and cooking purposes as a safety precaution.

**DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST.** Bring all water to a boil, **let it boil for one (1) minute**, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking and food preparation **until further notice**. Boiling kills bacteria and other organisms in the water. [or This is the preferred method to assure that the water is safe to drink.]

Optional alternative to include for prolonged situations where it fits.

- **An alternative method of purification for residents that do not have gas or electricity available is to use fresh liquid household bleach (Clorox®, Purex®, etc.). To do so, add 8 drops (or 1/4 teaspoon) of bleach per gallon of clear water or 16 drops (or 1/2 teaspoon) per gallon of cloudy water, mix thoroughly, and allow to stand for 30 minutes before using. A chlorine-like taste and odor will result from this purification procedure and is an indication that adequate disinfection has taken place.**
- Water purification tablets may also be used by following the manufacturer's instructions.
- **Optional:** Potable water is available at the following locations: [List locations]  
Please bring a clean water container (5 gallons maximum capacity).

We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem within [estimated time frame].

For more information call:

Water Utility contact: Customer Service (209) 852-2331 After Hours Pager (209) 579-6819  
California Department of Health Services at: Merced District Office, Carl Carlucci, D.E. (559) 447-3300

Local County Health Department: Mariposa County Health (209) 966-3689  
Tuolumne County Health (209) 533-7400

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing

homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

**Appendix E**  
**California Statewide Emergency Notification**  
**Plan**

---

**State of California—Health and Human Services Agency  
DEPARTMENT OF HEALTH SERVICES**

**ARNOLD SCHWARZENEGGER**  
Governor

**WATER QUALITY EMERGENCY NOTIFICATION PLAN**

Name of Utility	Lake Don Pedro Community Services District
Physical Location/Address:	9751 Merced Falls Rd. La Grange, Ca. 95329

The following persons have been designated to implement the plan upon notification by the State Department of Health Services that an imminent danger to the health of the water users exists:

Water Utility: Contact Name & Title	Email Address	Day	Telephone	
			Evening	Cell
1. Bob Kent / General Manager	bob@ldpcsd.org	(209) 852-2331	(209) 852-2571	(209) 606-0578
2. Jason McCulloch/ Utility Worker		(209) 852-2331	(209) 852-9217	
3. Dan Siria/ Utility Worker		(209) 852-2331	(209) 852-2871	
4. Wes Snyder/ Director		(209) 852-2331	(209) 852-8270	

The implementation of the plan will be carried out with the following State and County Health Department personnel:

State & County Health Departments: Contact Name & Title	E-mail Address	Telephone	
		Day	Evening
1. Carl Carlucci, District Engineer California Department of Health Services	ccarlucc@dhs.ca.gov	(559) 447-3132 (559) 280-6363	(559) 434-8541
2. Kassy Smith California Department of Health Services	ksmith6@dhs.ca.gov	(559) 447-3304	
3. County Environmental Health Department Local Primacy Agency	Mariposa County Health Tuolumne County Health	(209) 966-3689 (209) 533-7400	

4. If the above personnel cannot be reached, contact:

**Office of Emergency Services Warning Center (24 hrs) (800) 852-7550 or (916) 845-8911**  
When reporting a water quality emergency to the Warning Center, please ask for the California Department of Health Services – Drinking Water Program Duty Officer.

**NOTIFICATION PLAN**

**Attach a written description of the method or combination of methods to be used** (radio, television, door-to-door, sound truck, etc.) **to notify customers in an emergency.** For each section of your plan give an estimate of the time required, necessary personnel, estimated coverage, etc. Consideration must be given to special organizations (such as schools), non-English speaking groups, and outlying water users. Ensure that the notification procedures you describe are practical and that you will be able to actually implement them in the vent of an emergency. Examples of notification plans are attached for large, medium and small communities.

Report prepared by:

\_\_\_\_\_, GENERAL MANAGER

May 9, 2005

Signature and Title

Date

### **PLAN I (Medium Community)**

During regular working hours our people will contact the news media at television station KCRA to broadcast the necessary warning. The local radio stations will also be contacted. The television and radio personnel are available at all hours. As a follow-up measure, we will also contact the Modesto Bee, Union Democrat, Mariposa Gazette and Foothill Express local newspapers that serve the community.

The warnings will be issued in both English and Spanish to cover all members of the community.

A special telephone answering service can also be quickly set up at the utility headquarters (using the regular company numbers) to answer questions that will come in from consumers. Questions are anticipated, especially from the community area, because that area is served by a single water utility.

It is anticipated that the time for notification to the television and radio audiences will be very short. The areas served by handbill and sound truck will also be notified within 2 hours. For notification to be issued in other than normal hours the same media will be contacted and an announcement will be scheduled for as long as is necessary. A sound truck(s) will be used in the early morning hours to quickly alert the people not listening to their radio or television.

### **PLAN II (Small Community)**

Our community is very small and the most efficient means of notification will be both sound truck and handbill. It is estimated that the entire service area can be covered in less than four hours.

### **PLAN III (Large Community)**

The same plan as implemented in Plan I should be used here with the exceptions noted. All the news media will be contacted in the entire metropolitan area. This includes all television and radio stations and all local and general area newspapers. Maps have been prepared to be distributed to the media to locate the boundaries of the water company. This system is large enough that it may only be necessary to notify some of the water users. This information will be transmitted to the media and an answering service at the water company will respond to consumers' calls. Unless the problems are limited to isolated areas it is unreasonable to assume that contact can be made through sound truck or handbill.

**Appendix F**  
**Incident Reports and Forms**

---

## Written Threat Report Form

### INSTRUCTIONS

The purpose of this form is to summarize significant information from a written threat received by a drinking water utility. This form should be completed by the WUERM or an individual designated by incident command to evaluate the written threat. The summary information provided in this form is intended to support the threat evaluation process; however, the completed form is not a substitute for the complete written threat, which may contain additional, significant details.

The written threat itself (e.g., the note, letter, e-mail message, etc.) may be considered evidence and thus should be minimally handled (or not handled at all) and placed into a clean plastic bag to preserve any forensic evidence.

**Remember, tampering with a drinking water system is a crime under the SDWA Amendments!**

### SAFETY

A suspicious letter or package could pose a threat in and of itself, so caution should be exercised if such packages are received. The US Postal Service has issued guidance when dealing with suspicious packages ([http://www.usps.com/news/2001/press/pr01\\_1022gsa.htm](http://www.usps.com/news/2001/press/pr01_1022gsa.htm)).

**How was the note prepared?**

- Handwritten in print  Handwritten in script  Computer typed
- Machine typed  Spliced (e.g., from other typed material)
- Other: \_\_\_\_\_
- If handwritten, does writing look familiar?  Yes  No

**Language:**

- Clear English  Poor English
- Another language: \_\_\_\_\_
- Mixed languages: \_\_\_\_\_

**Writing Style**

- Educated  Proper grammar  Logical
- Uneducated  Poor grammar/spelling  Incoherent
- Use of slang  Obscene
- Other: \_\_\_\_\_

**Writing Tone**

- Clear  Direct  Sincere
- Condescending  Accusatory  Angry
- Agitated  Nervous  Irrational
- Other: \_\_\_\_\_

**SIGNOFF**

Name of individual who received the threat:

Print name \_\_\_\_\_ Date/Time: \_\_\_\_\_

Signature \_\_\_\_\_

Name of person completing form (if different from written threat recipient):

Print name \_\_\_\_\_ Date/Time: \_\_\_\_\_

Signature \_\_\_\_\_

## IT Incident Response and Reporting Checklist

Date \_\_\_\_\_ Time \_\_\_\_\_

Status:

- Site Under Attack
- Past Incident
- Repeated Incidents
- Unresolved

**Contact Information:**

Name \_\_\_\_\_  
 Title \_\_\_\_\_  
 Utility \_\_\_\_\_  
 Direct-dial phone \_\_\_\_\_  
 E-mail \_\_\_\_\_  
 Location / Site involved \_\_\_\_\_  
 Street Address \_\_\_\_\_  
 City \_\_\_\_\_  
 State/ZIP \_\_\_\_\_

1. What is the nature of the emergency? (Check all that apply)
  - Denial of Service attack
  - Unauthorized electronic monitoring
  - Network intrusion
  - Insider attack
  - Probe/scan
  - Malicious code (virus, Trojan horse, worm)
  - Website defacement
  - Other (explain)
2. Is there just one, or more than one, incident involved simultaneously?
3. Is this a single or multi-site incident?
4. What is the extent of penetration / infection?
5. Estimate the duration of attack
6. What is the entry point of the incident (network, the phone line, etc)?
7. What resources will be required to deal with this incident? (A Computer Emergency Response Team with a forensic expert might be needed immediately to analyze a major incident versus simply disconnecting the compromised equipment from the Internet for later analysis)
8. What is the source of the attack?
9. What is the target of the attack?
10. Impact of attack
11. Has there been a loss or compromise of business data?
12. What type of data has already been compromised or is at risk?

13. How critical is this data?
14. Affect on customers (Customers might be sensitive, based on the intensity level of the intellectual property loss. It could be a violation of privacy legislation versus a serious theft of software property, critically affecting a customer's enterprise-level business)
15. Estimate system downtime
16. Document damage to systems
17. Estimate financial loss
18. Has there been damage to the integrity or delivery of water or services?
19. Describe
20. Other utility systems affected
21. Severity of attack (include financial loss)
  - Low
  - Medium
  - High
22. Did the attacker gain root, administrative or system access?
23. How was the incident detected?
  - Intrusion detection system or audit logs
  - External complaint
  - User report
  - Other
24. What are the known symptoms?
25. What utility areas are affected?
26. What systems are affected?

Gather as much information as possible about the systems, including suspected systems. For example:

  - Operating system
  - Platform
  - Applications
  - IP addresses
  - Associated or suspected user IDs
  - Most recent changes applied
  - Other related items
27. Are the backups of the perceived affected systems available (provide all of the information regarding online, onsite, or offsite backups)?

See [www.cert.org/tech\\_tips/intruder\\_detection\\_checklist.html](http://www.cert.org/tech_tips/intruder_detection_checklist.html) for more information on detecting an intruder.

## Maintaining Crime Scene Integrity\*

Security breaches and suspicious activity need to be evaluated to determine if the actions are a result of “normal” activity, such as a construction crew working in the area, or the result of activity that could result in an intentional threat to the safety or security of the facility and its operations.

- As soon as **you** recognize that the threat is/was intentional and particularly if the actions of the threatening individuals are suspected to have been successful, **you** must notify facility management **General Manager**.
- The **GM** should immediately notify the local law enforcement agency responsible for criminal investigation at the facility as soon as they have verified a credible threat.
- **No personnel** from **LDPCSD** facility should enter the area where any possible criminal activity might have occurred so as not to disturb the area. All signs of inappropriate entrance to the facility and any physical activity of the suspects must be available for evaluation by law enforcement without any disturbance.
- **LDPCSD facility staff** and/or **law enforcement** may collect water samples prior to the collection of physical evidence.
- **LDPCSD facility staff** should collect samples outside of the boundaries of the suspected crime scene, if possible, to avoid concerns about the integrity of the crime scene.
- The **LDPCSD facility GM** should pre-designate a qualified laboratory that can assist in analysis, if the sample is suspected to contain water that has been intentionally contaminated, to insure chain of evidence custody. Law enforcement may require the collection of an additional sample set to be analyzed by their designated lab.
- **LDPCSD facility staff** should be aware of possible physical evidence of contamination that might include discarded PPE, equipment (such as pumps and hoses), or containers with residual material. Special care should be taken by facility personnel to avoid moving or disturbing any potential physical evidence.
- **LDPCSD facility staff** should notify **GM** of any obvious physical evidence of contamination.
- **LDPCSD facility staff** should not handle any physical evidence except at the direction of the appropriate law enforcement agency.
- Any photographs or videos taken by **LDPCSD facility staff** should be reported to law enforcement for proper handling to ensure integrity of the evidence.

The **LDPCSD GM** if appropriate, should clearly designate the area of suspected criminal activity to assure that facility personnel do not inadvertently enter the area and disturb evidence.

The **LDPCSD GM** can instruct security personnel to stand by and/or lock doors/gates, and/or string tape or rope to restrict entrance, as appropriate.

The **GM** should balance the needs of both the public health concerns and the concerns of possible criminal activity in their decisions to protect the crime scene.

*\* Adapted from EPA Response Protocol Toolbox: Planning for and Responding to Drinking Water Contamination Threats and Incidents Module 3: Site Characterization and Sampling Guide Section 3.6.*

## Phone Threat Report Form

### INSTRUCTIONS

This form is intended to be used by utility staff that regularly answer phone calls from the public (e.g., call center operators). The purpose of this form is to help these staff capture as much information from a threatening phone call while the caller is on the line. It is important that the operator keep the caller on the line as long as possible in order to collect additional information. Since this form will be used during the call, it is important that operators become familiar with the content of the form. The sections of the form are organized with the information that should be collected during the call at the front of the form (i.e., Basic Call Information and Details of Threat) and information that can be completed immediately following the call at the end of the form (i.e., the description of the caller). The information collected on this form will be critical to the threat evaluation process.

**Remember, tampering with a drinking water system is a crime under the SDWA Amendments**

### THREAT NOTIFICATION

Name of person receiving the call: \_\_\_\_\_

Date phone call received: \_\_\_\_\_ Time phone call received: \_\_\_\_\_

Time phone call ended: \_\_\_\_\_ Duration of phone call: \_\_\_\_\_

Originating number: \_\_\_\_\_ Originating name: \_\_\_\_\_

*If the number/name is not displayed on the caller ID, press \*57 (or call trace) at the end of the call and inform law enforcement that the phone company may have trace information.*

Is the connection clear?  Yes  No

Could call be from a wireless phone?  Yes  No

### DETAILS OF THREAT

Has the water already been contaminated?  Yes  No

Date and time of contaminant introduction known?  Yes  No

Date and time if known: \_\_\_\_\_

Location of contaminant introduction known?  Yes  No

Site Name: \_\_\_\_\_

Type of facility

- |  |  |   |
|--|--|---|
| <input type="checkbox"/> Source water        | <input type="checkbox"/> Treatment plant       | <input type="checkbox"/> Pump station             |
| <input type="checkbox"/> Ground storage tank | <input type="checkbox"/> Elevated storage tank | <input type="checkbox"/> Finished water reservoir |
| <input type="checkbox"/> Distribution main   | <input type="checkbox"/> Hydrant               | <input type="checkbox"/> Service connection       |
| <input type="checkbox"/> Other _____         |  |   |

Address: \_\_\_\_\_

Additional Site Information: \_\_\_\_\_

Name or type of contaminant known?  Yes  No

Type of contaminant

- |                                   |                                     |                                       |

**CALLER INFORMATION**

**Basic Information:**

Stated name: \_\_\_\_\_  
 Affiliation: \_\_\_\_\_  
 Phone number: \_\_\_\_\_  
 Location/address: \_\_\_\_\_

**Caller's Voice:**

Did the voice sound disguised or altered?  Yes  No  
 Did the call sound like a recording?  Yes  No  
 Did the voice sound?  Male /  Female  Young /  Old  
 Did the voice sound familiar?  Yes  No

If 'Yes,' who did it sound like? \_\_\_\_\_

Did the caller have an accent?  Yes  No

If 'Yes,' what nationality? \_\_\_\_\_

How did the caller sound or speak?

Educated  Well spoken  Illiterate  
 Irrational  Obscene  Incoherent  
 Reading a script  Other \_\_\_\_\_

What was the caller's tone of voice?

Calm  Angry  Lispings  Stuttering/broken  
 Excited  Nervous  Sincere  Insincere  
 Slow  Rapid  Normal  Slurred  
 Soft  Loud  Nasal  Clearing throat  
 Laughing  Crying  Clear  Deep breathing  
 Deep  High  Raspy  Cracking  
 Other \_\_\_\_\_

Were there background noises coming from the caller's end?

Silence  
 Voices describe \_\_\_\_\_  
 Children describe \_\_\_\_\_  
 Animals describe \_\_\_\_\_  
 Factory sounds describe \_\_\_\_\_  
 Office sounds describe \_\_\_\_\_  
 Music describe \_\_\_\_\_  
 Traffic/street sounds describe \_\_\_\_\_  
 Airplanes describe \_\_\_\_\_  
 Trains describe \_\_\_\_\_  
 Ships or large boats describe \_\_\_\_\_

## Public Health Information Report Form Instructions

*The purpose of this form is to summarize significant information about a public health episode that could be linked to contaminated water. This form should be completed by the WUERM or an individual designated by incident command. The information compiled in this form is intended to support the threat evaluation process. In the case of a threat warning due to a report from public health, it is likely that the public health agency will assume incident command during the investigation. The drinking water utility will likely play a support role during the investigation, specifically to help determine whether or not water might be the cause.*

### PUBLIC HEALTH NOTIFICATION

**Date and Time of notification:** \_\_\_\_\_

**Name of person who received the notification:** \_\_\_\_\_

#### Contact information for individual providing the notification

Full Name: \_\_\_\_\_

Title: \_\_\_\_\_

Organization: \_\_\_\_\_

Address: \_\_\_\_\_

Day-time phone: \_\_\_\_\_

Evening phone: \_\_\_\_\_

Fax Number: \_\_\_\_\_

E-mail address: \_\_\_\_\_

**Why is this person contacting the drinking water utility?** \_\_\_\_\_

**Has the state or local public health agency been notified?**     Yes     No

If "No," the appropriate public health official should be immediately notified.

### DESCRIPTION OF PUBLIC HEALTH EPISODE

#### Nature of public health episode:

Unusual disease (mild)                       Unusual disease (severe)                       Death

Other: \_\_\_\_\_

#### Symptoms:

Diarrhea     Vomiting/nausea     Flu-like symptoms

Fever     Headache     Breathing difficulty

Other: \_\_\_\_\_

Describe symptoms: \_\_\_\_\_

\_\_\_\_\_

**Causative Agent:**     Known                       Suspected                       Unknown

*If known or suspected, provide additional detail below*

Chemical                       Biological                       Radiological

Describe \_\_\_\_\_

\_\_\_\_\_

Estimate of time between exposure and onset of symptoms: \_\_\_\_\_

**Exposed Individuals:**

Location where exposure is thought to have occurred

- Residence                       Work                       School  
 Restaurant                       Shopping mall                       Social gathering  
 Other: \_\_\_\_\_

Additional notes on location of exposure: \_\_\_\_\_

Collect addresses for specific locations where exposure is thought to have occurred.

Is the pattern of exposure clustered in a specific area?       Yes               No

Extent of area

- Single building                       Complex (several buildings)                       City block  
 Neighborhood                       Cluster of neighborhoods                       Large section of city  
 Other: \_\_\_\_\_

Additional notes on extent of area: \_\_\_\_\_

Do the exposed individuals represent a disproportionate number of:

- Immune compromised                       Elderly                       Children  
 Infants                       Pregnant women                       Women  
 Other: \_\_\_\_\_  
 None, no specific groups dominate the makeup of exposed individuals

**EVALUATION OF LINK TO WATER**

**Are the symptoms consistent with typical waterborne diseases, such as gastrointestinal disease, vomiting, or diarrhea?**                       Yes     No

**Does the area of exposure coincide with a specific area of the system, such as a pressure zone or area feed by a specific plant?**                       Yes     No

**Were there any consumer complaints within the affected area?**                       Yes     No

**Were there any unusual water quality data within the affected area?**                       Yes     No

**Were there any process upsets or operational changes?**                       Yes     No

**Was there any construction/maintenance within the affected area?**                       Yes     No

**Were there any security incidents within the affected area?**                       Yes     No

**SIGNOFF**

Name of person completing form:

Print name \_\_\_\_\_

Signature \_\_\_\_\_

## Security Incident Report Form

### INSTRUCTIONS

The purpose of this form is to help organize information about a security incident, typically a security breach, which may be related to a water contamination threat. The individual who discovered the security incident, such as a security supervisor, the WUERM, or another designated individual may complete this form. This form is intended to summarize information about a security breach that may be relevant to the threat evaluation process. This form should be completed for each location where a security incident was discovered.

### DISCOVERY OF SECURITY INCIDENT

**Date/Time security incident discovered:** \_\_\_\_\_

**Name of person who discovered security incident:** \_\_\_\_\_

**Mode of discovery:**

- |   |  |   |
|---|--|---|
| <input type="checkbox"/> Alarm (building)   | <input type="checkbox"/> Alarm (gate/fence)        | <input type="checkbox"/> Alarm (access hatch) |
| <input type="checkbox"/> Video surveillance | <input type="checkbox"/> Utility staff discovery   | <input type="checkbox"/> Citizen discovery    |
| <input type="checkbox"/> Suspect confession | <input type="checkbox"/> Law enforcement discovery |   |
| <input type="checkbox"/> Other _____        |  |   |

**Did anyone observe the security incident as it occurred?**  Yes  No

*If "Yes", complete the 'Witness Account Report Form'*

### SITE DESCRIPTION

Site Name: \_\_\_\_\_

Type of facility

- |  |  |   |
|--|--|---|
| <input type="checkbox"/> Source water        | <input type="checkbox"/> Treatment plant       | <input type="checkbox"/> Pump station             |
| <input type="checkbox"/> Ground storage tank | <input type="checkbox"/> Elevated storage tank | <input type="checkbox"/> Finished water reservoir |
| <input type="checkbox"/> Distribution main   | <input type="checkbox"/> Hydrant               | <input type="checkbox"/> Service connection       |
| <input type="checkbox"/> Other _____         |  |   |

Address: \_\_\_\_\_

Additional Site Information: \_\_\_\_\_

### BACKGROUND INFORMATION

**Have the following "normal activities" been investigated as potential causes of the security incident?**

- |  |  |
|--|--|
| <input type="checkbox"/> Alarms with known and harmless causes | <input type="checkbox"/> Utility staff inspections   |
| <input type="checkbox"/> Routine water quality sampling        | <input type="checkbox"/> Construction or maintenance |
| <input type="checkbox"/> Contractor activity                   | <input type="checkbox"/> Other _____                 |

**Was this site recently visited prior to the security incident?**  Yes  No

*If "Yes," provide additional detail below*

Date and time of previous visit: \_\_\_\_\_

Name of individual who visited the site: \_\_\_\_\_

Additional Information: \_\_\_\_\_

**Has this location been the site of previous security incidents?**  Yes  No

*If "Yes," provide additional detail below*

Date and time of most recent security incident: \_\_\_\_\_

Description of incident: \_\_\_\_\_

What were the results of the threat evaluation for this incident?

- |                                     |                                     |                                      |
|-------------------------------------|-------------------------------------|--------------------------------------|
| <input type="checkbox"/> 'Possible' | <input type="checkbox"/> 'Credible' | <input type="checkbox"/> 'Confirmed' |
|-------------------------------------|-------------------------------------|--------------------------------------|

**Have security incidents occurred at other locations recently?**  Yes  No

*If "Yes", complete additional 'Security Incident Reports' (Appendix 8.3) for each site*

Name of 1<sup>st</sup> additional site: \_\_\_\_\_

Name of 2<sup>nd</sup> additional site: \_\_\_\_\_

Name of 3<sup>rd</sup> additional site: \_\_\_\_\_

**SECURITY INCIDENT DETAILS**

**Was there an alarm(s) associated with the security incident?**  Yes  No

*If "Yes," provide additional detail below*

Are there sequential alarms (e.g., alarm on a gate and a hatch)?  Yes  No

Date and time of alarm(s): \_\_\_\_\_

Describe alarm(s): \_\_\_\_\_

**Is video surveillance available from the site of the security incident?**  Yes  No

*If "Yes," provide additional detail below*

Date and time of video surveillance: \_\_\_\_\_

Describe surveillance: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**Unusual equipment found at the site and time of discovery of the security incident:**

Discarded PPE (e.g., gloves, masks)  Empty containers (e.g., bottles, drums)

Tools (e.g., wrenches, bolt cutters)  Hardware (e.g., valves, pipe)

Lab equipment (e.g., beakers, tubing)  Pumps or hoses

None  Other \_\_\_\_\_

Describe equipment: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**Unusual vehicles found at the site and time of discovery of the security incident:**

Car/sedan  SUV  Pickup truck

Flatbed truck  Construction vehicle  None

Other \_\_\_\_\_

Describe vehicles (including make/model/year/color, license plate #, and logos or markings): \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**Signs of tampering at the site and time of discovery of the security incident:**

Cut locks/fences  Open/damaged gates, doors, or windows

Open/damaged access hatches  Missing/damaged equipment

Facility in disarray  None

Other \_\_\_\_\_

Are there signs of sequential intrusion (e.g., locks removed from a gate and hatch)?  Yes

No

Describe signs of tampering: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**Signs of hazard at the site and time of discovery of the security incident:**

Unexplained or unusual odors  Unexplained dead animals

Unexplained dead or stressed vegetation  Unexplained liquids

Unexplained clouds or vapors  None

Other \_\_\_\_\_

Describe signs of hazard: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**SIGNOFF**

Name of person responsible for documenting the security incident:

Print name \_\_\_\_\_

Signature \_\_\_\_\_ Date/Time: \_\_\_\_\_

Source: EPA Response Protocol Toolbox Module 2, Section 8.3 – Interim Final December 2003

## SUSPECT DESCRIPTION FORM

### GENERAL APPEARANCE

### CLOTHING

**Gender:**

Male  
Female

**Color/Type:**

Layered Shirts/Blouse

**Race:**

White  
 Black  
 Middle Eastern

Cap/Hat

Hispanic  
 Asian  
 Native American

Coat/Jacket

Other \_\_\_\_\_

**Hair:**

Color  
Style  
Texture  
Sideburns

Tie

Pants

**Eyes:**

Color  
Shape  
Glasses (type)

Shoes

Stockings

**Physical Characteristics:**

Age  
Height  
Weight  
Build

Gloves

Jewelry

**Distinguishing Marks (describe):**

Scars  
Tattoos  
Gang Insignia

Bag/Backpack  
Purse/Briefcase

**Other:**

Left Handed / Right Handed

**SUSPECT DEMEANOR**

- Apologetic
- Calm
- Belligerent
- Angry
- Threatening
- Nervous
- Confused

**DISTINGUISHING TRAITS**

- Speech
- Accent
- Gait / Limp

**FACIAL CHARACTERISTICS**

**Skin:**  
 Color  
 Texture

**Describe shape of:**

- Mouth
- Lips
- Ears
- Cheeks  
(full or sunken)
- Nose
- Neck
- Eyes
- Eyebrows

**Presence of:**

- Adam's Apple
- Chin clefts
- Wrinkles

**Hair:**

- Mustache
- Beard
- Other

**Describe any:**

- Facial piercing
- Ear piercing

**WEAPON (describe if any)**

- Handgun
- Long gun
- Knife

**VEHICLE**

- Color
- Make
- Model
- Body Style
- Damage / Rust
- Antenna
- Bumper Sticker
- Wheel Covers

**Direction of Escape**

**What did the suspect say?**

**License Number** \_\_\_\_\_

# BOMB THREAT CHECKLIST

*Be Calm and Courteous*

*Give a co-worker a signal to "listen in"*

Date: \_\_\_\_\_ Time call started: \_\_\_\_\_

\_\_\_\_\_ Time call ended: \_\_\_\_\_

Check call display for phone number (if available) \_\_\_\_\_

## EXACT WORDING OF BOMB THREAT:

What can you tell me?

When is the bomb going to explode?

What kind of bomb is it?

Where is the bomb right now?

What does the bomb look like?

What will cause the bomb to explode?

Did you place the bomb?

Why?

What is your name?

### REMARKS:

### CALLER'S VOICE

- Male
- Female
- Old (Age?) \_\_\_\_\_
- Young (Age?) \_\_\_\_\_
- Calm
- Excited
- Soft
- Loud
- Angry
- Cracking Voice
- Laughter
- Crying
- Normal
- Disguised
- High pitched
- Deep
- Nasal
- Slurred
- Distinct
- Ragged
- Rapid
- Slow
- Raspy
- Stutter
- Lisp
- Heavy Breather
- Clearing Throat
- Intoxicated
- Pleasant
- Whisper
- Familiar (who?) \_\_\_\_\_
- Accent (type?) \_\_\_\_\_

### FAMILIARITY WITH FACILITY

- Much
- Some
- None

Inform the caller that the building is occupied and the detonation of a bomb could result in death or serious injury to many innocent people.

### BOMB THREAT LANGUAGE

- Well Spoken
- Incoherent
  
- Foul
- Irrational
  
- Taped
- Deliberate
  
- Abusive
- Righteous
  
- Message read by threat maker

### BACKGROUND SOUNDS

## Threat Evaluation Worksheet

### INSTRUCTIONS

The purpose of this worksheet is to help organize information about a contamination threat warning that would be used during the Threat Evaluation Process. The individual responsible for conducting the Threat Evaluation (e.g., the WUERM) should complete this worksheet. The worksheet is generic to accommodate information from different types of threat warnings; thus, there will likely be information that is unavailable or not immediately available. Other forms in the Appendices are provided to augment the information in this worksheet.

### THREAT WARNING INFORMATION

**Date/Time threat warning discovered:** \_\_\_\_\_

**Name of person who discovered threat warning:** \_\_\_\_\_

**Type of threat warning:**

- |  |  |   |
|--|--|---|
| <input type="checkbox"/> Security breach | <input type="checkbox"/> Witness account     | <input type="checkbox"/> Phone threat               |
| <input type="checkbox"/> Written threat  | <input type="checkbox"/> Law enforcement     | <input type="checkbox"/> Unusual water quality      |
| <input type="checkbox"/> News media      | <input type="checkbox"/> Consumer complaints | <input type="checkbox"/> Public health notification |
| <input type="checkbox"/> Other _____     |  |   |

**Identity of the contaminant:**     Known         Suspected         Unknown

*If known or suspected, provide additional detail below*

- |                                   |                                     |                                       |
|-----------------------------------|-------------------------------------|---------------------------------------|

|--|---|
| <input type="checkbox"/> Utility staff inspections   | <input type="checkbox"/> Routine water quality sampling           |
| <input type="checkbox"/> Construction or maintenance | <input type="checkbox"/> Contractor activity                      |
| <input type="checkbox"/> Operational changes         | <input type="checkbox"/> Water quality changes with a known cause |
| <input type="checkbox"/> Other _____                 |   |

**Is the threat 'possible'?**  Yes  No

Summarize the basis for this determination: \_\_\_\_\_

## Water Quality/Consumer Complaint Report Form

**INSTRUCTIONS** - This form is provided to guide the individual responsible for evaluating unusual water quality data or consumer complaints. It is designed to prompt the analyst to consider various factors or information when evaluating the unusual data. The actual data used in this analysis should be compiled separately and appended to this form. The form can be used to support the threat evaluation due to a threat warning from unusual water quality or consumer complaints, or another type of threat warning in which water quality data or consumer complaints are used to support the evaluation. Note that in this form, water quality refers to both specific water quality parameters and the general aesthetic characteristics of the water that might result in consumer complaints.

**Threat warning is based on:**       Water quality       Consumer complaints       Other

**What is the water quality parameter or complaint under consideration?**

**Are unusual consumer complaints corroborated by unusual water quality data?**

**Is the unusual water quality indicative of a particular contaminant of concern? For example, is the color, order, or taste associated with a particular contaminant?**

**Are consumers in the affected area experiencing any unusual health symptoms?**

**What is 'typical' for consumer complaints for the current season and water quality?**

Number of complaints.

Nature of complaints.

Clustering of complaints

**What is considered to be 'normal' water quality (i.e., what is the baseline water quality data or level of consumer complaints)?**

**What is reliability of the method or instrumentation used for the water quality analysis?**

Are standards and reagents OK?

Is the method/instrument functioning properly?

**Based on recent data, does the unusual water quality appear to be part of a gradual trend (i.e., occurring over several days or longer)?**

**Are the unusual water quality observations sporadic over a wide area, or are they clustered in a particular area?**

What is the extent of the area?    Pressure zone.    Neighborhood.    City block.    Street.    Building.

**If the unusual condition isolated to a specific area:**

Is this area being supplied by a particular plant or source water?

Have there been any operational changes at the plant or in the affected area of the system?

Has there been any flushing or distribution system maintenance in the affected area?

Has there been any repair or construction in the area that could impact water quality?

## Witness Account Report Form

### INSTRUCTIONS

The purpose of this form is to document the observations of a witness to activities that might be considered an incident warning. The individual interviewing the witness, or potentially the witness, should complete this form. This may be the WUERM or an individual designated by incident command to perform the interview. If law enforcement is conducting the interview (which may often be the case), then this form may serve as a prompt for "utility relevant information" that should be pursued during the interview. This form is intended to consolidate the details of the witness account that may be relevant to the threat evaluation process. This form should be completed for each witness that is interviewed.

### BASIC INFORMATION

**Date/Time of interview:** \_\_\_\_\_

**Name of person interviewing the witness:** \_\_\_\_\_

#### Witness contact information

**CERTIFICATION OF COMPLETION OF AN EMERGENCY RESPONSE PLAN**

Public Water System ID number: #55510008 DHS  
System Name: LAKE DON PEDRO COMMUNITY SERVICES DISTRICT  
City where system is located: LA GRANGE  
State : CALIFORNIA  
**Printed Name of Person Authorized to Sign this Certification on Behalf of the System:** ROBERT KENT  
Title: GENERAL MANAGER  
Address : 9751 MERCED FALLS RD.  
City: LA GRANGE  
State and ZIP Code: CALIFORNIA, 95329  
Phone: (209) 852-2331 Fax: (209) 852-2268 Email: bob@ldpcsd.org

I certify to the Administrator of the U.S. Environmental Protection Agency that this community water system has completed an Emergency Response Plan that complies with Section 1433(b) of the Safe Drinking Water Act as amended by the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Public Law 107-188, Title IV — Drinking Water Security and Safety). I further certify that this document was prepared under my direction or supervision. I am aware that there are significant penalties for submitting false information (Safe Drinking Water Act (42 U.S.C.300f et seq.)).

The emergency response plan that this community water system completed incorporates the results of the vulnerability assessment completed for the system and includes “plans, procedures, and identification of equipment that can be implemented or utilized in the event of a terrorist or other intentional attack ” on this community water system. The emergency response plan also includes “actions, procedures, and identification of equipment which can obviate or significantly lessen the impact of terrorist attacks or other intentional actions on the public health and the safety and supply of drinking water provided to communities and individuals.”

This CWS has coordinated, to the extent possible, with existing Local Emergency Planning Committees established under the Emergency Planning and Community Right-to- Know Act (42 U.S.C.11001 et seq) when preparing this emergency response plan.

# Lake Don Pedro Community Services District

## Special Meeting of March 4, 2015

### AGENDA SUPPORTING DATA

#### 3 Board of Directors Planning Session:

- a. Review of District Organizational Chart
- b. Review of District Policies Related to Board and Staff Roles and Responsibilities, Norms and Protocol

#### **Background**

The purpose of this agenda item is to begin the process of strategic planning, to ensure the successful future of the District and its public services. There are many important aspects of planning for the successful operation and management of the District. As an instructor for the California Special District Leadership Academy, I have developed many useful processes and procedures to assist in facilitating the Board's planning processes.

What we are proposing at this time is the ultimate development of District goals and objectives; or major items we want to accomplish over the next one, three, five or ten year period. These goals and objectives will then be used by management to establish specific, measurable objectives for the General Manager himself, as well as the development of specific benchmarks or objectives for staff at all levels to strive for, and be expected to achieve.

One of the major reasons for conducting the planning process at this time is to determine the intent of the Board with regard to District management. It has been the practice and policy of the Board to hire a working manager who splits time between working directly in the field with the operations employees, and is also responsible to serve as chief executive of the District. The planning process will determine the level or skills, expertise, experience and actual hands-on management time required of the General Manager. In other words, the more complex the management work to be done as determined by the Board's plan, the more experienced of a manager is necessary and less time, if any, they will have for operation tasks.

We propose a solid planning process will including:

- Review and update of the Board's current policies governing Board conduct and expectations, as well as policies on governing Board meetings. These policies are attached for review. Other items such as committee membership, actions, purpose and protocol should be determined
- Discussion of Board member Norms and Protocol and determination if Board or Board member actions are getting in the way of effective Board governance.
- Discussion of structure and process agreements – everything is on the table for discussion and agreement, from how the agenda is prepared, to how committees function, how the Board room is set up, board packet content and timing, to handling public comments, board member ideas and public complaint processes.
- Revisit the mission statement
- Set the 5 year vision in a set of bullet statements. This is where we identify where the Board sees the District in the next 5 years
- Establish goals to support the Board's vision, and objectives to accomplish the goals
- The General Manager then creates objectives on an annual basis which are reviewed and approved by the Board and are used for evaluation of the General Manager's performance.

- The General Manager will establish performance criteria for all positions in the District, that then support the management objectives and Board goals.

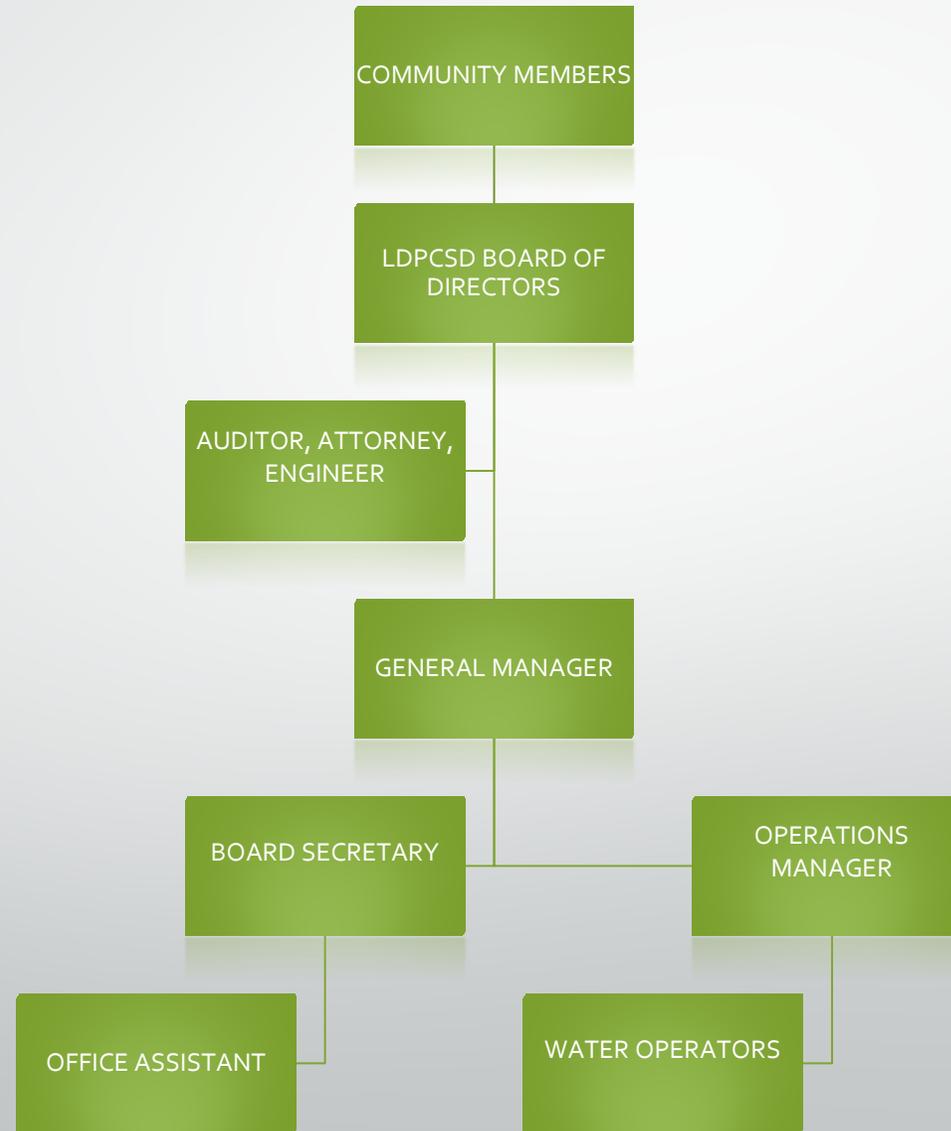

Again, this item is on today's agenda so that we do not lose focus on the need to make steady progress toward completion of the planning process. The above comprehensive planning method could take four to six Board meetings to complete, at one hour per meeting item; or in two longer special meetings.

At this meeting, I propose to review each of the bulleted items above to the point of clarity, and determining the interest of the Board in addressing each of the components in their planning process.

**Recommended Motion**

Discussion and action on the level of planning desired and direction regarding the appropriate schedule for plan development.

# Lake Don Pedro CSD Organizational Chart 2015

**LAKE DON PEDRO COMMUNITY SERVICES DISTRICT**  
**Policy and Procedures Manual**

PAGE 1 OF 3

POLICY TITLE:                   **Role of the Governing Board of Directors**  
POLICY NUMBER:               **4000**

- 4000.10**       The most important function of a governing board of directors is the establishment of policy. The other officers and employees of the agency cannot establish policy. Therefore, it is the duty of the governing board to establish a clear policy on Lake Don Pedro Community Services District's mission, goals and operations.
- 4000.101**      The District's policies, i.e., mission, goals and programs, are established by a majority of the Board of Directors at a public meeting.
- 4000.102**      The Board will not direct management how to implement policy but will hold management responsible if the policy of the District is not implemented.
- 4000.103**      The Manager shall recommend programs to implement District policy to the Board at public meetings unless instructed by the Board to report to a committee or individual directors.
- 4000.104**      The Manager shall carry out the programs approved by the Board without modification.
- 4000.105**      Individual Directors are encouraged to inquire of the Manager as to the status of programs.
- 4000.106**      The Manager shall promptly provide information requested by the Directors.
- 4000.107**      Directors may request information from subordinate staff only if the Managers first fail to provide the information.
- 4000.108**      Directors shall not instruct staff how to perform their work.
- 4000.20**       Governing boards commonly establish policy steps:
- 4000.201**      **Step 1:** Defines the fundamental mission of the agency. For Lake Don Pedro Community Services District this would be to "provide sufficient water to satisfy the needs of the community at a reasonable price."

- 4000.20 Governing boards commonly establish policy steps (continued):
- 4000.202 **Step 2:** Identifies the specific actions that are necessary to accomplish the mission.
  - 4000.203 **Step 3:** Involves the formulation of programs to implement the goals. The board must review staff recommendations and decide which program should be implemented in light of the agency's mission and goals. The development of the program should occupy much of the board's attention.
- 4000.30 Once a comprehensive policy is established, the board must ensure the policy is implemented. Although the annual budget is often perceived entirely in fiscal terms, it actually starts the implementation of policy by identifying the programs that will be undertaken during the following fiscal year. Approval of the budget does not complete the process of authorizing programs. The budget is a road map for management for the fiscal year. After the budget is approved, management presents projects to carry out the programs identified in the budget. For example, if part of the budget is allocated for a capital project, the board must authorize the hiring of a contractor to perform the work.
- 4000.40 It is important to remember that the board's duty is supervising management not doing the actual managing.
- 4000.50 Occasionally, individual board members will mistakenly conclude that they should direct staff in the implementation of district's programs.
- 4000.501 A board member who attempts to direct the staff places the employees in an untenable position; the employees will believe that compliance is necessary to preserve employment.
  - 4000.502 Such a member also violates the trust of other board members who pledged to abide by the will of the **majority**.
  - 4000.503 Employees who take direction from individual board members should be disciplined by management.
  - 4000.504 A director who gives direction to employees should be sanctioned by the board of directors.
- 4000.60 It is extremely important to remember that, under the law, an individual Board member has the privilege of inspecting all records of the agency (not just public records) but has no greater rights in the day-to-day operation of the district than the public.

**PAGE 3 OF 3**

**POLICY TITLE:**

**Role of the Governing Board of Directors**

**POLICY NUMBER:**

**4000**

- 4000.70** Pursuant to Government Code Section 1780, the Board of Directors of Lake Don Pedro Community Services District elects to fill any vacancy, occurring due to a resignation of any Director of the Board, by appointment. If the Board finds a suitable candidate, and appoints the candidate to the vacancy, that person shall serve the remainder of the term of the resigning director.
- 4000.80** Any changes to this policy will require a 4/5 (four-fifths) vote of the Board of Directors.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Code of Ethics**

**POLICY NUMBER: 4010**

**4010.1** The Board of Directors of the Lake Don Pedro Community Services District is committed to providing excellence in legislative leadership that results in the provision of the highest quality services to its constituents and to comply with State laws including AB 1234 (Salinas) approved in 2006.(copy attached as reference)

In order to assist in the governance of the behavior between and among members of the Board of Directors and District staff, the following rules shall be observed.

**4010.1.1** The dignity, style, values and opinions of each Director shall be respected.

**4010.1.2** Responsiveness, attentive listening and communication is encouraged.

**4010.1.3** The needs of the District's constituents should be the priority of the Board of Directors. When a Director believes he/she may have a conflict of interest, Legal Counsel shall be requested to make a determination if one exists or not.

**4010.1.4** The primary responsibility of the Board of Directors is the formulation and evaluation of policy. Routine matters concerning the operational aspects of the District are to be delegated to professional staff members of the District.

**4010.1.5** Directors should commit themselves to emphasizing the positive, avoiding double talk, hidden agendas, gossip, backbiting, and other negative forms of interaction.

**4010.1.6** Directors should commit themselves to focusing on issues and not personalities. The presentation of the opinions of others should be encouraged. Cliques and voting blocks based on personalities rather than issues should be avoided.

**4010.1.7** Differing viewpoints are healthy in the decision-making process. Individuals have the right to disagree with ideas and opinions, but without being disagreeable. Once the Board of Directors takes action, Directors should commit to supporting said action and not to create barriers to the implementation of said action.

**4010.1.8** Directors should practice the following procedures:

**4010.1.8.1** In seeking clarification on informational items, Directors may directly approach professional staff members to obtain information needed to supplement, upgrade, or enhance their knowledge to improve legislative decision-making.

**4010.1.8.2** In handling complaints from residents and property owners of the District, said complaints should be referred directly to the General Manager.

**4010.1.8.3** In handling items related to safety, concerns for safety or hazards should be reported to the General Manager or to the District office. Emergency situations should be dealt with immediately by seeking appropriate assistance.

**4010.1.8.4** In presenting items for discussion at Board meetings, see Policy #5020.

**4010.1.8.5** In seeking clarification for policy-related concerns, especially those involving personnel, legal action, land acquisition and development, finances, and programming, said concerns should be referred directly to the General Manager or Legal Counsel.

**4010.1.9** If approached by District personnel concerning specific District policy, Directors should direct inquiries to the appropriate staff supervisor or General Manager. The chain of command should be followed.

**4010.2** The work of the District is a team effort. All individuals should work together in the collaborative process, assisting each other in conducting the affairs of the District.

**4010.2.1** When responding to constituent requests and concerns, Directors should be courteous, responding to individuals in a positive manner and routing their questions through appropriate channels and to responsible management personnel.

**4010.2.2** Directors should develop a working relationship with the General Manager wherein current issues, concerns and District projects can be discussed comfortably and openly.

**4010.2.3** Directors should function as a part of the whole. Issues should be brought to the attention of the Board as a whole, rather than to individual members selectively.

**4010.2.4** Directors are responsible for monitoring the District's progress in attaining its goals and objectives, while pursuing its mission.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Voluntary Candidate Expenditure Ceiling**

**POLICY NUMBER: 4015**

**4015.1** In accordance with Government Code §85400 (Proposition 208), the voluntary expenditure ceiling for candidates for the Board of Directors of the Lake Don Pedro Community Services District, and controlled committees of such candidates, shall be one dollar (\$1) per resident for each election in which the candidate is seeking election to the Board of Directors.

**4015.2** Proposition 208 establishes a two-tiered scheme of campaign contribution limitations applicable to candidates running for local office based on whether the recipient candidate accepts or rejects the voluntary expenditure ceiling established by the local jurisdiction. The decision by a candidate as to whether to accept the ceiling must be made before a candidate accepts any contributions.

**4015.2.1** If a candidate for the Board of Directors elects to abide by the ceiling, he/she may accept contributions from businesses, political action committees (PAC's), or individuals in an amount up to \$250.

**4015.2.2** If a candidate for the Board of Directors elects not to abide by the ceiling, he/she may accept contributions from businesses, political action committees (PAC's), or individuals in an amount up to \$100.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Attendance at Meetings**

**POLICY NUMBER: 4020**

**4020.1** Members of the Board of Directors shall attend all regular and special meetings of the Board unless there is good cause for absence. If a Director is absent from a meeting he/she will be responsible for listening to the meeting audio recording so he/she will be informed on what happened while he/she was absent.

**4020.2** A vacancy shall occur if any member ceases to discharge the duty of his/her office for the period of three consecutive months except as authorized by the Board of Directors.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Remuneration and Reimbursement**

**POLICY NUMBER: 4030**

**4030.1** Members of the Board of Directors shall receive a monthly "Director's Fee," the amount of which shall be annually established by the Board at its regular meeting in July.

**4020.2** Members of the Board of Directors shall be reimbursed for all legitimate expenses incurred in attending any meetings or in making any trips on official business of the Board when so authorized in accordance with Policy #4090. Reimbursement for the cost of the use of a Director's vehicle shall be on the basis of total miles driven and at the rate specified in the Internal Revenue Service Guidelines in effect at the time of the vehicle usage.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Director's Health Insurance**

**POLICY NUMBER: 4035**

**4035.1** Members of the Board of Directors of the Lake Don Pedro Community Services District may participate in the health benefits plan provided by the District on a self-pay basis. The District will pay the minimum monthly enrollment fee for each enrolled Director required of it by the Public Employees' Medical and Hospital Care Act.

**4035.2** In accordance with Government Code §53208.5, the benefits provided to Directors by the health benefits plan may not be greater than the most generous schedule of benefits being received by any group of District employees. Family members of the Director are also eligible for enrollment in the health benefits plan.

**4035.3** The health benefits plan for Directors will be available only to active members of the Board of Directors, and shall not be available after a Director is no longer an elected or appointed official of the District.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Board President**

**POLICY NUMBER: 4040**

**4040.1** The President of the Board of Directors shall serve as chairperson at all Board meetings. He/she shall have the same rights as the other members of the Board in voting, introducing motions, resolutions and ordinances, and any discussion of questions that follow said actions.

**4040.2** In the absence of the President, the Vice President of the Board of Directors shall serve as chairperson over all meetings of the Board. If the President and Vice President of the Board are both absent, the remaining members present shall select one of themselves to act as chairperson of the meeting.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Members of the Board of Directors**

**POLICY NUMBER: 4050**

**4050.1** Directors shall thoroughly prepare themselves to discuss agenda items at meetings of the Board of Directors. Information may be requested from staff or exchanged between Directors before meetings. The Brown Act must be adhered to at all times.

**4050.1.1** Information exchanged before meetings shall be distributed through the General Manager, and all Directors will receive all information being distributed.

**4050.1.2** Copies of information exchanged before meetings shall be available at the meeting for members of the public in attendance, and shall also be provided to anyone not present upon their request.

**4050.2** Directors shall at all times conduct themselves with courtesy to each other, to staff, and to members of the audience present at Board meetings.

**4050.3** Directors shall defer to the chairperson for conduct of meetings of the Board, but shall be free to question and discuss items on the agenda. All comments should be brief and confined to the matter being discussed by the Board.

**4050.4** Directors may request for inclusion into minutes brief comments pertinent to an agenda item only at the meeting that item is discussed (including, if desired, a position on abstention or dissenting vote).

**4050.5** Directors shall abstain from participating in consideration on any item involving a personal or financial conflict of interest. Unless such a conflict of interest exists, however, Directors should not abstain from the Board's decision-making responsibilities.

**4050.6** Requests by individual Directors for substantive information and/or research from District staff will be channeled through the General Manager.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Committees of the Board of Directors**

**POLICY NUMBER: 4060**

**4060.10** The President of the Board shall appoint such ad hoc committees as may be deemed necessary or advisable by himself/herself and/or the Board. The duties of the ad hoc committees shall be outlined at the time of appointment, and the committee shall be considered dissolved when its final report has been made.

**4060.20** The following may be either standing committees or ad-hoc committees of the Board.

**STANDING COMMITTEES:**

<b>4060.21</b>	<b>Finance Committee</b>
<b>4060.22</b>	<b>Operations Committee</b>
<b>4060.23</b>	<b>Public Relations Committee</b>
<b>4060.24</b>	<b>Personnel Committee</b>

**AD-HOC COMMITTEES:**

<b>4060.25</b>	<b>Long Range Benefits</b>
----------------	----------------------------

**ADVISORY COMMITTEES:**

<b>4060.26</b>	<b>MID Committee</b>
<b>4060.27</b>	<b>South Shore Committee</b>

**4060.30** After determining to establish a committee, the Board shall decide that the committee will be either a standing or ad-hoc committee. The President of the Board shall appoint and publicly announce the members of the committee.

**4060.31** The Board's committees may be assigned to review District functions, activities, and/or operations pertaining to their designated concerns, as specified below. Said assignment may be made by the President of the Board, or a majority vote of the Board. Any recommendations resulting from said review should be submitted to the Board via a written or oral report.

**4060.41** All meetings of standing committees shall conform to all open meeting laws (e.g., "Brown Act") that pertain to regular meetings of the Board of Directors.

**4060.50** The Board's Planning Committee shall be concerned with the formulation of plans for arranging, realizing, and/or achieving District goals.

- 4060.60** The Board' Ordinance Committee shall be concerned with proposed ordinances, resolutions and/or District policies, except those pertaining specifically to personnel.
  
- 4060.70** The Board's Personnel Committee shall be concerned with the functions, activities, operations, compensation, and welfare of District staff.
  
- 4060.80** The Board's Finance Committee shall be concerned with the financial management of the District, including the preparation of an annual budget and major expenditures.
  
- 4060.90** The Board's Public Information Committee shall be concerned with assuring that information regarding the affairs of the District is adequately and appropriately communicated to its constituents and the public at large.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Basis of Authority**

**POLICY NUMBER: 4070**

**4070.1** The Board of Directors is the unit of authority within the District. Apart from his/her normal function as a part of this unit, Directors have no individual authority. As individuals, Directors may not commit the District to any policy, act, or expenditure.

**4070.2** Directors do not represent any fractional segment of the community, but are, rather, a part of the body that represents and acts for the community as a whole.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: Memberships in Associations**

**POLICY NUMBER: 4080**

**4080.1** The Board of Directors shall ordinarily hold membership in and attend meetings of such national, state, and local associations as may exist which have applicability to the functions of the District, and shall look upon such memberships as an opportunity for in-service training.

**4080.2** The Board of Directors shall maintain membership in the California Special Districts Association and shall insure that annual dues are paid when due

**4080.3** The Board of Directors shall maintain membership in the Chapter of the California Special Districts Association and shall insure that annual dues are paid when due.

**4080.3.1** At the regular Board meeting in [MONTH], a member of the Board shall be selected to represent the District in accordance with said chapter's constitution/bylaws, and another member of the Board or staff member shall at the same time be selected to serve as an alternate for the representation.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

### **POLICY TITLE: Training, Education and Conferences**

### **POLICY NUMBER: 4090**

**4090.1** Members of the Board of Directors are encouraged to attend educational conferences and professional meetings when the purposes of such activities are to improve District operation. Hence, there is no limit as to the number of Directors attending a particular conference or seminar when it is apparent that their attendance is beneficial to the District.

**4090.1.1** "Junkets" (a tour or journey for pleasure at public expense), however, will not be permitted.

**4090.2** It is the policy of the District to encourage Board development and excellence of performance by reimbursing actual expenses incurred for tuition, travel, lodging and meals as a result of training, educational courses, participation with professional organizations, and attendance at local, state and national conferences associated with the interests of the District. Cash advances or use of District credit cards for these purposes is not permitted.

**4090.2.1** The Board Secretary is responsible for making arrangements for Directors for conference and registration expenses, and for per diem. Per diem, when appropriate, shall include reimbursement of expenses for meals, lodging, and travel. All expenses for which reimbursement is requested by Directors, or which are billed to the District by Directors, shall be submitted to the General Manager, together with validated receipts in accordance with State law.

**4090.2.2** Attendance by Directors of seminars, workshops, courses, professional organization meetings, and conferences shall be approved by the Board of Directors prior to incurring any reimbursable costs.

**4090.2.3** Expenses to the District for Board of Directors' training, education and conferences should be kept to a minimum by utilizing recommendations for transportation and housing accommodations put forth by the Board Secretary and by:

**4090.2.3.1** Utilizing hotel(s) recommended by the event sponsor in order to obtain discounted rates.

**4090.2.3.2** Directors traveling together whenever feasible and economically beneficial.

**4090.2.3.3** Requesting reservations sufficiently in advance, when possible, to obtain discounted air fares and hotel rates.

**4090.3** A Director shall not attend a conference or training event for which there is an expense to the District if it occurs after the District has announced his/her pending resignation, or if it occurs after an election in which it has been determined that the Director will not retain his/her seat on the Board. A Director shall not attend a conference or training event when it is apparent that there is no significant benefit to the District.

**4090.4** Upon returning from seminars, workshops, conferences, etc., where expenses are reimbursed by the District, Directors will either prepare a written report for distribution to the Board, or make a verbal report during the next regular meeting of the Board. Said report shall detail what was learned at the session(s) that will be of benefit to the District. Materials from the session(s) may be delivered to the District office to be included in the District library for the future use of other Directors and staff.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

### **POLICY TITLE: Ethics Training**

### **POLICY NUMBER: 4095**

**4095** All directors and designated executive staff of Lake Don Pedro Community Services District shall receive two hours of training in general ethics principles and ethics laws relevant to public service within one year of election or appointment to the board of directors and at least once every two years thereafter, pursuant to Government Code Sections 53234 through 53235.2.

**4095.1** This policy shall also apply to all staff members that the board of directors designates and to members of all commissions, committees and other bodies that are subject to the Ralph M. Brown Open Meeting Act.

**4095.2** All ethics training shall be provided by entities whose curricula have been approved by the California Attorney General and the Fair Political Practices Commission.

**4095.3** Directors shall obtain proof of participation after completing the ethics training. Applicable costs for attending the training will be reimbursed by the District.

**4095.3.1** District staff shall maintain records indicating both the dates that directors completed the ethics training and the name of the entity that provided the training. These records shall be maintained for at least five years after directors receive the training, and are public records subject to disclosure under the California Public Records Act.

**4095.4** District staff shall provide the board of directors with information on available training that meets the requirements of this policy at least once every year.

**4095.5** Ethics training may consist of either a training course or a set of self-study materials with tests, and may be taken at home, in person or online.

**4095.6** Any director of the Lake Don Pedro Community Services District that serves on the board of another agency is only required to take the training once every two years.

# **LAKE DON PEDRO COMMUNITY SERVICES DISTRICT**

## **Policy and Procedures Manual**

**POLICY TITLE:** Board Meetings  
**POLICY NUMBER:** 5010

**5010.1** Regular meetings of the Board of Directors shall be held on the third (3<sup>rd</sup>) Monday of each calendar month at 1:00 pm in the Lake Don Pedro CSD Board Room, located at 9751 Merced Falls Road, La Grange, CA. Should the regular meeting fall on an observed Holiday, as defined by the District in Policy #2080, the Regular Meeting will be held on the next business day at 1:00 p.m.

**5010.2** Special meetings (non-emergency) of the Board of Directors may be called by the Board President or 3 directors.

**5010.2.1** All Directors, the General Manager, the District Secretary and any other appropriate District consultants shall be notified of the special Board meeting and the purpose or purposes for which it is called. Said notification shall be in writing, delivered to them at least 24 hours prior to the meeting.

**5010.2.2** Newspapers of general circulation in the District, radio stations and television stations, organizations, and property owners who have requested notice of special meetings in accordance with the Ralph M. Brown Act (California Government Code §54950 through §54926) shall be notified by a mailing unless the special meeting is called less than one week in advance, in which case notice, including business to be transacted, will be given by telephone, fax or e-mail during business hours as soon after the meeting is scheduled as practicable.

**5010.2.3** An agenda shall be prepared as specified for regular Board meetings in Policy #5020 and shall be delivered with the notice of the special meeting to those specified above.

**5010.2.4** Only those items of business listed in the call for the special meeting shall be considered by the Board at any special meeting.

**5010.3** Special Meetings (emergency). In the event of an emergency situation involving matters upon which prompt action is necessary due to the disruption or threatened disruption of public facilities, the Board of Directors may hold an emergency special meeting without complying with the 24-hour notice required in 5010.21, above. An emergency situation means a crippling disaster which severely impairs public health, safety, or both, as determined by the General Manager, Board-President or Vice President in the President's absence.

**5010.3.1** Newspapers of general circulation in the District, radio stations and television stations which have requested notice of special meetings in accordance with the Ralph M. Brown Act (California Government Code §54950 through §54926) shall be notified by at least one hour prior to the emergency special meeting. In the event that telephone services are not functioning, the notice requirement of one hour is waived, but the General Manager, or his/her designee, shall notify such

newspapers, radio stations, or television stations of the fact of the holding of the emergency special meeting, and of any action taken by the Board, as soon after the meeting as possible.

**5010.3.2** No closed session may be held during an emergency special meeting, and all other rules governing special meetings shall be observed with the exception of the 24-hour notice. The minutes of the emergency special meeting, a list of persons the General Manager or designee notified or attempted to notify, a copy of the roll call vote(s), and any actions taken at such meeting shall be posted for a minimum of ten days in the District office as soon after the meeting as possible.

**5010.4** Adjourned Meetings. A majority vote by the Board of Directors may terminate any Board meeting at any place in the agenda to any time and place specified in the order of adjournment, except that if no or less than a quorum of Directors are present at any regular or adjourned regular meeting, the General Manager may declare the meeting adjourned to a stated time and place, and he/she shall cause a written notice of adjournment to be given to those specified in 5010.2.2 above.

**5010.5** Annual Organizational Meeting. The Board of Directors shall include an annual organizational meeting at its regular meeting in December. At this meeting, the Board will elect a President, Vice President. The President's position shall be limited to 2 (two) consecutive one year terms. Standing Committees shall be appointed from among its members to serve during the coming calendar year.

**5010.6** The General Manager shall determine the order in which agenda items shall be considered for discussion and/or action by the Board.

**5010.7** The President and the General Manager shall insure that appropriate information is available for the audience at meetings of the Board of Directors, and that physical facilities for said meetings are functional and appropriate.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## Policy and Procedures Manual

**POLICY TITLE: BOARD MEETING AGENDA**

**POLICY NUMBER: 5020**

**5020.1** The General Manager, in cooperation with the Board President, shall prepare an agenda for each regular meeting of the Board of Directors. Any Director may request an item be placed on the agenda no later than 7 days prior to the meeting date.

**5020.2** Any member of the public may request that a matter directly related to District business be placed on the agenda of a regularly scheduled meeting of the Board of Directors, subject to the following conditions:

**5020.2.1** The request must be in writing and be submitted to the General Manager, together with supporting documents and information, if any, no later than 11 days prior to the meeting date. Original and 10 copies of all supporting materials must be submitted;

**5020.2.2** The General Manager shall be the judge of whether the public request is or is not a "matter directly related to District business;" a request denied by the General Manager may be appealed to the Board.

**5020.2.3** No matter which is legally a proper subject for consideration by the Board in closed session, will be accepted under this policy;

**5020.3** The President of the Board of Directors may place limitations on the total time to be devoted to a public request issue at any meeting, and may limit the time allowed for any one person to speak on that issue.

**5020.3.1** This policy does not prevent the Board from taking testimony at regular and special meetings of the Board on matters, which are not on the agenda, which a member of the public may wish to bring before the Board. However, the Board shall not discuss or take action on such matters at that meeting, except to refer the matter for review or action as appropriate.

**5020.3.2** Any person wishing to address the Board on an agenda item will be given the opportunity to do so at the time that item is considered, subject to reasonable regulations adopted by the President of the Board. All public comment will be addressed to the President.

**5020.4** At least 72 hours prior to the time of all regular meetings, an agenda, which includes but is not limited to all matters on which there may be discussion and/or action by the Board, shall be posted conspicuously for public review at the District office and at appropriate community posting sites.

**5020.4.1** The agenda for a special meeting shall be posted at least 24 hours before the meeting in the same location.

# **LAKE DON PEDRO COMMUNITY SERVICES DISTRICT**

## **Policy and Procedures Manual**

**POLICY TITLE: Board Meeting Conduct**

**POLICY NUMBER: 5030**

**5030.1** Meetings of the Board of Directors shall be conducted by the Chairperson in a manner consistent with the policies of the District. Policy No. 5070, "Rules of Order for Board and Committee Meetings", shall be used as a general guideline for meeting protocol.

**5030.2** All Board meetings shall commence at the time stated on the agenda and shall be guided by same.

**5030.3** The conduct of meetings shall, to the fullest possible extent, enable Directors to:

**5030.3.1** Consider problems to be solved, weigh evidence related thereto, and make wise decisions intended to solve the problems; and,

**5030.3.2** Receive, consider and take any needed action with respect to reports of accomplishment of District operations.

**5030.4** Provisions for permitting any individual or group to address the Board concerning any item on the agenda of a special meeting, or to address the Board at a regular meeting on any subject that lies within the jurisdiction of the Board of Directors, shall be as followed:

**5030.4.1** Three minutes will be allotted to each speaker and a maximum of 20 minutes to each subject matter. To ensure the proper recording of records, all speakers will be asked to stand at the podium, provide their name and speak into the microphone.

**5030.4.2** No boisterous conduct shall be permitted at any Board meeting. Persistence in boisterous conduct shall be grounds for summary termination, by the Chairperson, of that person's privilege of address.

**5030.4.3** No oral presentation shall include charges or complaints against any District employee, regardless of whether or not the employee is identified by name or by another reference. All charges or complaints against employees shall be submitted in writing to the GM for review following the provisions contained in District Policy. By state law, the Board is limited in the discussion of personnel issues in public.

**5030.5** Willful disruption of any of the meetings of the Board of Directors shall not be permitted. If the Chairperson finds that there is in fact willful disruption of any meeting of the Board, he/she may order the room cleared and subsequently conduct the Board's business without the audience present.

**5030.5.1** In such an event, only matters appearing on the agenda may be considered in such a session.

**5030.5.2** After clearing the room, the Chairperson may permit those persons who, in his/her opinion, were not responsible for the willful disruption to re-enter the meeting room.

**5030.5.3** Duly accredited representatives of the news media, whom the Chairperson finds not to have participated in the disruption, shall be admitted to the remainder of the meeting.

**5030.5.4** At the Board's discretion, the attendee responsible for the disruption may be allowed to return to the meeting if he or she can assure that there will be no further disruptions.

# **LAKE DON PEDRO COMMUNITY SERVICES DISTRICT**

## **Policy and Procedures Manual**

**POLICY TITLE: Board Actions and Decisions**

**POLICY NUMBER: 5040**

**5040.1** Actions by the Board of Directors include but are not limited to the following:

**5040.1.1** Adoption or rejection of regulations or policies;

**5040.1.2** Adoption or rejection of a resolution;

**5040.1.3** Adoption or rejection of an ordinance;

**5040.1.4** Approval or rejection of any contract or expenditure;

**5040.1.5** Approval or rejection of any proposal which commits District funds or facilities, including employment and dismissal of personnel; and,

**5040.1.6** Approval or disapproval of matters that require or may require the District or its employees to take action and/or provide services.

**5040.2** Action can only be taken by the vote of the majority of the Board of Directors. Three (3) Directors represent a quorum for the conduct of business. Actions taken at a meeting where only a quorum is present, therefore, require all three (3) votes to be effective (unless a 4/5 vote is required by policy or other law).

**5040.2.1** A member abstaining in a vote is considered as absent for that vote.

**5040.2.1.1** Example. If three of five Directors are present at a meeting, a quorum exists and business can be conducted. However, if one Director abstains on a particular action and the other two cast "aye" votes, no action is taken because a "majority of the Board" did not vote in favor of the action.

**5040.2.1.2** Example. If an action is proposed requiring a two-thirds vote and 2 Directors abstain, the proposed action cannot be approved because 4 of the 5 Directors would have to vote in favor of the action.

**5040.2.1.3** Example. If a vacancy exists on the Board and a vote is taken to appoint an individual to fill said vacancy, three Directors must vote in favor of the appointment for it to be approved. If two of the four Directors present abstain, the appointment is not approved.

**5040.3** The Board may give directions that are not formal action. Such directions do not require formal procedural process. Such directions include the Board's directives and instructions to the General Manager.

**5040.3.1** The Chairperson shall determine by consensus a Board directive and shall state it for clarification. Should any two Directors challenge the statement of the Chairperson, a voice vote may be requested.

**5040.3.2** A formal motion may be made to place a disputed directive on a future agenda for Board consideration, or to take some other action (such as refer the matter to the General Manager for review and recommendation, etc.).

**5040.3.3** Informal action by the Board is still Board action and shall only occur regarding matters that appear on the agenda for the Board meeting during which said informal action is taken.

# **LAKE DON PEDRO COMMUNITY SERVICES DISTRICT**

## **Policy and Procedures Manual**

**POLICY TITLE:** Review of Administrative Decisions  
**POLICY NUMBER:** 5050

**5050.1** The provisions of §1094.6 of the Code of Civil Procedure of the State of California shall be applicable to judicial review of all administrative decisions of the Board of Directors pursuant to the provisions of §1094.5 of said code. The provisions of §1094.6 shall prevail over any conflicting provision and any otherwise applicable law, rule, policy or regulation of the District, affecting the subject matter of an appeal.

**5050.2** This policy affects those administrative decisions rendered by the Board of Directors governing acts of the District, in the conduct of the District's operations and those affecting personnel operating policies.

**5050.3** The purpose of this policy is to ensure efficient administration of the District, and the expeditious review of decisions rendered by the Board of Directors.

# LAKE DON PEDRO COMMUNITY SERVICES DISTRICT

## **Policy and Procedures Manual**

**POLICY TITLE: Minutes of Board Meetings**  
**POLICY NUMBER: 5060**

**5060.1** The Secretary or Deputy Secretary of the Board of Directors shall keep minutes of all regular and special meetings of the Board.

**5060.1.1** Copies of a meeting's minutes shall be distributed to Directors as a part of the information packet for the next regular meeting of the Board, at which time the Board will consider approving the minutes as presented or with modifications. Once approved by the Board, the official minutes shall be kept in a fireproof vault or in a fire-resistant, locked cabinet.

**5060.1.2** Unless directed otherwise, an audio recording of regular and special meetings of the Board of Directors will be made. The device upon which the recording is stored shall be kept in a fireproof vault or in fire-resistant, locked cabinet for a minimum of two months. Members of the public may inspect recordings of Board meetings without charge on a playback machine that will be made available by the District. Copies of audio recordings will be charged according to District policy for reproduction records and information.

**5060.1.3** Motions, resolutions or ordinances shall be recorded in the minutes as having passed or failed and individual votes will be recorded unless the action was unanimous. All resolutions and ordinances adopted by the Board shall be numbered consecutively, starting new at the beginning of each year. In addition to other information that the Board may deem to be of importance, the following information (if relevant) shall be included in each meeting's minutes:

- Date, place and type of each meeting;
- Directors present and absent by name;
- Administrative staff present by name;
- Call to order;
- Time and name of late arriving Directors;
- Time and name of early departing Directors;
- Names of Directors absent during any agenda item upon which action was taken;
- Summarial record of staff reports;
- Summarial record of public comment regarding matters not on the agenda, including names of commentators;
- Approval of consent calendar;
  - Consent Calendar to consist of:
    - Minutes or amended minutes from previous meeting;
    - Treasurer's report on all Districts' financial activity;
  - Record of the vote of each Director on every action item for which the vote was not unanimous;

Resolutions and ordinances described as to their substantive content and sequential numbering;  
Record of all contracts and agreements, and their amendment, approved by the Board;  
Approval of the annual budget;  
Approval of all polices, rules and/or regulations;  
Approval of all dispositions of District assets;  
Approval of all purchases of District assets; and,  
Time of meeting adjournment.

# **LAKE DON PEDRO COMMUNITY SERVICES DISTRICT**

## **Policy and Procedures Manual**

**POLICY TITLE:** Rules of Order for Board and Committee Meetings  
**POLICY NUMBER:** 5070

### **5070.1** General.

**5070.1.1** Action items shall be brought before and considered by the Board by motion in accordance with this policy. These rules of order are intended to be informal and applied flexibly. The Board prefers a flexible form of meeting and, therefore, does not conduct its meetings under formalized rules - Robert's Rules of Order.

**5070.1.2** If a Director believes order is not being maintained or procedures are not adequate, then he/she should raise a point of order - not requiring a second - to the chairperson. If the ruling of the chairperson is not satisfactory to the Director, then it may be appealed to the Board. A majority of the Board will govern and determine the point of order.

### **5070.2** Obtaining the Floor.

**5070.2.1** Any Director desiring to speak should address the chairperson and, upon recognition by the chairperson, may address the subject under discussion.

### **5070.3** Motions.

**5070.3.1** Any Director, including the chairperson, may make or second a motion. A motion shall be brought and considered as follows:

**5070.3.1.1** A Director makes a motion; another Director seconds the motion; and the chairperson states the motion.

**5070.3.2** Once the motion has been stated by the chairperson, it is open to discussion and debate. After the matter has been fully debated, the chairperson will call for the vote.

### **5070.4** Secondary Motions. Ordinarily, only one motion can be considered at a time and a motion must be disposed of before any other motions or businesses are considered. There are a few exceptions to this general rule, though, where a secondary motion concerning the main motion may be made and considered before voting on the main motion.

**5070.4.1** Motion to Amend. A main motion may be amended before it is voted on, either by the consent of the Directors who moved and seconded, or by a new motion and second.

**5070.4.2** Motion to Table. A main motion may be indefinitely tabled before it is voted on by motion made to table, which is then seconded and approved by a majority vote of the Board.

**5070.4.3** Motion to Postpone. A main motion may be postponed to a certain time by a motion to postpone, which is then seconded and approved by a majority vote of the Board.

**5070.4.4** Motion to Refer to Committee. A main motion may be referred to a Board committee for further study and recommendation by a motion to refer to committee, which is then seconded and approved by a majority vote of the Board.

**5070.4.5** Motion to Close Debate and Vote Immediately. As provided above, any Director may move to close debate and immediately vote on a main motion.

**5070.4.6** Motion to Adjourn. A meeting may be adjourned by motion made, seconded, and approved by a majority vote of the Board before voting on a main motion.

**5070.5** Decorum.

**5070.5.1** The chairperson shall take whatever actions are necessary and appropriate to preserve order and decorum during Board meetings, including public hearings. The chairperson may eject any person or persons making personal, impertinent or slanderous remarks, refusing to abide by a request from the chairperson, or otherwise disrupting the meeting or hearing.

**5070.5.2** The chairperson may also declare a short recess during any meeting.

**5070.6** Amendment of Rules of Order.

**5070.6.1** By motion made, seconded and approved by a majority vote, the Board may, at its discretion and at any meeting: a) temporarily suspend these rules in whole or in part; b) amend these rules in whole or in part; or, c) both.
